Lancaster Farming

Vol. 21 No. 14 | Lancaster Farming, Saturday, Feb. 21, 1976 | $3.00 Per Year

Man's best friend led the way while four harder working friends pulled a plow near Ronks on Thursday. 'Plowing fever' got the best of this Amishman and a number of other farmers this week as unusually warm and sunny weather moved into the area.

New beef grades upset cattlemen

By DIETER KRIEG

LANCASTER — The new federal meat grading regulations which are to go into effect Monday aren't likely to benefit anyone, according to opinions expressed Wednesday night at the Lancaster Stock Yards when the new standards were explained by USDA representatives. Most of the approximately 150 farmers and packers present didn't know for sure what the proposed revisions mean, but by the time the situation was explained, they had made up their minds where they stood: opposite from USDA.

Bill McCoy, president of the Lancaster Stock Yards, Inc., had this to say: "We can ill afford to change standards which for the past 30 or 40 years have enabled cattlemen to come up with a product which consumers want — these new regulations could, in my opinion, drive consumers from the meat counter — and even if we lose just one customer, we took a step in the wrong direction."

It was a point which a number of people in the auction room agreed with. Milt Marshall, representative of Cross Brothers, a Philadelphia meat packing firm, rose from his seat on numerous occasions to contest the USDA position. "We pay for our own mistakes, and I'll be darned if I want to

Chester Co. Dairy Day featured calf care

By DIETER KRIEG

UNIONVILLE - Cleanliness, the elimination of stress, proper temperature and humidity levels, draft-free and dry housing, and good management are the most essential points to remember in a good calf-raising program, according to Don Ace, Penn State dairy specialist.

Ace was here at the Stone Barn Inn on Thursday to take part in Chester County Dairy Day activities which drew more than 200 dairymen on a day which was marked by unseasonably warm and sunny weather.

"I am well convinced that management is the key to controlling calf losses," the renowned dairy specialist said at one point. "How badly do you want to keep the calves alive?" he asked. Ace noted that in one study within the state, 545 dairymen were surveyed and out of these, three had lost all of their calves during an entire year. "Calf losses are pretty darn serious in this state on the average," he exclaimed. "You can probably live with a calf loss of five to ten per cent, but I'd advise you to stay below the five per cent mortality level."

Speaking of baby calves as frail individuals which are as helpless as human babies, Ace made it clear that he is in

Solanco youth is Pa. Corn Contest winner

By MELISSA PIPER

QUARRYVILLE - One of the first farming techniques that almost every young person learns is the fine art of growing corn. And while the whole operation from plowing to harvesting can be accomplished with great numbers of acreage, perfecting one single acre can be quite complicated.

For one Solanco area youth however, his one acre corn crop turned out to be a prize winning effort.

Dan Hershberger, son of Mr. and Mrs. Robert Hershberger, Quarryville R1, was recently named as the Gold Medal Winner in a one acre corn contest sponsored by the Pennsylvania Crop Improvement Association. Dan's honor was singular in the state as the youth was the only producer to have 201 bushels of corn in his acre plot.

The contest is sponsored annual by the crop association and is open to farming youth under 21 years of age. Judging is based on yield per acre along with net profits gained from the venture. Dan's net profit was calculated at $381, which the youth has put into buying new stock for his dairy herd.

Last of the tobacco crop moves to market

RONKS - Lancaster County's tobacco crop is sold, and as has been reported here and elsewhere for the last several weeks, the going price was 58 cents per pound.

Trucks and wagons were lining the main street here on Thursday, waiting to unload their crop at an old warehouse. A Denver area farmer said he had been there since 8 a.m. and didn't expect to reach the unloading dock until mid-afternoon. More loads were still coming in at 2 p.m. Asked if he was satisfied with his price, he responded with a quick "yes," explaining that it's very fair considering the quality of his tobacco this year. On the other hand, it did not cover his expenses.

Two Amishmen from Bird-in-Hand were delivering the last of their crop Thursday afternoon. They had sold all of it for 58 cents and commented that "we could use 60 cents, and we'd be better pleased, but we don't want to complain.

A tobacco grower from the Kinzer area said he wasn't satisfied with his price - which, like all the rest, was 58 cents per pound. He flatly stated that the costs of production and everything else have gone up but the price of tobacco stayed the same as last year. "It don't make sense," he exclaimed.

Most farmers were, however, satisfied with the deal they had made. Their costs of production weren't always met, but then on the other hand, they admitted they didn't have quite the quality or quantity either.

One Amishman, puffing on his cigar, summed up the attitude of most tobacco growers: "I guess we'll have to be pleased with it."

Wagons and trucks lined the streets of Ronks on Thursday to deliver the last of this year's 58-cent tobacco crop to the warehouse.

PROGRESSIVE FARMERS WANT PROFESSIONAL CONSULTATION

1. Is pH a false indicator of calcium levels in your soils?
2. Is sulphur holding back the yield, protein content and digestibility of your crops?
3. Is excessive magnesium what makes your land so wet and late?

If your present soil tests don't answer these questions, you will profit by our technical help. SOIL TESTS ARE DIFFERENT! Our complete soil analysis will help you balance soil fertility, which means more efficient cropping and feeding - less bought feed and fertilizer - more yield and profit.

WE SELL NO PRODUCTS — ONLY RECOMMENDATIONS

There is a reason why progressive farmers with sharp pencils hire us year after year for soil analyses and recommendations. We save them dollars. Balance makes crops to be proud of. Winter is the time to talk it over with:

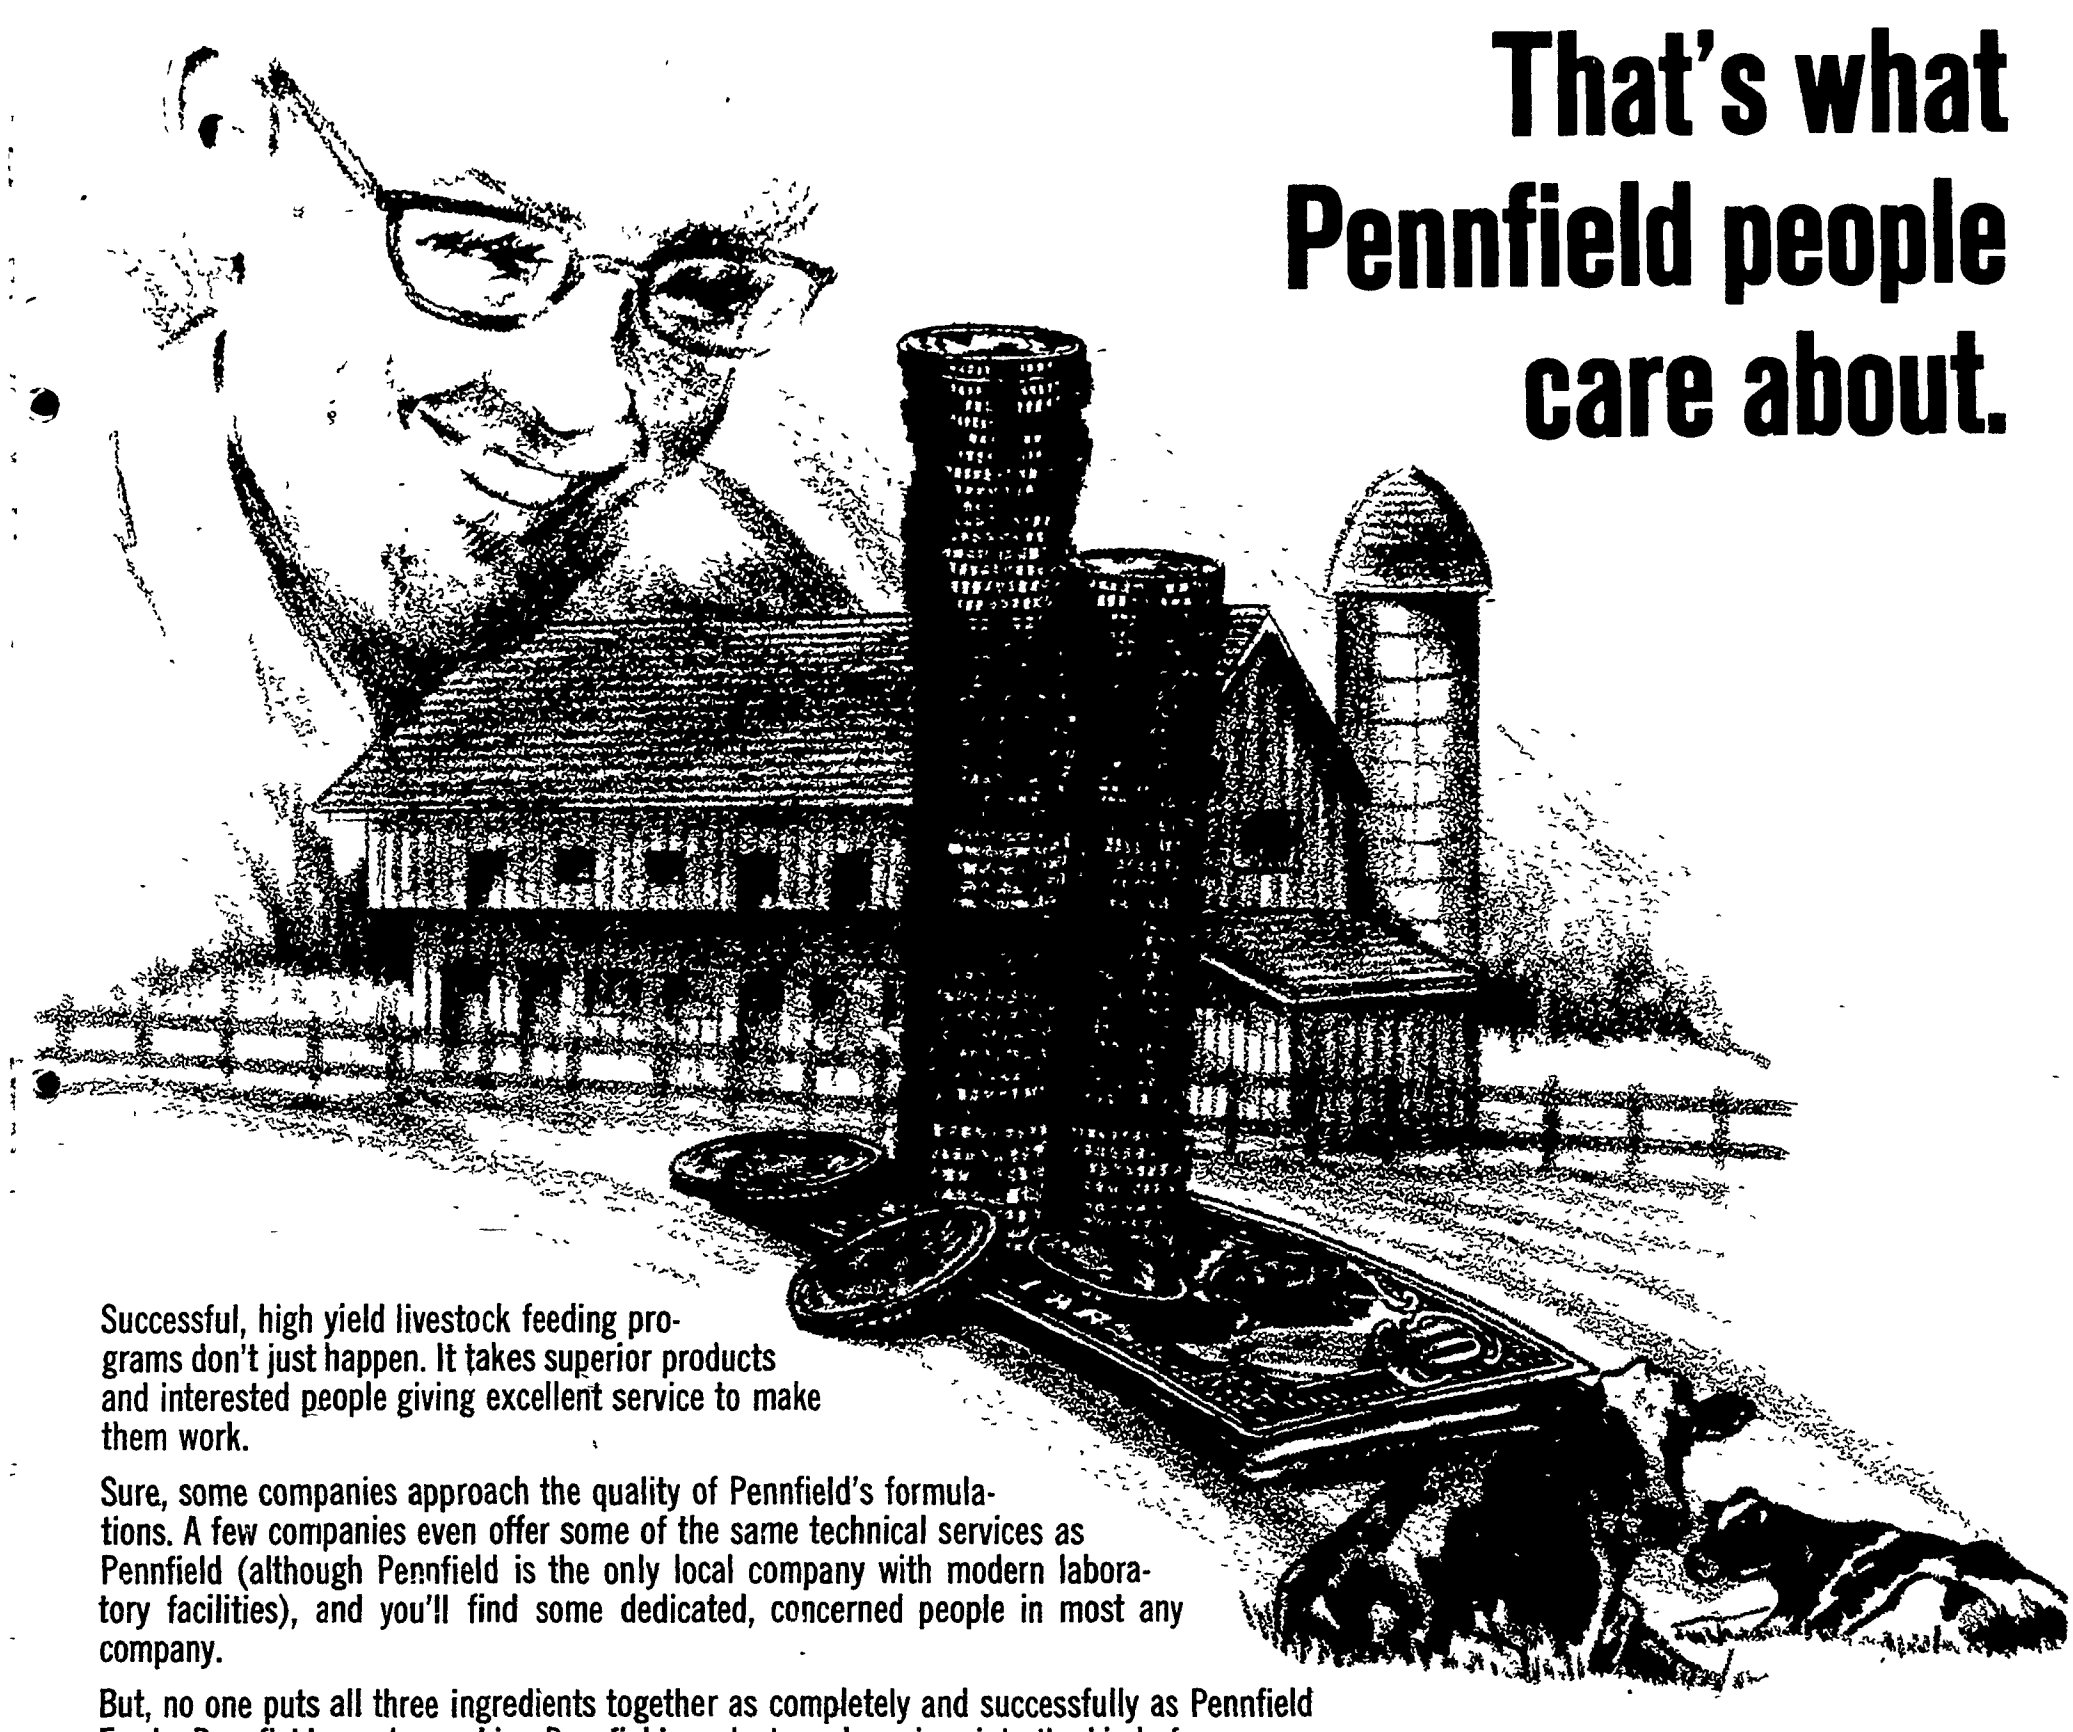
Your LIVESTOCK PRODUCTIVITY, your PROFITABILITY.

That's what Pennfield people care about.



Successful, high yield livestock feeding programs don't just happen. It takes superior products and interested people giving excellent service to make them work.

Sure, some companies approach the quality of Pennfield's formulations. A few companies even offer some of the same technical services as Pennfield (although Pennfield is the only local company with modern laboratory facilities), and you'll find some dedicated, concerned people in most any company.

But, no one puts all three ingredients together as completely and successfully as Pennfield Feeds. Pennfield people combine Pennfield products and services into the kind of complete livestock feeding and farm management programs that result in higher yields, planned growth, and increased profit for Pennfield customers.

Chemists, nutritionists, production personnel, veterinarians, computer technicians, business and marketing analysts, deliverymen, quality control specialists, financial experts, and more . . . led by your Pennfield Area Manager who can put them all together to develop and service a customized, profit-oriented program for you. These are Pennfield people. And, Pennfield people make Pennfield Feeds a better buy!

Want to know how Pennfield people can work for you to improve your yields and profit? Complete and mail this coupon for a no obligation survey.

Peoria

February 19
Weekly Summary
Cattle Receipts

This Week	5500
Last Week	5000
Year Ago	4800

Compared with last week's close. Slaughter steers 50-1.00 lower. Slaughter heifers mostly 1.00 lower. Cows FI to 50 higher. Bulls firm. Receipts about 65 percent slaughter steers, 25 percent slaughter heifers, balance mainly cows. Slaughter steers and heifers worked lower under the influence of a lower dressed meat trade. Most decline noted in yield grade 4-5 slaughter steers and heifers.

SLAUGHTER STEERS: Choice and Prime 1150-1325 lbs. yield grade 3-4 39.50-40.25, early up to 41.00; Choice 1000-1350 lbs. yield grade 2-4 38.50-40.50, mostly 38.50-40.00; 1200-1350 lbs. yield grade 3-5 38.00-39.00; Mixed Good and Choice 900-1300 lbs. 37.00-39.00; Good 35.00-37.00; couple loads Standard and Good Holsteins 33.50-35.00.

SLAUGHTER HEIFERS: Choice and Prime 900-1050 lbs. yield grade 3-4 38.00-38.25; Choice 850-1025 lbs. yield grade 2-4 36.50-38.00, early up to 39.00; 900-1100 lbs. yield grade 4-5 32.00-35.00; mixed Good and Choice 750-1000 lbs. 34.00-37.00; Good 29.00-34.50.

COWS: Utility and Commercial 25.00-28.50; high-dressing Utility 29.00-29.50, individual yield grade 1 30.50; cutter 23.00-27.00; canner 20.00-23.00; light weight canner 18.50-20.00.

BULLS: Yield grade 1 1100-1800 lbs. 26.00-31.00, several yield grade 1 32.00-35.00; couple 36.50.

FEEDERS: Few loads and part loads Choice 975-1051 lbs. moderately fleshy steers 38.50-39.50.

READ LANCASTER FARMING FOR FULL MARKET REPORTS

THE OLD FARMER'S ALMANAC

MARCH 1-7, 1976

Begins like a lamb, but it's a sham.

Town meetings begin this week Glenn Miller born March 1, 1909 Average length of days for the week, 11 hours, 22 minutes Skunks emerge now Battle of Alamo March 6, 1836 International Ice Patrol started March 5, 1959 If you hear thunder this week, it means fine fall crops *Facts do not cease to exist because they are ignored*

Old Farmer's Riddle: How can you make a Maltese cross? (Answer below)

Ask the Old Farmer: Have you ever heard that burning fresh potato peelings on top of the logs in a fireplace will help clean the chimney? I have tried it, but can't tell whether it works H K, Auburn, N Y

A very old custom — and so far as we know it never fails Of course older folks ate more potatoes than we do today, so the doses of peelings were frequent and liberal

Home Hints: To hide scratches on natural wood cabinets and woodwork, rub with mineral oil on a soft cloth The scratch will assume the shade of the woodwork **Riddle answer:** Pull its tail

OLD FARMER'S WEATHER FORECASTS

New England: Moderately rainy through midweek, warm and clear latter part, then light rain and light snow in north by week's end

Greater New York-New Jersey: Rain at first, then colder and some light snow; latter part cloudy and warmer, some light rain

Middle Atlantic Coastal: Light to moderate rain at first, then turning to snow and colder, latter part mild with light rain

Piedmont & Southeast Coastal: Some light rain with sub-normal temperatures early week, a few showers and very warm latter part.

Florida: Week begins fair and warm with scattered light showers, week ends sunny and warm in central and north, partly cloudy and mild in south

Upstate N.Y.-Toronto & Montreal: First part of week rainy, except snow in north and mountains, then clearing, light rain in south, snow in mountains and north latter part

Greater Ohio Valley: Rainy at first, heavy along Ohio River, then clear and mild, warm spell, heavy rain and floods, except light rain in east, latter part.

Deep South: Rain ending, then clearing and warming to normal; week ends clear and warm in central and south, and showery.

Chicago & Southern Great Lakes: Week begins sunny and cool in central and south, light snow in north, rain in east, rainy over region latter part, mixed with snow in north

Northern Great Lakes: Early week very cold with snow, more in west and less in central and east, light snow latter part, cold abating by weekend

Central Great Plains: Light snow at first, but heavier in central and very cold in north, then mild, light rain, heavier in southeast, latter part

Texas-Oklahoma: Sunny and unseasonably cold to start, then returning to normal midweek, rest of week partly cloudy and warm, with showers in north

Rocky Mountain: Cold and snowy all week, except for clearing and milder temperatures in south by week's end

Southwest Desert: Clear and cold, then warmer, some light rain in west ends latter part, then general clearing and cool

Pacific Northwest: First part of week cloudy, quite cold and drizzly, some snow in mountains, storm latter part, heavy rain mixed with snow and gale winds

California: Clear and cool through midweek, then rainy, cold and windy latter part

(All Rights Reserved Yankee Inc Dublin N H 03444)

Leesport Auction

Leesport, PA
February 18, 1976

Two Yield Grade No. 1, 1470 and 1585 lbs. slaughter bulls 32.50 and 34.85. One Choice 620 lbs. feeder steer at 43.25, Good 360-900 lbs. 33.50-40.50, few Medium 740-765 lbs. 30.00-30.50. One Choice 490 lbs. feeder heifer at 37.50, few Good 300-670 lbs. 29.50-36.50, Medium 200-660 lbs. 18.00-30.00. Good 300-530 lbs. feeder bulls 30.00-33.50, Medium 200-735 lbs. 22.50-27.50.

CALVES 191. Vealers mostly steady. Couple Choice vealers 60.00 and 65.00, Good 52.00-62.00, Standard 40.00-52.00, Utility 110-130 lbs. 29.00-40.00, 90-110 lbs. 23.00-28.00, 70-85 lbs. 20.00-25.00. Farm Calves: Holstein bulls 95-125 lbs. 26.00-43.00.

HOGS 260. Barrows and gilts 25 cents to 75 cents lower. US No. 1-3 200-225 lbs. barrows and gilts 50.25-51.10, No. 2-3 190-235 lbs. 49.00-50.25, few No. 2-4 200-300 lbs. 47.10-48.60. US No. 1, 300-600 lbs. sows 38.50-44.00. Few Boars 210-235 lbs. 41.00-53.00.

FEEDER PIGS 104. US No. 1-3 35-50 lbs. feeder pigs 32.00-52.00, lot No. 1-3 90 lbs. at 52.00, Utility 20-35 lbs. 13.00-26.00 per head.

SHEEP 7. Two Choice 85 and 100 lbs. wooled slaughter lambs at 45.00, few Good 65-95 lbs. 32.00-40.00.

Carlisle Auction

Carlisle, Pa.
February 17, 1976

CATTLE 251. Compared with last Tuesday's market, slaughter cows mostly steady to 25 cents lower. Few Good slaughter steers 35.25-39.10, Standard 31.50-35.60, few Utility 26.50-29.85. Couple Choice slaughter heifers 35.00 and 36.00, few Good 29.85-35.00, Few Standard 28.50-31.75, few Cutter and Utility 23.50-26.00. Utility and High Dressing Cutter slaughter cows 27.00-28.50, Cutters 24.00-26.50, few to 27.50, Canners 22.25-24.10, Shells down to 12.00. Few Standard slaughter bullocks 30.00-32.75, few Utility 22.25-24.35. Few Yield Grade No. 1, 1310-1850 lbs. slaughter bulls 29.25-33.50; individual Yield Grade No. 2, 1540 lbs. at 34.00. Common and Medium 265-500 lbs. feeder steers and bulls 22.00-28.50.

CALVES 221. Vealers uneven, mostly steady to $1 higher. Few Good and Choice vealers 61.50-74.50, Good 48.00-57.00, Standard 40.50-49.50, Utility 110-120 lbs. 32.00-38.00, 90-110 lbs. 24.00-29.50, 70-85 lbs. 20.00-25.00, few 60-70 lbs. 15.00-20.00. Farm Calves: Holstein bulls 95-120 lbs. 28.50-37.00.

HOGS 306. Barrows and gilts mostly strong to 50 cents higher. US No. 1-2 200-235 lbs. barrows and gilts 50.50-51.35, No. 1-3 195-245 lbs. 50.00-51.10, No. 2-3 195-260 lbs. 49.25-50.25. Few US No. 1-3 385-485 lbs. sows 41.50-45.00, few No. 2-3 515-545 lbs. 40.00-41.75. Boars 35.25-37.25.

FEEDER PIGS 150. US No. 1-3 20-35 lbs. feeder pigs 25.00-33.00, per head, No. 1-3 35-50 lbs. 35.00-42.00 per head.

SHEEP 30. Few Choice 110-110 lbs. wooled slaughter lambs 47.00-48.00, Good 70-110 lbs. 30.00-41.00. Slaughter ewes 8.50-15.00.

Local Grain

Friday, Feb. 20

These prices are made up of the average prices quoted by a number of participating local feed and grain concerns. It should be noted, however, that not every dealer or broker handles each commodity. All prices are per bushel except ear corn and soybean meal which are per ton.

The average local grain prices quoted Friday, Feb. 20 are as follows:

	Bid+	Offered+
Ear Corn	64.00	71.00
Shelled Corn	2.74	2.87½
Barley	2.05	2.22
Oats		
Local	1.70	1.90
Western	1.87	2.05
Wheat		
Millers	3.41	3.63
Feed	2.75	3.00
Soybeans	4.64	—
Soybean Meal	—	—
	—	176.00

+Bid is the price the dealer will buy from the farmer delivered to the mill. Offered is the price the dealer will sell for at his mill.

Omaha Cattle

February 19
Weekly 51 Sheep

Slaughter lambs closed 50 to 1.50 higher, full advance on weights under 110 lbs. slaughter ewes scarce. Receipts this week 1175 consisting largely of shorn lambs compared 900 last week and 1125 year ago.

SLAUGHTER LAMBS: Choice with end Prime 103-116 lbs. shorn with no pelts 49.75-51.00 included 325 head 103-108 lbs. 51.00, wooled around 100 lbs. late 49.50.

Oklahoma Cattle

February 19
Thursday Feeder Cattle Auction

Estimated Receipts 11,900
Same day last week 11,00[illegible]

Trade moderate, feeder cattle 50 cents to 1.00 lower Majority receipts mixed good and choice, and choice 400-900 lb. steers, 400-750 lb heifers, with the bulk consisting of cattle off wheat pasture $73 to extreme dry conditions throughout area Moderate attendance buyers.

STEERS· Choice 350-500 lb. 38.75-42.00, 500-700 lb 38.75-42.00, bulk 39.00-41.75, 700-990 lb. 38.75-41.50; mixed good and choice 390-500 lb. 36.00-38.75, 500-600 lb. 35.25-39.50, 600-800 lb. 36.75-40.75, few 800-885 lb. 38.00-38.75; good 550-750 lb. 34.75-37.75.

HEIFERS: Choice 300-500 lb. 31.00-34.75, 500-600 lb. 32.25-35.00, 600-785 lb. 33.50-36.00; mixed good and choice 300-500 lb. 28.50-32.00, 500-60[illegible] lb. 31.50-33.50, couple pa[illegible] loads 713-809 lb. 31.25-33.25.

Merck gives $16,900 for egg promotion

Merck Animal Health Division presented American Egg Board with a check for $16,900 for egg promotion at the International Poultry Convention and Exposition in Atlanta. United Egg Production President John Wallace accepted the check for AEB. With the addition of the check, Merck's total contributions to AEB total more than $69,000.

Richard L. Kathe, President of AEB, awarded Merck Company a plaque acknowledging their strong support.

Merck's contributions come from a special fund which the Animal Health Division sets aside for promotion purposes. Merck's customers have the option of allocating the money deducated from their invoices for egg, broiler, or turkey promotion.

Maryland hog producer is named 'All-American'

COLLEGE PARK - This year's fifth Pork All-American for Maryland is Paul L. Shortall, Jr., who operates a grain and hog farm about two miles east of Easton on the upper Eastern Shore.

His father, Paul L. Shortall, Sr., still produced grain and broilers in the Miles River Neck area northwest of Easton. The home farm also had a dairy operation in former years.

The younger Shortall got interested in swine while he was an FFA member at Easton Senior High School. He now produces 800 to 900 feeder pigs per year of Yorkshire crossbred beeding. Nearly all are marketed through the two Eastern Shore feeder pig auction sales held regularly at Denton and Eden.

Maryland's new Pork All-American and his wife are the parents of a nine-year-old girl and a boy, 14. Their son, Keith P. Shortall, is a 4-H member.

Keith won the youth division of the Talbot County Corn Club contest for 1975 with a yield of 157.51 bushels per acre - bettering his dad's mark in the adult division of the same contest by more than 9 bushels per acre.

Paul L. Shortall, Jr., is in his second year as feeder pig committee chairman for the Maryland Pork Producers Association, Inc. And he was re-elected for a third three-year term on the board of directors at the association's annual meeting last month in the Tidewater Inn at Easton.

Shortall received his Pork All-American citation from last year's winner, Franklin E. Feeser of Taneytown. The award carries with it an expense-paid trip for Shortall and his wife to attend this year's American Pork Congress on March 9-11 at Indianapolis, Ind.

Also at last month's meeting in Easton, the MPPA presented its fifth annual James R. Ferguson memorial award trophy for superior production of feeder pigs to J. Quinton Johnson of Salisbury, a Duroc breeder and former president of the state pork producers association.

The MPPA service award was presented to George B. Roche of Colesville (Montgomery county), a market development and promotion specialist for the Maryland state Department of Agriculture in Annapolis.

Roche has coordinated arrangements for the annual Porkecue Cook-Off contest each year since its inception in 1971 at the Maryland State Fair. And he helped to establish in Maryland the three-year voluntary nickle check-off program of the National Pork Producers Council which led to passage of a compulsory check-off in a statewide referendum on Nov. 14, 1975.

Aimed at promoting and strengthening the pork industry, the compulsory nickel check-off program went into effect in the Old Line State on Jan. 1, 1976.

Named as Maryland's new pork queen was Sandy Gladhill, an 18-year-old graduate of Damascus high school. Miss Gladhill is currently attending the Maryland Medical Secretarial School in Hagerstown.

She has been an active 4-H and FFA member, involved in sewing, cooking, camping, crocheting, knitting, ice-skating and raising swine, beef and poultry. Several breeds of hogs are raised on her father's 1,500-acre farm near Damascus.

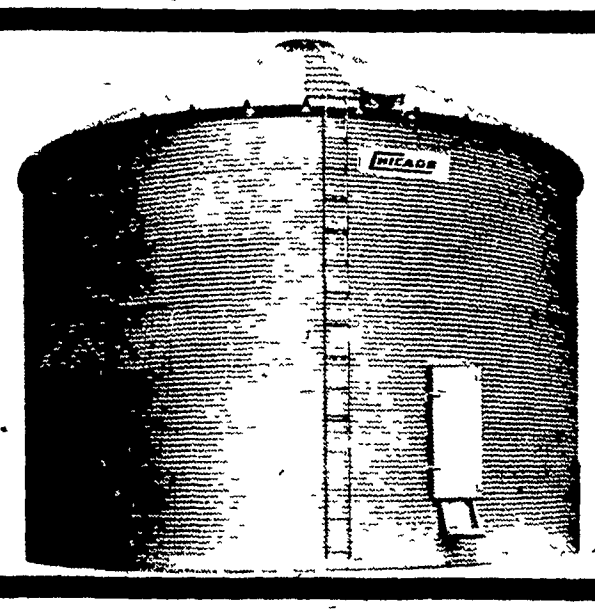
John E. Strawbridge of Stewartstown, Pa., was presented the 1975 Maryland State Fair carcass award. And Donald E. Morrison of Dayton received a special booster's award for long-time participation in pork promotion activities. Morrison has served the past year as MPPA Newsletter editor. And he was re-elected as association treasurer.

Other MPPA officers were also re-elected. They include Franklin E. Feeser of Taneytown, president; William C. Malkus of Cambridge vice-president for the Eastern Shore; Russell G. Watson of Brandywine vice-president for the western shore, and J. Gordon ("J. G. ") Warfield, Jr., of Marriottsville, secretary.

Award winners comprised the new state pork queen's coterie following last month's twenty-first annual meeting of the Maryland Pork Producers Association. The event was held Jan. 29 in the Tidewater Inn at Easton. Shown are (left to right): J. Quinton Johnson of Salisbury (Wincomico county); Paul L. Shortall, Jr., of Easton (Talbot county); Sandy Gladhill, 18, or Damascus (Montgomery county); George B. Roche of Colesville (Montgomery county); John E. Strawbridge of Stewartstown, Pa. (Harford county, Md.), and Donald E. Morrison of Dayton (Howard county). Strawbridge is a purebred Hampshire and Yorkshire breeder with farming operations on both sides of the Mason and Dixon Line.

CHICAGO EASTERN CORPORATION

NOW is the time to PLAN, Budget and Select YOUR STORAGE, DRYING and HANDLING SYSTEM.



CHICAGO STORAGE & DRYING BINS

- Chicago Bins were first with the features that are now the standard of the industry in modern mechanized storage and drying systems.
- Largest size selection of storage and drying bins in the industry. 15' to 48' diameters. Sidewall heights from 10'8" to 26'8".
- Heavy duty corrugated wall sheets. Steep pitch clear-span super-rib roofs, galvanized steel used throughout. Grade # 5 hardened hardware used throughout.
- A Bin-Dryer combination by a single manufacturer assures most efficient, economical answer to your grain conditioning needs. Famous Chicago Fans and Heaters designed to work best with Chicago Bins. Chicago designed controls for all drying applications.
- Full line of drying engineered accessories. Aerodynamically designed transitions. Free air flow perforated corrugated floors. Simple rugged steel floor supports for strength and minimum obstruction of air flow.

EDITORIAL COMMENTS

BY DIETER KRIEG, EDITOR

Earl Butz's last stand?

Some very interesting comments were made at the meat standards meeting on Wednesday night, but the one which lends itself to speculation more so than any other is this: How might it all affect Secretary of Agriculture, Earl Butz? The general feeling among the several persons who discussed the matter after the formal presentation was that he might go the way our own former agriculture secretary, James McHale, went. Out.

To begin with, people haven't forgotten the rotten grain deal of 1972. As is true of anyone in a leadership role, Butz has made some enemies during the past five years. There's no doubt he's controversial.

The meat grading proposals have evidently split the meat industry and no one seems to know for sure why it's even taking place. The reprecussions are certainly being heard in Butz's office. So Butz has had the grain people after him, then the cattlemen, then the dairymen, now the cattlemen some more - not to mention other segments of this country's vast agricultural network.

According to some knowledgeable persons within the meat industry, Butz's ouster could come now if the price of grain drops much more - and this could happen.

Cattlemen now find themselves faced with a market which penalizes the formerly "choice" and "prime" grades because of the newly improvised "yield grades" which call for leaner carcasses. That means feeding cattle for shorter periods of time and with an average of 245 pounds less grain per head. That could add up to having a huge stockpile of grain on hand later this year if it's not going through cattle like it used to.

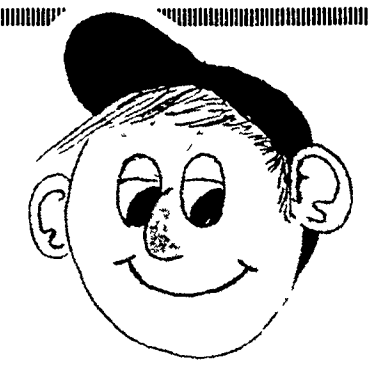
The grain boys are already upset because of having lost a significant share of their export market. Take away a part of their market here at home by changing beef grading, and they're likely to make more noise than ever before.

The noise could be loud enough to force Butz right out of his office. Some cattlemen are already betting on it.

Nixnutz's Corral

By BARNEY NIXNUTZ

"All the news that's unimportant, but still interesting."



Weighing tip

Here's a tip from the Philadelphia Phillies Ag Extension Service, namely Gene Garber, who plays for the Phillies and is fond of his connections with agriculture. To find out how much milk your cows give, run each cow onto a scale before you milk her, record her weight, milk her, and weigh her again after milking. The difference between what she weighed before and after is the amount of milk she gave Clever!

Trapped tongue

Then there's this story about a York County dairyman and his helper as they prepared to milk a herd of cows (Names are fictitious, but the story isn't).

The dairyman, Sam, already had his two machines suspended from the first two cows' bellies when the hired man rushed into the barn without saying a word and carrying a milker in each hand. Possibly a little uneasy about not being exactly on time, he rushed back and forth from the milk house to his end of the stable. Finally, he had everything ready to go. But he still hadn't said a word.

"Hey, Marty!" the dairyman called, "you're a little late — I have my first two cows just about milked out."

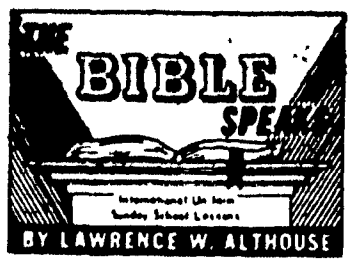
Marty remained silent, only acknowledging the remark with a sheepish grin, as he walked in between the cows to attach the black vacuum hose.

"You know, Marty, since I've been milking for a few minutes already, all of the vacuum is at my end of the barn and you don't have enough at your end to get the milking done," Sam said with a big grin.

Marty stopped for a second to ponder the situation and then proceeded with his work as if nothing had been said.

"Since you don't have enough vacuum on your end, Marty, and I have most of it here at my end, you might want to suck some of it down your way," Sam said.

Marty, always willing to take a joke, tried it, and found out in a hurry that there was plenty of vacuum in his end of the line.



OF CROSSES AND CHURCHES

Lesson for February 22, 1976

Background Scripture: Matthew 16 through 17.

Devotional Reading: Micah 4:1-7.

It is sometimes said that Peter's confession at Caesarea and Christ's well-known response are the Church's basic charter. When Simon Peter confesses, "You are the Christ, the Son of the living God," he is enunciating for all of us the basic faith upon which the Church of Jesus Christ is founded.

Furthermore, it is maintained that when Jesus responds, saying: "Blessed are you, Simon Bar-Jonah! . . . and on this rock I will build my church . . ." (Matthew 16:17), the "rock" to which he is referring is the confessed faith of Peter and all disciples who make that same confession.

So, it is customary to say that the confession of Jesus Christ as Lord and Saviour is the touchstone of Christian discipleship.

"Lost Sheep" and "dogs"

This is fine, as far as it goes, but there is more to the story.

There are actually two promises. The first of these is the promise of the "keys of the kingdom," the authority of those who would follow Jesus.

For long periods in the history of the Church it has possessed enormous authority in the world. The church has frequently dominated history and few people today in the world are not affected in some way by the power of the Church. In your own state many of the laws on the books — such as the sunday "blue laws," movie censorship, "dry legislation," etc. — are the direct or indirect result of the Church's secular power.

Today the church seems to be losing much of that secular power, but the loss may be more apparent than real.

"Get behind me, Satan!"

The second promise is that of the cross: "From that time Jesus began to show his disciples that he must go to Jerusalem and suffer many things . . . and be killed . . ." (Matthew 16:21).

The disciples were not happy about this promise; in fact, Peter in his usual "subtle" fashion, blurted out his view: "God forbid, Lord!"

Worst of all, however, was the extension of that promise to themselves: "If any man would come after me, let him deny himself and take up his cross and follow me" (16:24). They liked that promise even less!

If we are really quite honest, we would have to admit that the Church still isn't very enthusiastic about that promise. Although Matthew 16:24 is frequently quoted in our churches and although we sometimes talk about "sacrificial giving," (usually in reference to our own church budgets), the concept of cross-bearing seems entirely alien. Comfort, not sacrificial living seems to be the goal of many of us. Still, "If any man would come after me, let him deny himself and take up his cross and follow me!"

To Test Farm Grown Seeds

The Pennsylvania Department of Agriculture at Harrisburg will test seeds for farm and garden plantings at a reasonable cost; prices for timothy, red clover, and spring oats is $2.50 per sample while the cost for testing soybeans is $3.50 per sample. The amount needed is one cup of timothy or clover seed and two pounds of oats or soybeans. The laboratory will test for germination, weed seeds, and estimate purity. We strongly urge farmers and gardeners to have their seeds tested if they are to be used this spring. Seeds offered for sale must be tested by the Department of Agriculture.

To Spring Plow

Land that has been plowed last fall or during the winter can be worked earlier than land plowed later this spring. If weather permits, we urge early spring plowing on level land that is to be seeded as early as possible this spring. I'm thinking of crops such as spring oats or straight seedings of alfalfa where very early seedings are favored. Even though the ground may be on the wet side when plowed during February or March, many times freezing weather will make it much easier to work. After the danger of freezes are over, the ground should not be plowed or worked in a wet condition. Seedings of spring oats or alfalfa made during late March are preferred over April or May seedings.

To Stress Weed Control

Listening to the speakers at the recent Crops and Soils Day we got the message that good weed control is still one of the most important practices in good crop production. This is not an easy task and on most farms hundreds of dollars are spent each year in trying to keep the weeds under control. This is still very important because poor weed control can reduce yields as much as 50 percent. I realize that it is a bit early in the season to be talking about killing weeds because very few of them are growing at this time, (except chickweed and wild garlic), but it is time to be planning the weed control program for the rest of the year. Materials need to be ordered, or custom spray operators secured. Don't fail to make every effort to control more weeds this year.

To Be Careful When Buying Feeders

Many local cattle and hog feeders are often on the market for replacement steers or pigs. This is a very important step in any feeding operation because the kind and quality of the animals purchased can mean profit or loss on the deal. Fresh cattle are ones that have not been handled through a number of dealers or auctions; many severe health problems have been experienced with "stale" cattle. Pig feeders are still reminded of the need of buying from reliable sources and on pigs that carry official health papers. In too many cases pigs that are light in weight may not be that way because they are younger; they may have had health problems and are being "run through" again.

Farm Calendar

Feb. 22

National Peach Growers Convention at the Convention Center, Hershey. Meetings last through the 25th.

Feb. 23

Swine management meeting, Gettysburg High Schools (Adams County).

Feb. 24

Swine management meeting, 9:30 a.m. to 3 p.m. at the Lancaster Farm and Home Center.

Atlantic Breeders meeting, District 4, Blue Ball Fire Hall, 7 p.m.

Lebanon County 4-H Livestock banquet, 7 p.m. at Schaefferstown Fire Hall.

"Lancaster County's Beauty," a slide presentation by noted photographer - lecturer Grant Heilman; sponsored by the Lancaster County Conservancy. 7:30 p.m. in the Coca Cola Building, 1428 Manheim Pike, Lancaster. Free.

Dairy herd health management seminar on mastitis control and prevention, Ephrata Young Farmers, 7:45 at the high school.

Feb. 25

Franklin County Crops Day, 9:30 a.m. to 3 p.m. at the Chambersburg Holiday Inn.

Southeastern Pennsylvania Corn Growers Clinic and Trade Show, Westover Inn and Golf Club, Jeffersonville, Pa. Meetings begin 8:30 a.m. and last through 3:30 p.m. More meetings follow on the 26th.

Feb. 26

Commercial Pesticide Certification, Lancaster Farm and Home Center, 9 a.m. to 3 p.m.

Estate Planning — wills and taxes — Lancaster Farm and Home Center, 7:30 p.m.

York - Adams - Franklin Council of Cooperatives and Cumberland-Perry Council of Cooperatives sponsor seminar for all Young Cooperator

MUELLER FRE-HEATER™

EXPLANATION OF THE REVOLUTIONARY NEW MUELLER "FRE-HEATER™" FOR THE DAIRY FARM

Bulk milk coolers on modern dairy farms remove heat from the milk promptly after it is produced To accomplish this requires refrigeration machines and they are generally of the air-cooled type Air-cooled condensing units literally "throw away" this valuable heat

On these same farms, large amounts of hot water are needed for "prepping" the cows, washing the milk cooler, the pipeline milker, other equipment, and the milking parlor itself It is also advantageous to heat the cows drinking water in winter

The Mueller Fre-Heater conserves energy and provides "free" hot water by capturing the heat now wasted!

HERE'S HOW IT WORKS:

Rather than using noisy, dust-creating fans with fragile, dirt collecting air-cooled condensers, the refrigerant is routed to a specially designed condenser/heat exchanger and its heat is transferred to the water

A thermostatically controlled valve delivers 145° F water to the storage tank

In addition to the thermostatic valve, a mixing valve is provided to permit "prepping" temperature water

Thus, the Fre-Heater delivers two temperatures of water — prepping and washing

Tests indicate the Fre-Heater consumes 10% less power than an air-cooled system . . . and you get Free Hot Water!

ELIMINATES REFRIGERATION SERVICE PROBLEMS!

The most common causes of slow cooling in bulk milk cooling systems are related to the air-cooled condenser

Three things which frequently reduce the efficiency are

1. Poor air circulation and recirculation
2. Fan motor failures
3. Dirty or clogged condenser fins

Air-cooled condensing units are generally installed out of doors in order to assure adequate air supply to the condenser. This exposes the compressor to extreme ambient temperatures Starting problems and compressor failures have resulted and air-cooled condenser units are always noisy.

The Fre-Heater eliminates these problems because:

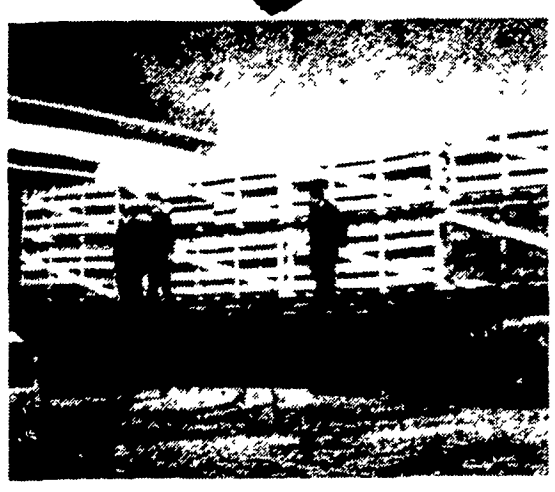
- There is no air-cooled condenser.
- The Fre-Heater is installed indoors
- There are no fans to generate noise.
- The head pressure is very stable — assuring longer compressor life.
- There are *no* cold weather starting problems, plus

. . . the Fre-Heater conserves energy and produces Free Hot Water!

HOW MUCH HOT WATER CAN BE GENERATED?

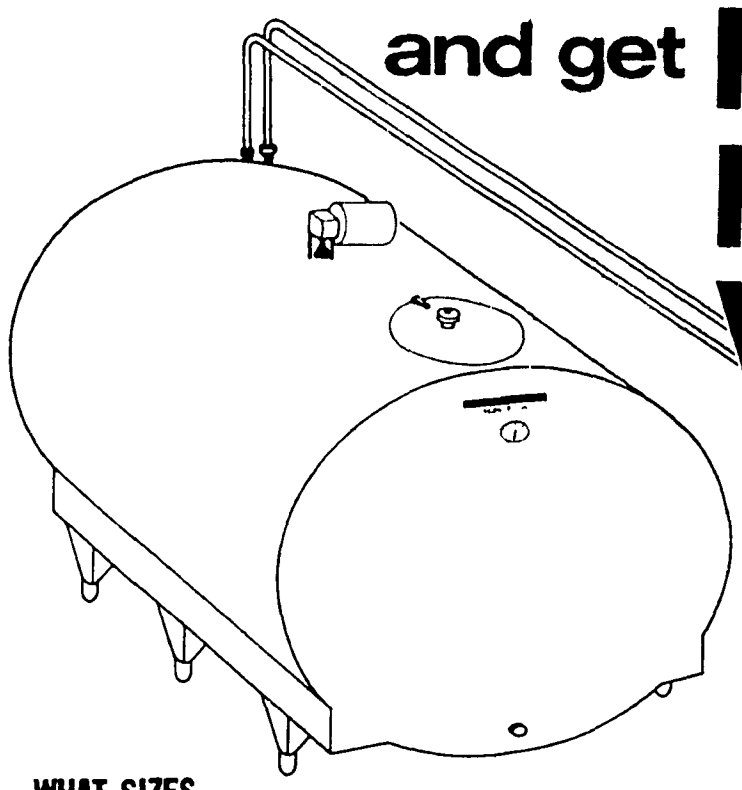
There are many variables, so this question cannot be answered directly; however, a rule of thumb is that a Fre-Heater operating on 60° F. well water will produce a volume of 145° F. water similar to the amount of milk produced during a milking. In other words, if 100 gallons of milk per milking is produced, approximately 100 gallons of hot water (145° F.) will be generated during each milking.

NEW SHIPMENT MUELLER TANKS AND FRE-HEATERS JUST ARRIVED



L. to R. Sam Stoltzfus, Ken Groff, Gid Dienner

Save Energy and get FREE HOT WATER..



MUELLER HIPERFORM® BULK MILK COOLER

WHAT SIZES ARE AVAILABLE?

2, 3 and 4 H P units are available for either HiPerForm or conventional refrigeration systems

The 2 H P. unit normally requires a 120 U S gallon water storage tank and the 3 and 4 H P size each normally require two 120 gallon water storage tanks. (See typical installation diagrams on back)

The Mueller "Fre-Heater" can be used with either the Mueller HiPerForm Bulk Milk Cooler or with a conventional bulk milk cooler.

Grain hearing moved

Individuals and organizations affected by changes in the grain inspection regulations proposed by the U. S. Department of Agriculture (USDA) in the Feb. 12 Federal Register will be given more time to comment, USDA officials announced.

To provide ample opportunity for preparation of data, views, and arguments from interested parties, the comment period will be extended from Feb. 19 to March 4. A public hearing originally scheduled for Feb. 19 has also been rescheduled for March 4.

The public hearing will be held at 9 a.m. on Room 2096, South Building, USDA, 14th Street and Independence Ave., S.W., Washington, D.C. An official designated by the Secretary of Agriculture will receive testimony from those wishing to present their views orally.

xxx

Anger is often more harmful than the injury that caused it.

When Leonardo da Vinci was working on his painting "The Last Supper," he became angry with a certain man. Losing his temper he lashed the other fellow with bitter words and threats. Returning to his canvas he attempted to work on the

Three Grassland FFA'ers discuss agriculture

By MELISSA PIPER

NEW HOLLAND - "FFA - The Future of America" is the theme of this year's National FFA Week which will be celebrated Feb. 21-28th. Three area youths that are particularly involved in FFA work are LaVern Martin, president of the Grassland FFA Chapter, Donald Weaver, State regional vice-president and Lloyd Hoover, State vice-president. All the young men are Lancaster County residents, each of them will be working or are so now in an agricultural field and after this spring, all will have graduated from Garden Spot High School.

LaVern, Don and Lloyd gathered at the high school here, earlier this week to talk about farming, agriculture and FFA. Their comments on the future of agriculture in this country follow.

Commenting on the theme of the bicentennial year's FFA Week, LaVern noted, "there is a certain future for farming but producers will have to put forth a real effort."

LaVern Martin

"Many farmers are just not producing like they should and it doesn't help the world economy," the FFA president explained.

LaVern works for his parents, Mr. and Mrs. Clyde W. Martin, on their East Earl farm. The high school senior is looking forward to a career in dairying.

Explaining his feelings on future agriculture, Lloyd remarked, "agriculture is a big factor in the world situation on the whole."

"We've got to be able to produce to the fullest to keep the world going."

Lloyd is the son of Mr. and Mrs. Elmer Hoover, Leola R1, and was recently named as the state vice-president for Pennsylvania FFA.

Don Weaver is also a state officer, serving in the capacity of eastern regional vice-president, and works on his parent's (Mr. and Mrs. John M. Weaver's) dairy farm in New Holland R1.

Don believes that although the individual farmer has not had too much of a say in the past, he must continue to produce a good product for the future. "Now more then ever, a farmer has to be a businessman and a scientist - we must learn more for the future because it is efficiency that will count."

All three of the FFA members were concerned about the marketing aspect of agricultural products and were in agreement that more could be done by collective bargaining.

"Farmers must group together for pull," Lloyd stated, "price setting is getting away from individual control but in groups - such as coops - it is easier to put up a demand."

LaVern noted that in the past, farmers had been unwilling to join co-ops or marketing groups as they wanted total independence.

"Now, farmers are realizing that they cannot just get by by themselves it takes cooperation and people working toward the same goals."

Echoing his thoughts on marketing, Don stated, "farmers will probably never go on strike because they seem too kind-hearted."

Lloyd Hoover

"The business world strikes as the least labor or pricing problem but farmers are really at the mercy of the middlemen and marketing officials."

Although the FFA'ers are still young, each is interested in improving the marketing situation for farmers. Lloyd, who works in agribusiness, referred to his position on the marketing of commodities. "Too often the middleman adds to expenses but doesn't add any quality to the product," he remarked. "It is a facet of our system to have middlemen but I think direct marketing is better if prices are to be realistic."

Don, who along with his father, is contemplating a milk retail store to ease their personal marketing situation, also delivered his thoughts. "Small farmers can't really skip the middleman for an individual farmer has little say, but this is where co-op again play an important role."

FFA helping consumers learn

Many farm organizations are finding out just how important communication with consumers is and the youths expressed their satisfaction at FFA's attempts.

"I really believe that FFA is doing a good job in keeping the consumers informed," Lloyd interjected.

"Our programs in the elementary schools have gone over well and it is extremely important for young people to learn about food production and agriculture at an early age."

LaVern, Don and Lloyd are three of many FFA youths all across the country. For their age, they are well informed concerning agriculture and are hopeful of a future in farm productions. Each praised FFA for its help in their personal development as well as insight into farming and agribusiness.

Don Weaver

While their comments differed in some respects, each of the three youths noted that the knowledge they had gained from FFA would be used throughout their adult life.

"FFA gives you a purpose in life and a self - identity that so many young people lack," Lloyd explained.

"FFA has prepared us to meet goals - the ideals we set for ourselves and for our peers."

Solanco

Continued from Page 1

The hardest part of the whole venture had been getting a good even stand, according to the Solanco FFA'er. "I had to really be careful when planting and it took a longer time," Hershberger noted.

"Although we plant a lot of corn each year, this one acre took a whole lot of time and effort."

Dan is a sophomore at Solanco High School and a second year member of the FFA chapter. Along with his corn raising projects, Dan has a small dairy operation with five Holstein heifers and cows.

One of his favorite projects has been with the Solanco pheasant egg service and the youth has sheltered and incubated numerous quantities at his home.

Dan has also served on the community service project committee and has been a member of the state FFA Band.

Along with his FFA work, Dan is an active member of the Mechanic Grove Church of the Brethren youth group and spends much of his free time working on his parent's farm.

Twelve other members of the Solanco FFA participated in the contest and were recognized for their acre yields. Honored in the 175-200 bushel per acre class were Les Hershey, Bruce Kreider and Richard Drumm; 150-175 acre class - Ron Clark, Randy Ranck, Dave Cunnigham, Marshall Trimble, Joe Overly and Joe Winters. Tim Hanks and Tom Galbreath were recognized in the 125-150 bushel class. Jim Krantz also placed with 120 bushels per acre. Ron Althoff, Arba Henry and Dr. William Fredd were in charge of the chapter's contest.

Dan Hershberger (right) accepts a trophy from Ron Althoff, ag instructor at Solanco High School. Hershberger was the top one acre corn grower in the state and received the award from the Pa. Crop Improvement Association.

the perfect beginning...

Valuable calves need a clean and fast-gaining environment, totally free of disease and those sanitation problems so common to an indoor pen. The calf stall design should make it impossible for a calf to spread disease to other calves.

The New Martin
CALF STALLS

You can do more with MARTIN CALF STALLS to save your calves and be certain they realize their full potential. And you can do all of this most conveniently. Keeping our calf stall clean and sanitary is easier because of the one-piece steel sidewall construction—and the removable floor that lifts out for very thorough cleaning. Each stall comes complete with two buckets for feeding, a chain and a removable metal hayrack.

Place your order now for MARTIN CALF STALLS and know how easy it is to protect all of your valuable calves to give each one a perfect start.

Interstate District 7 officers elected for '76

By MELISSA PIPER

MOUNT JOY — During the annual business meeting for District 7 of the Interstate Milk producers held here on Thursday, officers and delegates were elected for 1976.

Donald L. Hershey was elected president of the Donegal Local, with Arthur D. Wenger to serve as vice-president. Paul E. Garber was named secretary-treasurer. Delegates in the same local were Albert Breneman, Harold S. Brubaker and Luke F. Brubaker. Three alternate delegates were also elected and included Paul N. Brubaker, Kenneth Zurin and Ellwood Zell.

In the Lititz Local, Ray P. Bollinger was named president with Marvin Sauder receiving the vice-presidential post. Nelson E. Martin was elected secretary-treasurer. Two delegates were named for the Lititz area and Galen Crouse along with Earl C. Stauffer will serve in the posts. Alternate delegates were Clyde M. Buchen and Paul S. Horning.

With no further nominations from the floor, the slate of nominees from Lebanon County gained their offices without competition. Donald G. Hoffer was named president with Jay Melvin Brandt elected vice-president and John H. Hartman taking the secretary-treasurer's office. A. Ralph McCrone was elected as a delegate with Arthur Brandt to serve as an alternate.

Daniel Martin, area director for Interstate and president of the PennMarva Association, gave a report on the future prices for milk and noted that prices "had been at an all time high this winter."

Martin noted that the January base price was $10.96 for a 3.5 test milk which averaged $2.08 above the price in the same month last year.

"Our advertising campaigns have worked," the official explained, "as there has been a five percent increase in Class 1 sales over a year ago."

The Interstate producers also learned that the February price for Class I milk would be about $11.86 - the highest ever.

Keynote speaker for the day was Dr. Earl Cook, director of the Quality Control Laboratory in Southhampton.

Cook related the need for strict cooperation between the producer, hauler and buyer to curb outbreaks of disease related to raw milk.

"Problems from milk have lessened quite rapidly over the past years," he noted, "but we still must maintain the best methods of sanitation and cooperation."

Cook labeled pasteurization as the "best insurance policy" against disease and pathogens in milk. "Pasteurization has really helped in getting good milk to our consumers."

"The process is costly, but is needed if we are to retain a good image."

The quality control director praised Interstate's members for having exhibited outstanding records of high quality milk but cautioned against becoming lax in everyday duties.

"Be sure that equipment is in good running condition and is able to handle your needs," Cook advised. "Don't wait until this summer to add milk house equipment when you can see it may be needed now."

Cook repeatedly warned the producers about using growth inhibitors without proper handling of the milk.

"If a cow is treated in one quarter, then you had better hold all of her milk," he stated. "The misuse of drugs can cause serious problems for everyone and it is better to lose a little milk now, then all your milk for a long time."

Cook ended his remarks by telling the producers to protect themselves and others by "locking milkhouse doors." "It probably sounds different," he noted, "but a lot can go on which even you may not be aware of."

"Milk house doors should be locked to keep others out and to protect your investment."

Chester Co. Dairy Day featured calf care

Continued from Page 1

favor of the best of care for calves. He underscored the necessity for good care, as well as the timeliness of it.

The dairy specialist caused a few eyebrows to rise when he advocated the feeding of a high energy drink - "Gatorade," to be specific - to calves which are down with scours. The reasoning behind this is that milk provides bacteria with the best possible medium for multiplying. Therefore, if the calf is infected with pathogens, one step towards making it rough for the bacteria is to take away the milk and replace it with something else which would still benefit the calf. "Gatorade" fits the bill very well, according to Ace. If buying this product in the supermarket is unpractical for some reason, Ace recommends mixing your own. The recipe for a high energy drink for calves is as follows:

Eight tablespoons dextrose, Karo syrup, or honey. (Any one of these three will do satisfactorily). Two teaspoons of salt, one teaspoon of baking soda. Place these ingredients in a one-gallon jug, add water and mix well. The mixture should be made fresh daily and fed at a rate of about one per cent of body weight per day. Feedings should be more than twice a day and continue for about a day and a half. According to Ace this formula will provide the calf with wholesome nutrition, while simultaneously more or less starve the pathogens.

Another important point the dairy specialist made was: "All too often our calf raising facilities are built for us - so it's comfortable for us to take care of the calves in." Vigorously opposed to maltreatment of calves, Ace urged dairymen to think more of the well-being of their future dairy cows.

Going over a number of management procedures one at a time, Ace talked briefly about milk replacers and informed the group that even a low quality milk replacer can do a good job with calves - not the best - but good. The feeding of milk replacers and the results a dairyman sees with them is directly tied to his management, Ace disclosed.

"Cold surroundings never hurt a healthy, well-fed, dry calf in the world," Ace continued. "Cold is devastating only to a sick animal," he added. In attempting to have a calf barn which is the right temperature, Ace cautioned the dairymen to not ever just warm the barn up without taking humidity levels and ventilation into consideration, because it could result in multiplying the problem.

One of the most beneficial things a farmer can do for his calf-raising program is to see to it that each new-born calf comes into the world in clean surroundings and with colostrum from his mother waiting for it. He noted that colostrum contains 10 times the amount of Vitamin A, three to four times the amount of antibodies, and at least twice the amount of protein, fat and other milk solids that regular milk has. Therefore, to take advantage of this milk, Ace recommends feeding it right away - before disease organisms have a head start to enter the calf's digestive tract. He noted that a calf, has no defense mechanisms heat regulatory system UNTIL colostrum is made available to it.

Rather than have the calf try to find its way to the "spigot" and take a chance of it not being found, Ace recommends that the dairyman milk the cow himself and offer it to the calf as soon after birth as possible. What's more, he suggests that the colostrum from the FIRST milking be saved for the second and third feedings because subsequent milkings will not yield an equally nutritious product. He says the calf should drink about one pound of colostrum for its first meal.

While stressing the importance of cleanliness throughout his presentation, Ace admitted it would be impossible to sanitize every phase of a calf-raising program. Nevertheless, he advised farmers to strive for the cleanest conditions possible and added "I would like to see you use the same clean procedures for calves as what you produce milk with."

Organisms need three basic conditions to survive and multiply, which are 1. food, 2. water, and 3. warmth. Ace said that if any of these three are removed from the scene, "then you've got him (the organism) by the tail on a downhill pull."

The elimination of stress factors is of utmost importance, Ace stated. Without that initial colostrum the calf has nothing to produce body heat with nor defend itself against germs. Without the advantage of colostrum the calf is off to a bad start. Add to that dirty and drafty surroundings and the calf is in serious trouble.

With so many different housing plans available for calves, and many of them working satisfactorily, Ace spoke in general terms and touched mainly on the importance of humidity, draft, moisture, temperature and cleanliness. On the subject of humidity in particular, he said that the higher the humidity, the higher the calf losses are likely to be. Cleanliness is important for more than just the calf, Ace explained. A dirty maternity pen, for example, is a likely place for cows to pick up germs in their reproductive tract which later lead to breeding problems. He also noted that the bacteria which cause scours and breeding difficulties are often one and the same.

On the feeding of mastitic milk to calves, Ace frowned upon it for younger calves, but saw no reason to oppose the practice for older calves. He did not advise the feeding of treated milk, however, explaining that the antibiotics could kill beneficial bacteria within the calf's stomach. An explanatory note should be added here in that mastitic milk usable for older calves is the kind which is still normal in appearance.

The discolored stuff with chunks of white cheesy material floating in it is good for nothing. In making these remarks, Ace added a note of caution in that calves fed mastitic milk could spread the disease to other young heifers if they have an opportunity to suck their udders.

Sour colostrum received a favorable evaluation from Ace, and he also acknowledged it is being very well received by dairymen all across the state.

(Continued from Page 1

pay for yours," he told the men from Washington. On another instance, the outspoken individual shouted that cattlemen and packers didn't need Washington to tell them how to raise and butcher cattle. Grabbing himself by the seat of his pants, he said: "If a cattleman is doing something wrong, his bank will remind him!

After the meeting was over, and only a handful of people remained in the smoke-filled arena, McCoy made what might have been the most realistic statement of the evening. "It bothers me that something like this wasn't done six months ago," he began, "all this time there was nothing but general apathy on the matter, and now that it's to come into effect, they're all up in arms about it."

And so it was that Wednesday evening as many farmers and packers openly voiced their opinions while a good many more simply grumbled. The cigar smoke in the room could well represent a cloudy issue and heated tempers.

Just what is the new meat grading system all about? According to Paul Fuller and Fred Williams, USDA men who were on hand to explain the new grades, the new standards would, in effect, increase the number of cattle graded "choice" by 14 per cent. This figure assumes that cattle would continue to be fed the same way in the near future as they were this past year. The "prime" grade would increase from a present 4.5 per cent to 6.6 per cent. The "good" grade, however, would see a drop from 39 per cent to 21. "Standard" cattle would nearly triple. In terms of dollars, it could add up to less money in the cattlemens' pockets. It should be of interest to all cattlemen across the country to see how sellers and buyers react to the change next week. One man predicted a light run for Monday's auction, here, expecting many cattlemen to hold back and see what happens. But he quickly added that in a situation like this one never really knows for sure how people will react.

With lower prices expected for the type of cattle we up until Sunday referred to as "choice" or "prime," it's not hard to understand why cattlemen here are opposed to the plan. Housewives reportedly do not want the change either, and according to many sources, they have nothing to gain by the revised standards. Packers in this part of the country would like to see the proposals scrapped.

But in spite of the opposition — and there is a lot of it all across the country — USDA is going ahead with the plan which it first proposed a year ago. Since that time the Department has received 4549 comments from the public and four petitions which included more than 7,000 names. To say that the issue is still smoldering would be an understatement — it's roasting, and is likely to continue to do so for as long as three years. Court cattles have been fought and another big one came up in Dallas, Tex. on Thursday. The results of it were not known to Lancaster Farming by press time.

Fuller, department head of USDA's market news; and Williams, from the department of beef standardization, both indicated that their Department had considerable support from the beef industry. But they did not deny the existence of opposition. Considering the changes as a whole, 43 per cent of the comments presented to Washington favored all proposals, and each point individually was favored by a large majority, as they put it. Where does support for the controversial proposal come from?

Mostly from big packing companies in the Far West, Fuller and Williams answered. Beyond that, backing has also come from several cattlemens' organizations. Although this report can't verify it, comments were made Wednesday night that some of the exotic beef breeds were pushing for the changes. Whether or not these breeds will benefit was not said, but the one group which should benefit are those who have specialized in selling Holsteins for meat.

The point was made by Williams that housewives will indeed be able to have advantages with the new grading standards. Namely, they will be able to purchase a "good" grade of beef with more reliability than was the case before. The new grades of "choice" and prime" should also be cheaper — in theory at least. The changes in grading are said to be more competitive with each other now while not sacrificing anything on palatability. USDA says the new standards will represent leaner beef with high quality.

The "leaner beef" question is one which is particularly irritating to local cattlemen and buyers. For years they have bred, fed, raised, and managed their cattle to come up with the kind of cuts which USDA is now allegedly "discriminating" against. As stated earlier, McCoy believes this could be detrimental to the industry. A farmer in the audience noted that: "We have been providing the consumers with the kind of beef they want and they're the ones who are paying for it, why change it now?" The majority opinion here was that the industry in this part of the country, at least, is stepping on thin ice.

In pondering the situation, cattlemen (both farmers and packers) questioned USDA's motives, some of the research which was done, and the goals which are to be reached. More than one individual suspected that the changes were made to make more grain available for export to Russia Studies cited by USDA reveal that present highest grading standards require 245 pounds more grain. In other words, the new grades of "choice" and "prime" aren't finished to the degree they used to be. The savings in grain could be exported then. The World Council of Churches was backing this plan, one individual commented.

One of the most objectionable and major points of the USDA proposal which eastern cowboys and packers find difficult to swallow it the part about "yield grading." Carcasses will be graded for quality, the same as ever, and also "yield," which is relatively new to some concers. The objection stems from the fact that the system allegedly discriminates against fat and marbling qualities which had always been thought of as highly desirable. A yield grade of "1" is the best theoretically possible, although most concede it's impossible. A yield grade of "5" is supposedly the worst of the bunch. Simply put, it concerns the fat trimmings which USDA now categorizes as waste and undersirable. The goal is supposedly a leaner carcass. One farmer raised this question: "Does this mean we'll be raising an entire generation of kids who won't know what a good piece of meat tastes like?" In line with this, it was pointed out that restaurant associations and retail super markets were against the new proposals. Ironically, many of them had actually been hoping for a grading system which would have gone in the opposite direction.

The man who was getting the most criticism for the proposal - even though he was not present in person - was John Pierce, head of USDA's livestock division. He's supposedly the man who cooked up the idea of revising the meat grading system. Marshall likened the new grading system to changing Chevrolets to Cadillacs in name only without changing anything else, and pointedly critized and questioned USDA's and Pierce's knowledeability. "Pierce is playing with his toys and he wants everyone to play his way, and if we don't he will take his toys home," he said disgustedly. His remarks often generated laughter, nods of agreement, and mumbles.

According to USDA, 85 per cent of the meat which is now quality graded is also yield graded anyway. The Department has had the program since 1962 and in Williams' words, it's been "coming on like gangbusters since 1965." That argument didn't seem to convince too many. Again and again, the practical, dollars and cents side of the question was brought up. Marshall asked: "Will this put any dollars in the producers' pocket?" The indication was yes - due to reduced levels of grain feeding, but this was questioned since beef prices could drop as a result of a higher concentration of animals making grade "choice" or "prime." Farmers for the most part said little openly. There was a lot of grumbling going on, which could be taken as dissatisfaction. And yet there was also a lot of misunderstanding as quite a few admitted they don't really understand what was explained.

Marshall suspects that the new regulations are something "this industry cannot live with." According to him, the meat business may very well "turn full circle" to what he had 30 or 40 years ago when three or four large companies dominated the scene. The small companies, in his opinion, will not fare well under the proposals. "This can't be done to help anybody - consumer, feeder, butcher, buyer, packer," he exclaimed.

Besides the lower rate of grain feeding, a cattleman's feed program is not expected to change. At least not at first. McCoy made the observation that the new regulations first surfaced when corn prices were so high. But now, with lowered prices, they're out of place and he thinks that feeders in this area, who generally go for high quality finishes, will not fare as well because of it.

"I don't think we should legislate this kind of thing," he remarked, "but it appears imminent and the question is "where do we go from here as an industry?"

FFA'ers in corn contest

Order 2 on 'collision path'

SYRACUSE, N.Y. — "Proposals calling for a reduction in the blend price (for milk) during these inflationary times simply are not acceptable to producers in the New York - New Jersey Federal Milk Marketing Order 2 area."

Arden Tewksbury, President of the 8000 dairy farmer member Eastern Milk Producers Cooperative, made this statement while testifying on proposed changes in Order 2, during a public hearing in New York City, on Wednesday.

"Those proposals dealing with price adjustments, which Eastern believes will result in a reduction in the blend price to milk producers ranging from 15 cents to 30 cents per hundred pounds, could be disastrous to the producers in this milkshed," charged Tewksbury.

The Co-op leader further stated that such price adjustments are a deviation from the fundamental concept of farm-point pricing which Eastern Milk Producers has long defended.

He explained that when a dairy farmer sells a ton of hay or a dairy cow, the buyer purchases it directly at the farm and pays whatever transportation costs are associated with the sale. By contrast, when a dairy farmer buys feed or an automobile, he pays the transportation costs delivered to the farm. Therefore, Tewksbury concludes, this fundamental principle should also apply to milk.

The Meshoppen, Pa. dairyman further stated that a reduction in the New York - New Jersey Order blend price will further aggravate and distort the milk price mis-alignment between Order 2 producers and producers under adjoining Federal Milk Marketing Orders.

In his concluding remarks, Tewksbury urged that some approach be taken to provide for better equalization of prices between producers shipping to various markets in the northeast. In conjunction, he recommended an approach to prevent further deterioration of cooperative membership in Federal Milk Marketing Order 2.

"With the downward trend in membership of the cooperatives who are responsible for the representation of producers in the functioning of the Order, and with the possible adoption of the proposed amendments dealing with price reductions, this milkshed, in my view, is on a serious collision path," stressed Eastern's president.

Eastern is a multi-market cooperative marketing its members' milk in five federal milk marketing orders as well as a number of non-federally regulated markets. Eastern has approximately 8,000 members within Federal Order No. 2.

Traders - slapped

WASHINGTON — The Commodity Futures Trading Commission has upheld the decision of an administrative law judge who ordered a Chicago commodities firm and its owners to cease and desist from filing incomplete or inaccurate reports with the Commission and to be prohibited from trading on futures markets for seven days.

Pacific Trading Co., Stephen J. Klemen, Jr., and Raymond S. Beck, all of 141 West Jackson Blvd., Chicago, had appealed to the Commission the Decision and Order handed down by Administrative Law Judge William J. Weber after an oral hearing in Chicago on a complaint filed by the Commodity Exchange Authority (CEA), predecessor of the Commodity Futures Trading Commission.

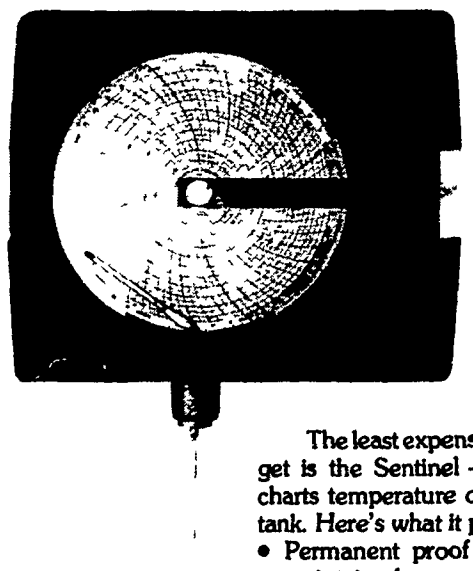
WHO'S MINDING THE MILK?



If you depend upon your milk check for a living, who's minding your milk?

The least expensive, one-shot insurance you can get is the Sentinel — the 10-inch recorder which charts temperature of your milk-cooling or holding tank. Here's what it provides:

- Permanent proof that proper temperature was maintained
- Record of cooling equipment efficiency.
- Cleaning temperature recording on the same chart.

The Sentinel is also available with provision for actuating an alarm or warning light if pre-set temperature is exceeded

Remember — if it prevents the loss of only one tank of product, the Sentinel has paid for itself. It minds your milk.

Zoning causes problems for 4-H

By DIETER KRIEG

STRASBURG — The question of whether or not a family living in a small town, zoned residential, may be allowed to keep 4-H steers on their premises was brought up here last Monday night at a zoning board hearing when Mr. and Mrs. Rome Howell, Refton, registered their opposition to the proposal, while Mr. and Mrs. Adolf Frey, also of Refton, defended the idea.

The Freys are the parents of Bonnie Sue Frey, the 11-year-old 4-H'er who earlier this year exhibited the reserve grand champion steer at the Farm Show. According to testimony presented at the hearing, the Freys were keeping two steers on their two acres of property last year against the wishes of some of their neighbors. The conclusion of the Farm Show marked the end of the Freys' having steers in Refton, but another show season is coming up this year and the Freys don't want to be left out. Hence the squabble over whether or not large animals can be kept in a residential area. Present regulations limit the animals that a family in Refton may keep to three cats, two dogs, and a dozen pigeons. An exception to the ruling is being sought by the Freys; the Howell family wants present zoning regulations enforced.

Last year the Freys kept two steers on their property even though only one was a 4-H project steer. The other animal was merely a "buddy steer," it was pointed out. The intention for the 1976 show season is to have two project steers — one for each of the Frey girls who are both interested in 4-H work. The keeping of the steers would in all likelihood be disallowed by the zoning board if they were being kept for commercial purposes. However, several of the approximately 20 people present stressed that 4-H project steers are of educational value and an exception to the ruling could be granted on that basis.

The proceedings inside the township office crackled with emotions from time to time and voices were raised more than once as opinions and questions were heard.

The zoning hearing board consists of Ronald Straley, a technician for RCA; Raymond Witmer, Guernsey breeder and dairyman; and Robert J. Winters, teacher, farmer and chairman of the zoning hearing board, (ZHB). Also present was J. Robert Hess, chairman of the Strasburg Township Planning Commission.

Following are some of the questions and pros and cons presented at the hearing:

ZHB: "Would the disposal of wastes be a problem?"

Frey: "I would say no." He went on to note that manure would be removed from the premises once a month or so and hauled out to a farm. Further testimony was presented that two steers "don't make that much of a mess" — possibly a total accumulation of only 500 to 1,000 pounds for the season. At this point the attorney for the Howells, Frank C. Chesters, asked how often he cleaned the premises last year. "Twice," Frey responded.

A resident of the area for nearly three years, Frey moved in after the present zoning ordinance was passed. He allegedly kept last year's steers there in violation of the ordinance although a verbal agreement was reached between and his neighbors that the animals could be kept in the back yard until the end of the show season. Mrs. Howell indicated that in spite of this agreement, the Freys violated it on three counts. First registering her objections on the matter last July, she was instrumental in eventually having other neighbors in the community join her. A list of people who oppose the idea of having steers in Refton has reportedly been drawn up and made available to township officers. But since no one could make that list available on Monday night and the people who allegedly signed it weren't present either, Strasburg Township Solicitor, Jim Thomas, refused to accept this argument. That decision will be appealed. In a similar proceeding, Mrs. Frey noted that many residents in Refton had either called or written her to apologize for their original opposition when they learned that Bonnie Sue's steer was chosen as the second-best one in the entire state of Pennsylvania. In view of the fact that Mrs. Howell's list of names could not be accepted at that time, Thomas disallowed Mrs. Frey's statement from the record as well.

When Mrs. Howell insinuated that Mr. Frey did most of the work with Bonnie Sue's 4-H steer, both defendants and several others in the room voiced strong objections. To begin with, noted both Mr. and Mrs. Frey, a child's 4-H project is an educational experience which requires guidance and supervision from parents. Elvin Hess, 4-H club leader, added: "We find that in 4-H club work, if we have parents who really work with that youngster and help, the club member will do well. If the parents aren't interested, then the child isn't likely to succeed."

Commenting on Mrs. Howell's specific accusation that Mr. Frey walked Bonnie Sue's steer along the street on numerous occasions, Elvin Hess explained that exercise is vital if the animal is to be a winner. He noted that the grand champion steer for 1976 was walked five miles each day for several months. "You can't expect a steer to do anything penned up — he must be out, especially at night to grow a good coat of hair." As to Mr. Frey's leading of the animal, rather than Bonnie Sue, Hess said: 'You can't expect a little girl to lead a steer, the parents have to break the steer first."

According to statements made at the hearing, Mrs. Howell's primary objection appeared to be the odor problem, which for the most part was denied by the Freys. Mr. Howell, however, flatly stated that the odor problem was "immaterial." He built his case on the fact that Refton is zoned to exclude large animals and he wants the ordinance to stand up. "If you allow large animals to be kept in this case," he argued, "how are you going to say no to the next one. Some of us moved away from farms to get away from it all and now we have it in the village. I spent 30 years on a farm and know the conditions — now we're getting them in the village."

Later, Howell quietly observed that "4-H is a very good thing — but not in the village." His wife added that the Frey children are normal and healthy and the steers were not, in her opinion, vital to maintain their good health. Opposed to their keeping of large animals, she hinted that the Frey girls could, perhaps, enter other 4-H club work which would not bother surrounding neighbors.

Mr. Howell at one point revealed that the zoning ordinance once prevented a garage business from going into operation and charged that if it couldn't pass, then the 4-H project shouldn't either because "there was no difference."

Strasburg Township Planning Commission chairman, J. Robert Hess, then rose to vigorously oppose that statement on the grounds that the body shop would have been commercial while the 4-H projects are educational. "I believe the exception here would be permissable according to the rules," he concluded.

Howell countered with: "I agree with most of what you said, but the question is, how far do we carry it? If this is passed, can anyone keep large animals in Refton?

Aside from Mrs. Howell's basic objection to the animals because of odors, and Mr. Howell's contest that the issue is centered around the fact that Refton is zoned against large animals, the Frey's opponents also questioned:

1. Sewage seepage due to two steers being kept on two acres of ground; 2. The safety of others in the community; 3. The feasibility of the Freys keeping their steers at a nearby farm; 4. Whether or not other communities have large 4-H animals within their borders; and 5. whether or not Frey would be willing to remove manure from the streets if his animals were responsible for the mess and assuming that permission to keep them is granted.

The sewage issue was struck down in short order by William Dean, Strasburg R1 farmer, 4-H club leader, and former sewage official in Refton. He said that Refton's sewage lines have been inadequate and more odors would come from them than the steers. The Freys added that their animals were definitely not creating a seepage problem.

As for the safety problem, Frey noted that he has his lots fenced in and the animals never broke loose. When walking along the road, an adult is always accompanying the animal. Dean again took the floor when the possibility of keeping the steers at a nearby farm was brought up. He said: "Keeping steers at an adjacent farm is a deterrent to effectively working with and completing the project." In other opinions, he praised 4-H club work as giving youngsters a guiding step in the right direction for their future.

Both Dean and Elvin Hess acknowledged that other communities within Lancaster County have had residents who kept 4-H steers on their premises. Neither, however, could answer Howell's question as to whether or not these towns were zoned.

A ripple of laughter went across the room when Frey was asked if he would be willing to clean up after his steers if they deposited a mess on the road, and he answered: "I don't know, how about the horses which come through town?"

In concluding testimony, Frey indicated he would be willing to get along without a vacant, fenced-in lot across the road if that's what's causing the problem. When Thomas asked if he (Frey) would be willing to comply with all other points of the zoning ordinance if special permission were granted here, Frey said: "Yes I would." The Howells' attorney suggested in his final remarks that if permission to keep the steers were granted, the waste material should be removed at reasonable intervals; the steers should be kept in the back yard and not in the front yard as Mrs. Howell said they were; an adult should always accompany the steer when it is being walked along the street; and anything else about the steers objectionable to the community should be taken care of also.

The ZHB has 45 days to act on the matter. If no decision is made by that time, permission will have been granted automatically, Thomas said.

Pesticide researcher honored

DENVER, COLO., — Dr. James L. Hilton, chief, pesticide action laboratory, Agricultural Environmental Quality Institute, Agricultural Research Service U.S. Department of Agriculture has been selected to receive the Seventh Ciba-Geigy-Weed Science Society of America Agricultural Recognition Award.

Hilton has been a researcher with the U.S. Department of Agriculture since 1956. His research work has involved the modes and actions of various herbicides in the soils. His research efforts have included studies of dalapon, trifluralin, simazine and the uracils.

A native of Bristol, Tennessee, Hilton earned an AB degree in botany from Duke University in 1952 and a MS and PhD in plant physiology from Iowa State University in 1955. He joined the USDA in Raleigh, N.C. in 1956.

As the award recipient he will receive an expense paid trip to Europe where he will visit various agricultural business and production facilities including Ciba-Geigy's world headquarters in Basle, Switzerland.

"Let us never forget that the cultivation of the earth is the most important labor of man.

CBOT explains futures market

For the modern farmer, understanding and using the futures market can sometimes spell the difference between a profitable year and a very disappointing one.

In the following article prepared by the Chicago Board of Trade, the origins and workings of the world's oldest and largest existing commodity futures market are described. Also, an explanation of how farmers can use it and similar trading exchanges is provided . . .

Commodity trading as an important marketing function developed near major U.S. farm production areas in the early 1800's. Farmers, eager to sell in the city where they could get a higher price, found that prices for staples like wheat and corn fluctuated widely due to glut at harvest time and scarcity later in the year. Grain marketing was a "curb-to-curb" operation, a system of grain standards was unknown, and unsold grain often lay in streets until it spoiled.

To improve this marketing system and to promote commerce, 82 Chicago merchants established the Board of Trade of the City of Chicago in 1848. Facilities for grain display — today our cash or "spot" market — were provided and regular trading hours set up. Shortly after its formation, the Board established standards for wheat and began weighing and inspecting grain.

Today the Chicago Board of Trade provides futures markets in wheat, corn, soybeans and soybean products, oats, iced broilers, and several nonagricultural products.

Operating under strict rules within specially designed facilities, members buy and sell for themselves or as representatives of companies or as agents for individual customers, such as farmers.

The futures market as it's organized today didn't exist when the Board of Trade opened its doors, and forward contracting was only used outside of the Exchange.

For example, when storage facilities were full, it became common to buy grain "to arrive" in Chicago on a set date at a price agreed upon when the contract was signed. Vessels entering the harbor could then be loaded from stocks already in Chicago or from grain contracted for forward sales.

The General Rules of the Chicago Board of Trade, adopted in 1863, contained the first reference to "futures contracts." In the rules were provisions related to deposits by buyers and sellers to assure contracts, procedures to follow if a person failed to deliver or accept delivery of a commodity, standardization of delivery, and terms of payment.

"Futures" became legally binding contracts which called for the holder to buy or sell a specified amount and quality of a certain commodity on a given future date at a price agreed upon at the time of the trade.

By 1875, futures trading had gained substantial momentum, and buyers and sellers used futures contracts to hedge inventories and earn carrying charges.

As for today's farmer, higher production costs from land, machinery, fuel and fertilizers make it necessary for him to have a means to protect his large investment and make a profit. The futures market provides one of the means toward this end.

Farmers are familiar with forward contracting, usually with their local elevator. In this transaction, the farmer doesn't deal directly with the futures market, but with an individual. A forward contract is a cash transaction in which buyer and seller agree upon delivery of a specified amount and quality of goods at a specified future date.

While forward contracting has proven successful for many farmers, it can be a very inflexible arrangement, as any farmer who has needed to get out of the contract knows. The charge for releasing him from the contract is usually any change in price that has taken place, plus a penalty for breaking the contract.

The futures contract, on the other hand, can be cancelled by an offsetting trade. That is, if his first trade is a sell, a farmer can offset it with a buy of an equal amount of the same commodity for the same delivery month. Similarly, if his first trade is a buy, he can offset it with a sell.

With the futures contract, the farmer can tell his broker to make an offsetting trade — and the trade can be made with anyone represented in the "pit" at the futures exchange. Thus, the farmer has ready access to many buyers and sellers.

The cost of getting out of a futures contract, unlike a forward contract, is limited to whatever change in price has taken place between the original trade and the offsetting trade — plus the broker's fee.

Futures trading helps protect the profits of both commodity producers and users through a mechanism called "hedging." This involves taking opposite positions in the cash and futures market, hopefully to prevent or minimize a loss due to price fluctuations. The hedger attempts to shift the price risk of ownership to the buyers of futures contracts.

For commodity users, flour manufacturers, for instance, futures trading is a purchasing tool that helps them fix a price for products that will be sold at a later date. Growers, meantime, use futures to fix a crop price before or at harvesttime.

Both cash prices and futures prices tend to move in concert with one another and merge as the contract month approaches. This is because the supply and demand factors that create the prices in both markets theoretically become identical at the time of the actual delivery.

The difference between the cash price and the futures price, called the "basis," makes hedging possible. At any given time, this price relationship may vary. For example, an elevator that normally pays 40 cents below the Chicago futures price may pay 35 cents less if it needs the grain immediately. Or it may offer 50 cents below Chicago to signal that it does not need grain. Or, if cash buyers need grain that has been stored, they may temporarily bid the cash price higher than the futures price, which brings more grain into the cash market.

Using these temporary changes in price relationships, a farmer can buy or sell when it's to his advantage.

The "selling hedge" is used by producers to protect the value of their existing inventories and to earn a storage return if possible.

The hedger either owns or buys the actual commodity, and at the same time sells an equal amount of it on the futures market. In this way, an adverse price move up or down will be offset by a corresponding favorable price move in the other market.

Here's how a selling hedge might work:

A farmer harvesting about 10,000 bushels of wheat examines past cash and futures prices to determine typical patterns. He calculates his production costs per bushel and decides that $3.79 a bushel would yield an acceptable profit.

His local basis price usually runs 8 cents below the Chicago futures price in December. The Chicago price for wheat for December delivery is quoted at $3.87.

By selling his 10,000 bushels on the futures market, the farmer can lock in a price he feels will be profitable. If by December 1, prices fall 5 cents in the cash market and 3 cents in the futures market, his transaction looks like this:

CASH	FUTURES
Sept. 1 Owns 10,000 bu. of wheat; hopes to sell at $3.79	Sept. 1 Sells 10,000 bu. of December wheat at $3.87.
Dec. 1 Sells 10,000 bu. of wheat at $3.74	Dec. 1 Buys 10,000 bu. December wheat at $3.84 to fulfill the Sept. contract.
difference: $0.05 gain: $0.03 net difference with hedging: $0.02 per bushel	

By hedging, the farmer missed his price objective by 2 cents a bushel. Had he not hedged at all, his returns would have fallen 5 cents below what he anticipated.

Processors, exporters, and other commodity buyers use hedging much the same way — in their case it's called a "buying hedge" or a "long hedge" — to protect themselves against price fluctuation.

This "two-market" aspect of commodity buying is what separates hedging from speculation. Holding futures contracts that aren't covered by an actual commodity isn't true hedging, and radical price changes could translate into sizable losses or gains. Likewise, the farmer may be more vulnerable to price changes if he holds his harvested crop without price protection.

Farmers who want information on futures markets and hedging can contact county extension agents, rural bankers, nearby State landgrant colleges, commodity brokers, or any commodity exchange.

Off the Record

If you're the kind who doesn't like to fly in airplanes, remember, the pilot wants to land just as safely as you do. Why not plan a lot of vacations—planning them doesn't cost anything. One waiter in town says he serves a lot of nuts—his customers. But then one of the world's most uncommon attributes is none other than common sense.

Business Opportunities

SELLING AGRICULTURAL SUPPLIES AND PROVIDING SERVICES CAN BE REWARDING AND PROFITABLE.

Farm background helpful but not necessary. Complete training is provided. Use your spare time to develop your own business supplying area farmers with a complete line of field seeds, chemicals, silage fermentation products, herd health products, soil and forage consultation and testing.

Additional products are being added regularly.
No capital outlay necessary.

We are expanding in Pennsylvania and areas of New Jersey, Maryland, West Virginia, Ohio and southern New York State.

7H285 COMET

WOODBINE PEARL COMET 1516004
Excellent (90) Gold Medal 5-73

"COMET" has earned the Gold Medal award based on his sensational ability to combine high production with outstanding type. His daughters are well balanced cattle, with great width and depth of fore rib. They are quite stylish with straight toplines and long, level rumps. He is perhaps the best bull at SELECT SIRES in terms of ability to sire high wide rear udders. Additionally, the udders are correct elsewhere with proper teat placement and milk-out. Legs are correct with a slight set to the hock. COMET'S dam was a beautiful, high producing cow, and is definitely one of Ivanhoe's greatest daughters. COMET should add style, general appearance, and high production to your herd.

His Daughter

Fay-Ark Major Comet Micky [EX-91]

TWENTY YEARS OLD AND STILL GOING STRONG

Twenty years ago, no man had flown in space a gallon of gas cost about 25¢ and a gallon of diesel about 15¢, the average corn yield was less than 45 bushels per acre And the New Idea manure spreader shown below was doing a dependable job, day after day

A lot of things have changed since then But that 20-year old spreader is still going strong Because, like all New Idea spreaders that old-timer is quality through and through

You can buy even better quality today Quality extras built-in for long life excellent performance and reliability as you've come to expect only from New Idea

Ask any farmer who owns a New Idea spreader He'll tell you it s the best you can buy Why? Because we build em right Just check out some of the extra-strength features and reasons why a New Idea will save you time and money

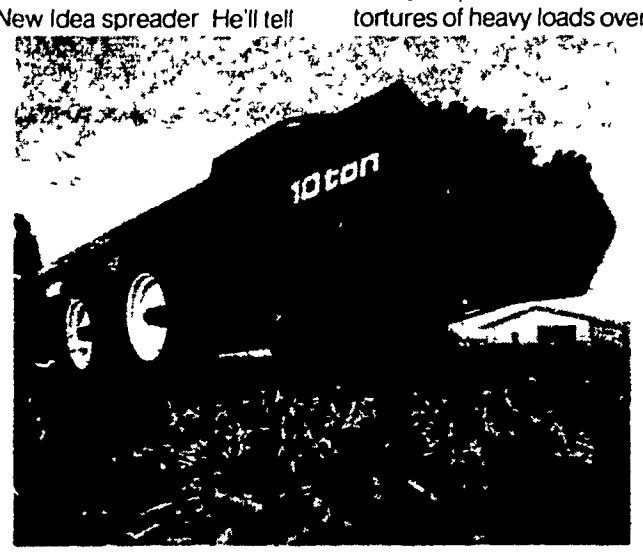
OUR WARRANTY ON ALL SPREADERS is the best in the business bar none! You get a full-year warranty on the entire machine The heavy-duty conveyor system on our 8-1/2- and 10-ton heavyweights (optional on other models) is backed against breakage with a full two-year warranty Lifetime Warranty on Wood That s proof of real quality!

UNIQUE CHOICE OF SPREADING ELEMENTS—On our Single Beater, paddles are up to twice as thick as some others The Cylinder/Paddle models shred finer and spread wider than any other spreader on the market The exclusive Flail-type is excellent for pulverizing frozen or hard-packed manure

BALANCED DRIVE including a precision gearbox designed and tested for long life Five unloading speeds are a match for any spread rate

ALL WOOD SIDES AND BOTTOM are Penta-treated to preserve the wood for the life of the spreader Lifetime Warranty on Wood, too! Extra heavy-duty steel flair sides resist the slam and bang of loading operations

STRONG, WELDED A-FRAME HITCH that takes the strains and tortures of heavy loads over your fields



These are just some of the features to show you our spreaders are designed to perform better and last longer Load after load year after year And we've got 11 models—just the right type and size for your farm Whether you've got 50 head or 500 head and more Choose a Flail, Cylinder/Paddle or Single Beater From 138 to a huge 365-bushel capacity Plus a number of optional attachments like an upper beater, and a hydraulic or mechanical endgate or manure pan to handle sloppy manure

So, if you're still looking for quality you can count on, you can always count on New Idea That's why you see so many around

Lancaster County corn growers place one-two in state contest

Glenn E. Burkholder, Washington Boro, won first place in the Pennsylvania Non-Irrigated Corn Yield Contest conducted by the National Corn Growers Association, Boone, Iowa, with a yield of 159.77 bushels per acre, the association announced recently. First place in the Irrigated Contest in Pennsylvania went to John R. Rodgers, Belleville, with a yield of 110.69 bushels per acre. Contest fields had to be at least 25 acres.

Melvin L. Shertzer, Millersville, took second place in the Non-Irrigated Division with a yield of 158.52 bushels per acre.

Third place in the Non-Irrigated Contest went to Gerald Shoop, Milton, with a yield of 147.64 bushels per acre.

Walter H. Hasselbring of Watseka, Illinois set a new national corn yield record with a yield of 288.82 bushels per acre in the Non-Irrigated Division. This yield broke the previous record of 267.45 bushels per acre held by Loyd Hall of Illinois, set in 1973. The highest ever attained in the Irrigated Division was set by Harold Clark of Texas with 263.88 bushels per acre in 1974. In the Irrigated Division, Wayne Clark of Dumas, Texas, placed first nationally with a yield of 241.13 bushels per acre.

More than 1000 entrants from 46 states competed in the Non-Irrigated and Irrigated Contests for the top three national trophies awarded in each contest and the European trips that the winners and their wives will receive from Shell Chemical Company, producer of Bladex corn herbicide. The 1975 Irrigated Contest had 22 entries with yields of more than 200 bushels per acre and in the Non-Irrigated Contest 14 were over 200 bushels per acre.

National and state winners will receive their trophies and awards at the association's Annual Meeting at the Crown Center Hotel in Kansas City, Missouri, July 14 & 15.

Min-till gaining ground

Minimum tillage is America's "fastest growing conservation practice," USDA's Soil Conservation Service reports. It was used on a total of 35.8 million acres last year, according to a report of 100 conservation practices tabulated in Soil Conservation magazine. That's up 2.6 million acres from 1974 and nearly double the 1970 total.

FARM CREDIT HELPS GROWING FARM FAMILIES

The needs of your family are never-ending. Equipment. Home appliances, Feed and seed and fertilizer. Doctor bills, College educations. Trucks and tractors. Remodeling the house.

The people at your Production Credit Association understand farm families and their special needs. After all they've been working with families like yours for nearly 40 years. They work with you to help you reach your goals. And it's good to know that you believe in constructive credit . . . the kind that helps you get further ahead instead of deeper in debt.

So the two of you don't have to go it alone. Not when there's a PCA man who's a real professional when it comes to helping farm families like yours.

WE SALUTE THE FUTURE FARMERS OF AMERICA

AGSTAR
FARROWING EQUIPMENT
CUT BUILDING COSTS;
HELP WEAN UNIFORM LITTERS

AGSTAR farrowing equipment can add up to a less costly installation, more comfortable sows and pigs, more pigs weaned per litter.

New space-saving front door design can save 2 feet on building width . . . many dollars per sow in building cost. Choose from 5 optional doors, including manual or space-saving adjustable feeders, manual or automatic nipple or cup waterers. And select from rod-type or draftfree solid pig panels at the sides. AGSTAR flexibility fits virtually any installation need . . . economically.

If you're thinking about farrowing equipment, you owe it to yourself to get the facts on AGSTAR.

Farm Women Donate $25 To Chest Board

The Society of Farm Women 1 voted to donate $25 to the Lititz-Warwick Community Chest at its meeting on Feb. 7.

It was announced that Farm Women will be going to the Philadelphia Flower Show on Tuesday, Mar. 9. Tickets are $8 and include the admission fee. The bus will leave from Ephrata at 7:30 a.m.

Reservations may be made by contacting Mrs. Daniel Brubaker, 733-7425.

Wood Ticks

We continue to get phone calls from people in the county who find their house, or in many cases the quarters of their dogs, or cats, infested with wood ticks; these pests were quite bad last fall in some areas and will continue to be active in heated buildings. We suggest a good clean-up job with disinfectants being used plus the spraying of the room with sevin or an aerosol Chlordane household spray. If they are in the furniture, then the pieces should be either fumigated or sent away for thorough cleaning. Dogs and cats will no longer be bringing them into the house because ticks are not active this time of the year outdoors; however, if they are still on pets, and animal should be given several treatments with a 5 per cent sevin dust. Wood ticks should be eliminated when discovered, because they may infest human beings and could cause Rocy Mountain Fever.

Receiving certificates of merit at ABC's District 6 meeting were, seated L. to R.: David Stewart, Robert Smyser, Eugene Kilgore, Herman Stebblins; standing: robert Stewart, Curtis Thompson, Earl Fuhrman, Tom Boyer, and Robert Mays.

York dairymen cited

Ten York County area dairymen were honored for having high producing herds this past year at the twelfth annual District Six Meeting for Atlantic Breeders Cooperative members held February 12 at the Dover Fire Hall.

All herds were at least 15 per cent above the state average for butterfat last year, while at least two-thirds of the cows in these herds are progeny of Atlantic sires. The awards were presented by Robert Keller, Atlantic's Field Supervisor for this area.

Reports by District Six Director Herman Stebbins of R4, York, Pa., and management representative Willis Ritchey, Lancaster informed members that 1975 was a very successful business year for Atlantic. The service program was updated with the entire area divided into 66 units and all farmer-members can now use WATS numbers to call toll-free for AI service. Atlantic sires maintained their rating among the nation's best for transmitting profitable traits, Ritchey said.

Solanco corn growers awarded blue ribbons

Also receiving corn awards were (Back row from left) Tim Hanks, Dave Cunningham and James Krantz. (Front row) Randy Ranck and Ron Clark.

Included in the high ranking corn yields were Bruce Kreider, Richard Drumm and Les Hershey. The youths were in the 175-200 bushel per acre class.

College living — making yourself at home away from home

Imagination is the keyword in making yourself feel at home while you're away at college.

Many students believe that being hundreds of miles away from home is going to be a lonely experience. With some of the tips we've offered in previous articles, however, and with a little imagination, your room, apartment or house at college can be nearly as comfortable as your home.

First, you should consider what comfort means to you. For some people lots of cushions thrown on a pile in front of a fireplace or in a corner accented with lights creates a very relaxing atmosphere. For others a windowsill of plants can add just the right touch for a homey room. When you have considered the things you like best you can start acquiring those items or arranging them in the most suitable manner.

You needn't spend a lot of money on creation of your new "home," either, because some of cheapest and easiest materials to obtain can be turned into real assets for your living quarters.

Consider for a moment what a pair of matching curtains, bedspread, cushions and bureau scarves would cost in a department store. With a little imagination and some time you can make all of those things out of two or three printed bed sheets available for a few dollars.

An old wooden fruit crate can be turned into an attractive bookcase; a tree stump can become an end table and a large flag or poster can hide cracked walls and add color and personality to your new home at the same time.

It's a good idea, too, to bring something familiar from home. If you've grown up with the same lamp beside your bed you may want to take it to college with you along with a favorite painting, a family photo album or an old throw rug. All of these items will help you feel right at home even though you may be on the opposite side of the country.

Another good idea, especially if you're living alone, is to adopt a pet. A simple goldfish or a colorful parakeet is easy to take care of and will keep you company during those study sessions alone.

If your resident hall director or landlord has banned pets of all kinds why not show him you are more imaginative by adopting a cactus or another member of the plant kingdom as your special "pet." These "pets" need minimal care and love but will always be there to "help keep you company."

Remember, the keyword to making yourself feel at home away at college is not money, nor a beautiful spacious apartment, nor lots of entertainment - it's imagination. You have it and all you need to do is use it!

For more information on making the college decision, write to: York College of Pennsylvania, Box 1776, York, PA 17405.

Dairymen from ABC District 5 receive certificates of merit

Fourteen Southern Lancaster County dairymen were honored for having high producing herds this past year at the twelfth annual District Five Meeting for Atlantic Breeders Cooperative members held February 12 at United Methodist Church, Quarryville.

All herds were at least 15 per cent above the state average for butterfat last year, while at least two-thirds of the cows in these herds are progeny of Atlantic sires. The awards were presented by C. P. Brantly, Atlantic's Field Supervisor for this area.

Reports by District Five Director James Kreider of Quarryville, Pa., and management representative Willis C. Ritchey, Lancaster, informed members that 1975 was a very successful business year for Atlantic. The service program was updated with the entire area divided into 66 units and all farmer-members can now use WATS numbers to call toll-free for AI service.

Service Technicians provided almost 200,000 first services, and semen sales reached an all-time high. Barns were completed to provide new isolation quarters and house up to 50 more bulls, and young sires were used more extensively than in previous years.

A 25-minute movie, "Dial 800," was shown to help members see the beneficial traits being transmitted by several Atlantic sires. The film depicted a farm situation where an Atlantic member is consulting with a Technician about proper use of bulls for each mating in his herd.

Members present voted for District representatives for the coming year. Election results will be announced in the next issue of the Cooperative's monthly newsletter, since more than one meeting is held in most of Atlantic's 16 Districts.

Members of Atlantic Breeders' District 5 who received certificates of merit recently were, left to right: Bill Longenecker, Oxford; J. R. Ranck, Paradise; Jay L. Ranck, Quarryville; Glenn Book, Strasburg; Lloyd Ranck, Paradise; Donna Akers (for Curt Akers), Quarryville; Henry B. Leaman, Lancaster; J.C. Charles, Lancaster and Aaron Beiler, Paradise.

Corn highlighted at crops day

LANCASTER —. The sixteenth annual Lancaster County Crops and Soils Day passed by last Tuesday with a sizable crowd taking advantage of both morning and afternoon programs. In addition to lectures and discussions on pesticide certification, alfalfa problems and prospects, tobacco disease, weed control, corn and hay production, the event included exhibits from a variety of agricultural companies, with representatives being on hand to answer specific questions from farmers.

Speakers included Extension personnel from the local level as well as Penn State and specialists from both academic and business circles.

In the presentation on corn production, John Weidman from the Pioneer Hi-Bred Seed Co., noted that a farmer has 23 production criteria under his control and that farmers themselves are more responsible for hurting crop yields than weather.

The four management factors which affect yield more than anything else are: 1. planting time, 2. depth of planting, 3. imbalance of soil nutrients, and 4. population, Weidman indicated. The ideal planting days for corn in this part of Pennsylvania are April 25 to May 15, according to Weidman. Even within this 20 day period, a farmer isn't likely to have more than seven or eight days which are fit for planting, he added.

If the ground is fit and soil temperature is right, a farmer should notice very little difference in yields in corn which was planted within the above prescribed period. However, a 10-year study shows that a five-bushel per acre drop can be realized if planting time is between May 15 and 20. A farmer who waits even longer takes the risk of losing 15 bushels of corn per acre.

Depth of planting is critical, Weidman continued, observing that the even depth planter is "the greatest thing that ever happened to a corn planter. "For every inch deeper you go, you'll get less yield," he warned the nearly 200 people present in the Farm and Home Center's auditorium.

Weidman also advised farmers to "know their fields and the potentials of them to match best fields with best varieties of corn." Seed varieties are of utmost importance, especially when one considers the comparatively small share of investment they represent, the seed company official exclaimed. Present costs per acre as far as seed corn is concerned, are around $8 to $10 per acre — "very small in view of the $150 to $200 per acre total cost," he explained.

In conclusion, Weidman stressed the need for the right decisions being made on the part of the operator. "You can add a yield of three to five bushels per acre without any extra cost," he said.

William Brubaker from the Organic Plant Food Co. then took the podium to talk briefly about fertilizer needs. The supply situation looks favorable this year and lower prices are even in store, according to talk heard around the auditorium. Nevertheless, Brubaker's talk centered on efficient and proper use of soil nutrients. The first step in determining fertilizer requirements is, of course, the soil test. Penn State agronomists and industry specialists strongly recommend it.

A corn yield of 160 to 180 bushels per acre requires the following amounts of fertilizer, Brubaker revealed: 220 to 240 pounds of N; 100 pounds of P205; and 50 pounds of K20. If the crop is taken off as silage, then an additional 170 to 190 pounds of K20 are used. Just as critical for good crop production are Calcium, Magnesium and Sulfur, Brubaker pointed out. Soil tests reveal the requirements for these substances to maintain proper nutrient balances.

"The crop needs it, there's no question about it, but you don't have to buy it all," he continued. Crop residues, soil organic matter, limestone and manure contribute to the total soil nutrient picture. Speaking of these criteria and soil tests in particular, the fertilizer spokesman said: "If you aren't looking at these things, you're missing a part of the boat."

A farmer can cut his nitrogen needs by careful soil management and manure applications, Brubaker noted. For example, if a crop needs 240 pounds of N per acre, the farmer might get 40 pounds from soil organic matter, 50 from manure, and 40 from alfalfa sod. Planting corn after corn year after year might still only require the purchase of 150 pounds of N per acre to achieve a 180 bu. per acre yield if manure was applied properly, the specialist explained.

Having fertilizer ingredients present in the soil in proper amounts is in many cases as important as having them there in the first place. Too much potassium in the soil will, for example, prevent a plant from making use of available magnesium. This fact has been proven in experiments at Brubaker's company as well as elsewhere. "We have got to watch the Mg-Ca and Mg-K ratios," he warned. To help in overcoming this problem, he advised a closer scrutiny of the depth of soil samples.

Recommended depths for soil samples are not more than three inches for ground which is either no-tilled or chiseled, and to plow depth in plowed ground.

The corn program was concluded by Kenneth Zurin, Salunga; and Hugh Lesley, Oxford — two Lancaster County corn growers who described their individual operations.

Zurin annually puts out about 625 acres of the "King of Crops" with most of the ground always having been plowed up until this year when money was spent for a chisel plow. Some land was double-cropped; plant population was 22,000 per acre. Cost per bushel (all inclusive) was figured to be $2.40, but only $1.86 if only direct monetary expense items such as seed, fertilizer, fuel, insecticides, etc. are counted.

An experimenter and practitioner of minimum tillage farming for the past 12 years, Lesley had been strictly no-till in recent years until he decided last Fall to break his ground up with a chisel plow. Some fields, he explained, had accumulated considerable amounts of surface trash after not having been worked for eight consecutive years. He estimates his per acre planting costs to be in the neighborhood of $100 — not counting equipment expenses.

Lesley plants some of his crop on 22 per cent slopes and reports no problems.

New York Holstein director named

Margin L. Stout, Jr. has accepted the position of program director for Holstein - Friesian Association of America. His territory is the eastern region of New York state.

As a program director, Stout will be responsible for coordinating Holstein programs and services in this region.

Stout brings to this position a background in animal insemination and dairy management. He is a former sales coordinator and GMS evaluator for American Breeders Service.

Stout's experience, from being reared on a dairy farm and later owning and managing his own herd of registered Holsteins, will be a valuable asset to the rapidly expanding field services offered by Holstein-Friesian Association of America.

While dairying, Stout served as a director for the New Jersey State Holstein Association and president of his county Holstein club and the Central Jersey Holstein Club.

A 1963 graduate of the University of Maryland with a Bachelor of Science degree in dairy husbandry, Stout was selected for membership in Alpha Zeta honorary fraternity as well as the collegiate dairy judging team.

Stout and his wife Glenna have four children, two girls, ages 13 and 11, and two boys, ages 10 and 8. Stout's mailing address is Box 25, Schoharie, New York.

Fulton Grange holds special open house

Approximately 75 people attended the Fulton Grange 66 open house on February 9. The meeting was held by the light of kerosene lamps. Master Thomas Galbreath gave opening remarks on activities of the Grange.

A play, "Preview of the Grance - 1866" was presented by Mr. and Mrs. Thomas Bradley, Mrs. Joyce Holloway, and Lori Probst. Charles McSparren introduced the play with a brief history of the Grange.

Mayor Richard Scott of Lancaster spoke on the relationship between the county and city. Mrs. Scott displayed part of her collection of kerosene lamps.

Mr. and Mrs. Robert Janney and son Teddy of Russellville Grange presented four bicentennial musical numbers - "Up With People", "Which Way America", "This Land Is Your Land", and "God Bless America." A bicentennial rug was presented to the Grange by Mrs. Virginia Beck in memory of her late husband, Ted Beck, an active Granger. The program was concluded with a brief play entitled "High Pressure" featuring Mrs. Dorothy Stauffer and David and Tim Hanks.

The next meeting, February 23, will feature a cherry pie contest sponsored by the Women Activity Committee. The program will be provided by Boy Scout Troop 330.

If you expect perfection from people, your whole life is a series of disappointments, grumblings and complaints. If, on the contrary, you pitch your expectations low, taking folks as the inefficient creatures which they are, you are frequently surprised by having them perform better than you had hoped.

FFA week proclaimed

National FFA Week will be celebrated in America from Feb. 21-28th. It is traditionally held during the month of George Washington's birthday to commemorate the agriculturalist's leadership responsibilities for the country. Governor Milton Shapp (center) is shown proclaiming the National FFA week with several state educators and agricultural representatives. FFA officers shown are Don Weaver, New Holland; Eastern Regional Vice-President (third from left) back row) and Bert Waybright, Central Regional Vice-President from Adams County. Flanking the governor are Greg Davis (left) State president from Tioga County and Lloyd Hoover, Leola, State Vice President.

European trip set for Lebanon FFA'er

Frances Bragg

Frances Bragg, a member of the Northern Lebanon FFA Chapter in Fredricksburg, has been selected for the FFA Work Experience Abroad program. A senior and officer of the FFA, Miss Bragg will be spending six months in Switzerland from June to December.

Miss Bragg will be working with farm families and learning about the cultures of the Swiss people. She is the daughter of Mr. and Mrs. Arthur Bragg, Jonestown R2.

An active FFA'er, Miss Bragg has taken several dairy projects and is currently involved in a work experience project in which she works at the Maple Lane Farms jugging operation.

Keep on going and the chances are you will stumble on something, perhaps when you are least expecting it. I have never heard of anyone stumbling on something sitting down.

Farm Safety— Everyone, Every Minute, Every Task

No phase of agricultural operations links the present more closely to the future and affects more people in farming, at more times and in more tasks than safety.

Safe operations must be practiced by everyone, every minute and in every task.

Only through constant attention to safety can current activities insure the success of not just present operations, but those that must be performed tomorrow and throughout the future.

Sperry New Holland's Farm Safety Program is geared to a theme involving the hands. The ad repros, series of safety cartoons and stories in this section of Modern Farming carry through this "Hands" theme.

From a practical viewpoint, the hands of agriculture play a vital role in the farming of today and tomorrow. Whether it be operating a piece of sophisticated farm equipment, maintaining it or performing the thousand and one tasks found throughout a farm or ranch, these hands are an integral element of modern agriculture.

The "Hands" theme also conveys the basic concept that farm safety must be a personal and continuing responsibility practiced by everyone everywhere.

The safety reminders depicted in the cartoon series—guarding against fires, handling flammable liquids, proper maintenance procedures, checking surrounding conditions, being aware of the dangers of falls, mobile safety involving farm equipment, respecting chemicals and personal responsibility—are just a few examples of this continuing need for attention.

These messages are important; their need to be followed throughout agriculture is vital.

C. B. "Bud" Hoober, second from left, receives the 'XL' award from Gordon Burk, manager of personnel and planning for the Albany Region. Looking on are Charles Hoober Jr., left, and Del Reynolds, area manager for International Harvester Co. Hoober is one of only four IHC dealerships in the Northeast U.S. to meet the 'XL' requirements. A program which is only two years old, the 'XL' program honors dealers for outstanding service and facilities.

Hoober receives 'XL' award

INTERCOURSE — C. B. Hoober and Son, Inc., International Harvester dealer, here, recently received the prestigious 'XL' award from the IH Company for his dealership's outstanding performance in IH's dealer programs. The award is so exclusive that Hoober is only one of four dealers in the entire Northeast (Albany) region to have achieved this recognition. Officially presented with the award here earlier this month during Open House ceremonies at his dealership, Hoober had previously been in Chicago to participate in the fifth annual National Dealer Council in which 18 select IH dealers from all over the country met with the Company's Agricultural Equipment Division management to discuss matters of mutual interest.

In accepting the award during his Open House activities, which was attended by approximately 550 people, Hoober thanked his customers for "making it all possible."

WHEN CHANGE IS SUCCESS
WE THINK BACK AND CALL IT GROWTH

The IH dealer, who has been in business for 34 years and has customers stopping in from as far away as New York and Virginia, gave a short talk on the changes which have taken place in agriculture and how important it is for farmers to keep pace with new innovations.

A huge Steiger 4-wheel drive tractor, which he has been selling since last summer, drove into the shop area just as he began his talk. Still something of a curiosity in this part of the country, the 14-ton behemoth captured the attention of the audience and appropriately served as an example for what Hoober had to say.

"Who would have believed five or ten years ago that we'd be handling these kind of tractors," Hoober exclaimed, even hinting that he himself had not thought it possible. "But this big tractor you see here is the seventh we've sold since July," he added. He noted that the Steiger Company, of which IHC is part-owner, builds one such tractor every 20 minutes and his dealership is only alloted eight for all of 1976.

"There have been changes, and changes are going to continue," the dealer continued, advising farmers to be alert and avoid being one of those kind of people who later wake up and wonder "what's been happening." Hoober also said investments for improved facilities, including machinery, are wise if the farmer has the credit available because otherwise building capital would be eaten away by taxes.

In concluding his remarks, Hoober described the different attitudes people have regarding change. "But when change is success, we think back and call it growth," he stated.

International Harvester's XL award is based on 10 factors, all of which must be met before the recognition is given. The program is two years old.

Manbeck criticizes state budget

HARRISBURG — Sen. Clarence F. Manbeck, R-48, said glaring contradictions in statements made by Gov. Milton Shapp and Lt. Gov. Ernest P. Kline can only mean tough days ahead for Pennsylvania taxpayers.

"The governor said in his budget message there would be no new taxes because he predicted an improved economy in the state would boost revenue from the state income tax and the corporate net income tax," Manbeck said.

"Yet only two days before, a report put out by Lt. Gov. Kline said the high levels of unemployment had a devastating impact on the state's economy during 1975.

"The report from Kline showed that during the first six months of fiscal 1975-76 revenue from corporate net income taxes was down almost 10 per cent and revenue from the state income tax was down just over 8 per cent.

"This doesn't make any sense at all," Manbeck said.

He said the economic indicators support Kline's position and make the governor's budget message "grossly unreal."

"To further support my analysis that the governor's predictions are on shaky ground, unemployment was so severe in this state last year that unemployment compensation payments reached a record $1.3 billion. The drain wiped out a $900 million balance in the state's unemployment compensation reserve fund and forced the state to borrow $174 million from the federal government.

"Now, in the wake of these very serious figures, the governor predicts a 31 per cent increase in the revenue from the corporate net income tax and a 13 per cent increase in the personal income tax revenue.

"That's a rather serious contradiction of Kline's report. It certainly implies that we have lots of jobs and that business and industry is doing extremely well," Manbeck said.

Manbeck said that only means the governor is trying to lull the taxpayers into believing the state is being managed soundly.

"What it really means is that for the first half of the 1976-77 fiscal year there won't be any tax hikes. But once the elections are over and the shortages become obvious, the governor can push for tax increases to meet those shortages."

Manbeck said another fallacy in the budget message was the admission there would be no deficit when a year ago the governor was predicting a $400 million deficit for this year because the Legislature lowered the personal income tax rate.

"The governor has been doing some very dangerous juggling with figures in order to create what looks like a sound economy," Manbeck said. "I know he's trying to build a good national image since he's trying to get the Democrat nomination for president, but I think all he's really doing is creating a situation that is going to come down on the taxpayers of this state like an avalanche."

SOYBEAN ROASTING ON YOUR FARM

For peak feeding value have your soybeans roasted. (To kill toxic enzymes in raw soybeans.)

1. Roasted soybean (not just cooked), increased digestibility by 15 percent.
2. Increased weight gain for beef & hogs.
3. Increased butterfat in milk & egg production.
4. Improved animal health, reduced vet bill.
5. Eliminates hauling to the mill & back to farm.
6. Feed your own grown grain. (Not exchanged with others)
7. Beans remain whole. Store for months without losing any feeding value.

Jesse Wood announces candidacy

A farmer from Little Britian Township, where he has been engaged in farming for the past 25 years, has announced his candidacy for the Republican nomination for state representative from the 100 Legislative District, a position currently held by Sherman Hill.

The candidate, Jesse Wood, believes his 25 years of living and working in a rural community give him a first-hand knowledge of the many problems confronting farmers of his district.

He believes in free enterprise in the business world; fewer federal and state controls for our citizens. He thinks state agencies should be reviewed, to be sure they are performing the purpose for which they were established.

"All citizens are for clean air, clean water, and beautiful surroundings, but not at the expense of chasing factories and business out of our state, and controlling our farms in such a way that we will end up with a "food crisis", similar to the "energy crisis" we have been experiencing," he says.

Rural roads should be turned back to the townships with sufficient funds to maintain them, thus stretching our tax dollars. Land use is an important issue in Lancaster County, says Wood.

Wood, 42 has held public offices in Little Britian Township since 1955. At present he is serving as Committeeman, and Certified Sewage Enforcement Officer.

He is a member of the Wakefield Lions Club, Lancaster County Farmers Association, Fulton Grange, and is presently serving as Master of Lancaster County Pomona Grange. He is a member of the Agriculture Committee of the Pennsylvania State Grange.

His wife, Ruth Ann, is a mail carrier for Nottingham. They have five children, three still living at home. They are sponsors for two Vietnamese brothers, and at the present time have an exchange student from Lima, Peru, sharing their home.

Beekeepers to register colonies in Maryland

ANNAPOLIS - It is time for Maryland beekeepers to register their colonies with the Maryland Department of Agriculture which has mailed the annual registration forms.

Chief Apiary Inspector John V. Lindner points out that registration serves as valuable insurance to beekeepers in that it enables faster action in the case of bee diseases because MDA will know at a glance where all colonies are located in an area if infection strikes a colony. Also, under law, only registered colonies are eligible for USDA's pesticide indemnification program should a colony be wiped out due to misuse of pesticides.

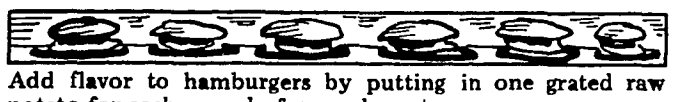
Mr. Lindner says that this year sees a change in the registration period in that registration will now run on a straight calendar year basis. Up until now, the annual registration period began in July. Henceforth, registration will run from January through December.

Any beekeeper not receiving an application from MDA may secure one by writing to: Apiary Inspection, Maryland Department of Agriculture, Plant Industry Division, College Park, Maryland, 20742 or by calling Mr. Lindner directly at 301-454-3848.

Informed required on the registration forms is simple: the name and address of the beekeeper, the county where the apiary is located, the number of colonies contained at each apiary location, etc.

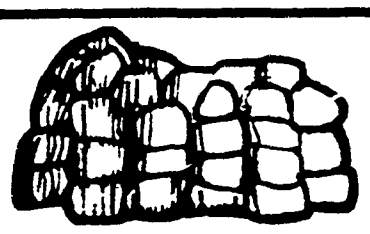
The Maryland beekeeping law dates back to 1916. Statistics for 1975 show that the number of registered beekeepers jumped 50 percent from 1974 and the number of colonies registered increased some 60 percent to a total of 10,032. The average Maryland beekeeper has 4 to 8 colonies while several have as many as 500 to 1,000.

Bees, known as "The Wings of Agriculture", are indispensable as pollinators of fruits, vegetables, and many forest trees and plants. Honey production statistics for Maryland show that in 1975 some 253,000 pounds of honey valued at $172,000 and 4,000 pounds of beeswax valued at $6,000 were produced.



Add flavor to hamburgers by putting in one grated raw potato for each pound of ground meat

READ LANCASTER FARMING FOR FULL MARKET REPORTS



H—2510 HT BONUS

This single cross is packed with high yield potential! It features medium stalk height with low ears. Stalk quality is excellent. H-2510 has bred in tolerance to leaf diseases, and shows good early vigor. A healthy hybrid with good root anchorage. Excellent combine corn, hat picks well also.

H—2580 HT BONUS

A hybrid with erect leaves, long ears, excellent seed quality and test weight. This hybrid has excellent standability and dries down rapidly in the fall. It picks clean and combines easily, and has resistance to leaf diseases and stalk rot. High yield performance.

H—2666 HT BONUS

A top yielder. High leaf blight tolerance. Strong stalks and roots. Good combine or picker corn. Adaptable to a wide variety of growing conditions. Excellent grain quality and high test weight.

H—2750 HT BONUS

Here's a truly dual-purpose hybrid that will make lots of silage or lots of grain. H-2750 features big, showy ears. Strong stalks and good roots make it stand up until harvest. This hybrid has good MDM tolerance as well as leaf disease resistance. A beauty to grow over a wide area of the cornbelt.

AGWAY

DO-IT-YOURSELF PROTEIN

Take the Agway clear-seeding alfalfa route and get up to four tons of protein-rich forage this year

Four tons of alfalfa in the year of seeding? It's a practical objective that has already been accomplished on many dairy farms where the Agway clear-seeding alfalfa program has been followed. And that's just the first year. Farmers in southern Pennsylvania following the program recommendations are getting as much as eight or nine tons a year for at least three succeeding years. Translate yields such as these into protein production and you will see why alfalfa can well be one of your most profitable crops. That first year, a four-ton yield is the equal of a 40-bushel soybean crop. Seven-ton yields produce as much protein as fields yielding a phenomenal 100 bushels of soybeans per acre.

Consider how this kind of production can cut your feed expenses. Then call Agway and put the clear-seeding program to work growing protein for your herd this year.

AGWAY ALFALFA SEED

Call now and place your order for top-quality Agway seed. We recommend SARANAC AR, a variety with greatest resistance to Southern Anthracnose, and a superior yielder. Agway's supplies are good at this time, but we urge you to act fast.

Homestead Notes

Farm women share favorite family recipes

By Suzi Kauffman
Feature Writer

Have you been serving your family the same monotonous meals over and over again this winter and yet know your menus will have to consist of meat, milk products and eggs for your family's nutritional needs? Then help is here for your dinners. By way of promoting their farm products, three young homemakers in the Quarryville area have some sugggestions for variations in your menus.

Donna Kreider, wife of Robert H. Kreider, R1, offers an appetizing Parsley-Chives Cheese Sauce for potatoes — potatoes are always a prominent part of the farm family's diet. Donna uses this recipe for both family and entertaining menus. She prefers to make it right before serving so she doesn't have to re-heat the sauce, but it is good even if re-heated, she said. "The recipe is fairly easy, but you have to start in plenty of time to allow the sauce to cook properly," Donna suggested.

Potatoes in Parsley-Chive Cheese Sauce

Scrub and peel about 25 small potatoes and cook just until tender in salted water. Drain thoroughly and add to the cheese sauce.

½ cup butter
1 tsp. dry mustard
1½ cups shredded cheddar cheese
1 tablespoon dried parsley flakes
1 teaspoon salt
½ cup flour
5 cups milk
1 tablespoon dried chives

Melt butter in large saucepan; blend in flour and mustard to make a smooth mixture. Add the milk, stirring constantly, and cook until sauce is thickened. (Sauce will be medium-thin until cheese is added). Stir in cheese, parsley, chives; cook over low heat stirring constantly to blend. Add salt to taste. Add potatoes and hold in a warm place until serving time. Makes enough sauce for at least 8 servings.

The Robert Kreiders are committed to dairy products with their 300 acres and 124 cows. Donna uses milk, cheese and ice cream frequently when planning meals for her family of four which includes seven-year old Jodi and five-year old Craig. A dairy product - based dessert for Kreiders favor is Strawberry Parfait Pie.

Strawberry Parfait Pie

1 package (3 ozs.) strawberry Jello
1 pint strawberry ice cream
1¼ cups hot water
1½ cups sliced and drained strawberries

Dissolve strawberry Jello in hot water, add ice cream, mixing by spoonfuls. Chill until mixture thickens (not set), add strawberries. Chill in crust. Top with whipped cream if desired. Top with whole strawberries if available. If frozen strawberries are used, juice may be substituted for some of the water. Use graham cracker or pastry crust.

Anna Mary Glick, Quarryville R2, also plans meals which include nutrition and appetite appeal for small children. She and Sam have three children, Denise - six, Douglas - three and one-half, and Dawn - two. They live on a dairy and poultry farm. With 40,000 layers on the farm, Anna Mary seeks ways to use eggs in her meals. She selected Deviled Eggs and Red Beet Eggs, often thought of as picnic dishes, as an easy way to get her children to eat eggs. She said the protein content of the eggs interested her more than any cholesterol scare. These are two easy-to-prepare dishes to brighten a table at home or at a covered dish dinner, according to Anna Mary. "Eggs will peel easily if they are left on a counter over night before cooking," Anna Mary suggested. She puts the eggs into the beet juice when they are hot because they take the color faster, she added.

Red Beet Eggs

1 dozen eggs
1 1-lb. can Red Beets
1 cup vinegar
1 cup water
3 tablespoons sugar

Dissolve the sugar in vinegar and water; add red beets and juice. To this add the hard-boiled eggs. Refrigerate and marinate for at least 4 hours.

Deviled Eggs

6 hard-cooked eggs
3 tablespoons mayonnaise
½ teaspoon dry mustard
¼ teaspoon salt
½ teaspoon paprika

Cut eggs in half. Mash yolks and add mustard, salt and mayonnaise. Blend well. Fill white halves with the mixture.

Anna Mary gives a French or Plain Omelet recipe as a main course for a change of pace from meat.

French or Plain Omelet

3 eggs
3 tablespoons water
⅜ teaspoon salt
⅛ teaspoon pepper
1 tablespoon butter, margarine or oil

Mix eggs, water, salt and pepper with a fork until yolks and whites are blended. Meanwhile, heat butter, margarine or oil in an omelet pan or heavy skillet just hot enough to sizzle a drop of water. Pour in egg mixture all at once. Mixture should begin to cook immediately at the outer edges. With the fork, lift cooked portions at edges so uncooked portions flow underneath. Slide pan rapidly back and forth over the heat to keep mixture in motion and sliding freely to avoid sticking. When mixture is set, the egg no longer flows freely. The omelet is moist and creamy on top. Let it cook about one minute to brown the bottom slightly. Fold or roll, and serve promptly on a warm platter. Makes 1 or 2 servings. Omelet should be tender and light, moist and delicately brown on the bottom. Use a 7 to 8-inch omelet pan or heavy skillet.

Mrs. James R. Groff of Quarryville R2, offers several varieties of beef dishes which are basic in her menus for her family — Troy, 14; Todd, 9; and Tracy, 8, — which reside on a beef farm. Groff Brothers farm 400 acres and start yearly 400 head of beef cattle — white-faced Herefords and Black Angus. Linda likes Porcupine Meat

[Continued on Page 44]

Donna Kreider enjoys cooking and especially preparing dairy specialties.

Anna Mary Glick shown with son Doug and young Dawn displays some of her cooked goodies.

Linda Groff prepares one of her favorite dishes - porcupine meat balls.

Country Corner

FFA'ers set trend for farming's future

By MELISSA PIPER

The image of the farmer is rapidly changing and FFA has contributed greatly to his new stature. The young men and women in FFA chapters all across the country have realized the importance of agriculture and are approaching the future with high hopes and outstanding skills.

It is well known that a farmer must be a combination of a talented businessman, skillful accountant, agronomist, animal scientist and an engineer if he hopes to work successfully into later years FFA has prepared and is preparing numbers of youths in these skills, not only for agricultural production but also in agribusiness firms and work experience

Most FFA members that I have interviewed during the past two years have greatly appreciated the agricultural benefits when they have reaped from the program along with the leadership growth they have learned to accept.

Project work teaches patience and the art of agricultural enterprises but the activities which go along with FFA often help young people to relate to others and better communicate with their peers.

Agriculture has a future in this country and it will soon be in the hands of the younger generation. FFA members hold high hopes for a continuation of better production and proclaim their dedication which is included in the organization's creed which follows in part:

"I believe in the future of farming, with a faith born not of words but of deeds — achievements won by the present and past generation of agriculturalists . . . I believe that rural America can and will hold true to the best traditions of our national life."

During National FFA Week Feb. 21-28th, we salute those 485,000 students enrolled in the program and their many instructors who have guided so many youths in the direction of better agricultural attempts.

Balls because they are easy to prepare and her children like them.

Porcupine Meat Balls

½ cup uncooked rice (Minute Rice or long-grained)
1 pound beef, ground
1½ teaspoons salt
¼ teaspoon pepper
2 tablespoons minced onions
2 tablespoons fat (Crisco oil or bacon drippings)
1 cup condensed tomato soup
1 cup hot water

Combine rice, beef, salt, pepper, onion; mix; shape into 12 balls. Brown balls in fat in heavy fry pan; add tomato soup and water; cover. Cook 1½ hours over low heat until rice is tender.

Stuffed Steak Roast, Baked Beef Liver, and Beef Croquettes are three more favorites for Linda.

Stuffed Steak Roast

2-pound slice of round steak
1 teaspoon salt
¼ teaspoon pepper
2 cups dry bread crumbs
3 tablespoons grated onion
1 teaspoon sage
one-third cup milk
2 tablespoons ketchup
1 egg, beaten

Wipe steak with clean, damp cloth; season with salt, pepper. Combine remaining ingredients; spread stuffing on steak, roll as for a jelly roll; tie with string. Place roll on a rack in an open roaster. Roast 45 minutes in 350-degree oven.

Baked Beef Liver

1½ lbs. beef liver
two-thirds cup chopped onion
½ cup chopped green pepper
2 cups tomato juice
6 strips bacon

In flat baking dish, place slices of beef liver, salt lightly. Top with the onion and pepper and cover with the tomato juice. Place bacon slices over the top. Bake covered at 350 degrees for 1 hour. Remove cover and bake another 15 minutes to crisp the bacon.

Beef Croquettes

4 tablespoons butter
4 tablespoons flour
½ teaspoon salt
⅛ teaspoon pepper
1 cup milk
2 teaspoons minced parsley
2 cups ground cooked beef
1 teaspoon lemon juice
1 teaspoon minced onion
1 egg, beaten
1 tablespoon water
Fine bread crumbs
fat or oil

Melt butter in sauce pan; remove from heat. Add flour, salt and pepper; blend. Add milk. Cook over low heat, stirring constantly until thickened. Add parsley, meat, lemon juice, onion; chill thoroughly. Divide mixture into 8 portions; shape into rolls or balls. Combine egg and water. Roll croquettes in crumbs; then roll in egg mixture, then crumbs again. Heat fat in deep fryer to 390 degrees F. or until hot enough to brown an inch cube of bread in 20 seconds.

Now that you have before you several recipes which use meat, eggs and dairy products, go ahead and try some new ones for your dinner table. You may have a future family favorite right here.

Olde Homey Hints

If hard soap was desired, the boiled mixture received one quart of salt in a half gallon of hot water. After another 20 minutes of boiling, the soap cooled and then was cut into cakes.

Quilting course slated

The Chester County Extension Service will offer a course in Quilting. The classes will be held on Tuesdays, March 2, 9, 16, 30 from 9:30-11:30 a.m.

The series of four meetings will cover basic techniques for hand quilting. The instructions will include making a pattern, use of applique and patchwork and creating a quilted pillow top. The use of equipment and instruction on how to make a quilting frame will be demonstrated.

A small fee is required for this course. For further information call the Extension office, 696-3500. The course will be held in the Extension office, Paul E Dague Bldg., 235 W. Market St. West Chester.

Cosmetic safety urged

Cosmetics usually enhance attractiveness and self-confidence but "use with care" should be the watchword, says Mrs. Ruth Ann Wilson, Extension clothing and textiles specialist at The Pennsylvania State University.

Occasionally, severe allergic reactions to some products do occur. In other cases, consumers may misuse cosmetics and endanger their health. To insure safe cosmetic use, read all labels on the containers and packages and follow directions exactly.

If a reaction such as itching, swelling, soreness, blisters or redness does occur, stop using all cosmetics that may be affecting the area. If the reaction persists, see a doctor immediately. Take the suspect cosmetic along.

To determine possible allergy to a cosmetic, Mrs. Wilson says to place a small amount on the inside forearm and leave it for 24 hours. For hair products, choose an inconspicuous area on the back of the head and do a patch test following directions in the package. Check for any signs of redness or itching before using the product for the entire area.

To prevent contamination, keep containers closed tightly when not in use - and wash hands before applying any cosmetic. Cosmetics are usually bacteria-free before they are opened. Throw out old cosmetics because preservatives lose effectiveness over time.

Society 2

Farm Women Society 2 met recently at the Danner Home in Manheim. Hostesses for the occasion were Elizabeth Degler, Blodwin Brandt, Mae Fisher. Mrs. Mabel Pinkertown gave the devotions.

Grace Miller was installed as the new president as Mae Donough is moving. Martha Brandt was installed as the vice president. Donations were made to the Mennonite Board for donations to Guatemala and also to the One Way Chapel. For the county project, the society voted to support St. Joseph's Clinic.

Speaker for the program was Trooper Antoinette Agostino who spoke on personal safety for women.

The next meeting will be at the Penryn Fire Hall and husbands will be invited.

Ladies Have You Heard?

By Doris Thomas

Lancaster Home Economist

Super Crop of Fresh Western Winter Pears

This year's superior crop of fresh Western winter pears assures markets nationwide of an abundant supply of high quality Anjou, Bosc and Comice pears for enjoyment during the months when fresh fruit is at a minimum.

Fresh winter pears keep that right-from-the-tree good quality throughout the entire season. Grown in the sunny orchards of the Pacific coast states, the pears are harvested in the late summer and early fall at an immature state and stored in a controlled atmosphere until they are marketed.

Often the pears are not ripe when they reach the markets. Winter pears can easily be ripened at home by keeping them at room temperature until their flesh yields to soft pressure. Then, they should be refrigerated to retain their freshness.

Fresh pears are nutritious as well as delicious. They supplement diets with Vitamin A and Vitamin C along with important minerals such as iron and calcium. In addition, they have a natural sugar content that satisfies appetites, yet contributes only 75 calories per average pear.

There is no limit to the variety of ways that fresh winter pears can be enjoyed. Their [illegible] and goodness are a special treat in lunches and snacks. Their juiciness and tender skins don't require peeling, making them perfect for salads and desserts, both fresh and cooked. The recipes that follow demonstrate some of the ways to enjoy this delicious winter fruit.

Quick Pear Waldorf Salad

3 fresh ripe Western winter pears
1 tablespoon lemon juice
½ cup chopped celery
¼ cup chopped walnuts
½ cup mayonnaise
Crisp salad greens

Core and slice pears. Sprinkle with lemon juice. Lightly toss together the pears, celery and nuts with enough mayonnaise to moisten. Arrange salad greens in bowl and fill with pear mixture. Makes 4 servings.

Pear-Berry Coffee Cake

3 fresh ripe Anjou or Bosc pears
1 teaspoon lemon juice
½ cup brown sugar
½ cup sifted all-purpose flour
¼ teaspoon cinnamon
¼ cup butter or margarine
1 (13½ oz.) package blueberry muffin mix

Peel, core and slice pears. Sprinkle with lemon juice. Mix brown sugar, flour and cinnamon; cut in butter. Prepare muffin mix using package directions. Pour into greased 9x9x2-inch pan. Top with sliced pears. Spoon cinnamon crumb mixture over top. Bake at 400 degrees for 35 minutes. Serves 9.

Tips on Conserving Hot Water

A hot water heater uses 15 percent of the energy consumed in the home. With energy bills climbing, it's more important than ever to offset some of this cost by conserving hot water.

Lowering the water temperature to 110 degrees Fahrenheit could result in considerable savings. But sanitation experts say it's not the answer. Germs lurking on dirty clothes and dishes can cause colds as well as kidney, intestinal, skin and respiratory infections. To control these germs, you need 140 degrees F water for washing dishes and clothes.

There are several safe ways to cut your water heating bill. If you're building a new home, consider installing two hot water tanks — one set at 140 degrees for washing dishes and clothes and the other set at 110 degrees for tub baths and showers.

Save energy by reducing the distance the hot water must be piped. Locate each tank near the place where the hot water will be used. Whether your home is new or several years old, insulated hot water pipes will further cut heat losses.

Cut the amount of hot water used for dishwashing, laundering and bathing. The key to energy-saving dishwashing is to always wash a full load — whether washing by machine or in the sink. When using a dishwasher, consider skipping the dry cycle. Use the no-dry buttom or manually turn the dishwasher off after the final rinse and let dishes air dry. But do use the heat cycle to sanitize dishes if there is an illness in the family.

When machine laundering, always wash a full load. If the machine has a mini-cycle use it for washing smaller loads. Use cold water rinses unless you need to sanitize the clothes because of illness. Even then, consider substituting a chlorine bleach or other disinfectant to sanitize the laundry.

Changing the family's bathing habits can also save hot water. You will spend [illegible] shower instead of a dime for an extended shower or tub bath. And be sure to fix those leaky faucets.

Society 21

Farm Women Society 21 met February 12, 1976 at the home of Mrs. Thomas Bradley, Peach Bottom, Pa.

The roll call was answered by members showing their original valentines.

It was decided to donate $25.00 to Meals on Wheels. Mrs. Howard Steinberg showed her collection of old valentines. Mrs. Harold Graybeal presented a program on Presidents Ladies by showing slides of their gowns and giving interesting stories of each one.

Refreshments were served by hostess Abbie Bradley and co-hostesses Libby Anne Steinberg and Mary DeLong.

The next meeting will be held March 11, 1976 at the home of Mrs. Melvin Meck, Willow Street, Pa.

Society 5

Society of Farm Women 5 held their Jan. 31 meeting at East Fairview Church of the Brethren. Speaker was Mr. Dennis Longenecker showing slides of Africa & his own personal experience as a teacher.

Feb. 28 meeting will be held at Mrs. Luke Bruckhart home, Manheim R2. Speaker, Asst. Prof. of Agronomy of Penna. University, Mr. John Yocum on "Is Your Food Safe To Eat."

Home on the Range

What a quantity of granola cereal recipes we have received! It seems as if many of our readers have begun to make their own breakfast cereals and we've enjoyed printing the many variations.

We are also looking forward to a number of bicentennial recipes from our readers. These will be featured throughout the year - so please keep them coming to our attention.

The Junior Cooking Edition of our recipe section has been absent for the last few weeks. We are not concluding the column but want to build a reserve of recipes. To do this we are discontinuing the special edition until the middle of June. Recipes may still be sent to the column, however, and each contributor will receive a colorful potholder!

Send all recipes to: Recipes - Lancaster Farming, Box 266, Lititz, PA 17543. Please include your name and full address for mailing.

Granola

4 cups rolled oats
2 cups raw wheat germ
1 cup hulled sunflower or sesame seeds
1 cup chopped walnuts
½ cup flaked coconut
¾ cup brown sugar, firmly packed
¾ cup cooking oil
one-third cup water
2 tablespoons vanilla

Combine all ingredients and mix well. Spread in a flat cake pan. Bake for one hour at 350 degrees stirring frequently. Cool and store in tightly covered container. Makes 10 cups.

Martha Martin
Fleetwood, PA

xxx

Party Punch Delight

1 large can pineapple juice
1 large can apricot-orange juice
1 large bottle gingerale
1 quart of lemon or orange sherbert

Crumble sherbert into punch bowl or large serving bowl and gently add juices. Wait for one minute and slowly add gingerale. Stir gently and add small ice pieces. The trick for good punch is to chill juices and gingerale for at least 12 hours.

L. F. file

xxx

One Dish Meal

3 cups bread crumbs seasoned with salt, pepper and butter.
1 cup canned ground beef
1 cup tomato sauce
1½ cups grated Velveeta cheese

Put in casserole, making two layers of each. Bake 20 minutes at 400 degrees. Makes 1 medium sized casserole.

Mabel Reiff
Lewisburg, PA

xxx

Snack Pizza

1 large package round dinner biscuits
2 cups tomato or pizza sauce
1 cup grated muenster cheese
diced pepperoni or ground beef
salt and pepper to taste
oregano

Butter a long baking pan and roll out biscuits, cut in half, in the bottom. Combine tomato sauce with salt and pepper or use pizza sauce to cover biscuits. Dice pepperoni and sprinkle on top or top with ground beef. Sprinkle with cheese and bake in oven at 350 degrees for 20 minutes.

L. F. file

xxx

Wafers

4 cups flour
2 teaspoons baking powder
pinch of salt
1 and one-third cup shortening

Milk enough to moisten as you mix for pie dough. Roll out dough and cut in squares. Bake for 10-12 minutes at 375 degrees.

Emma L. Stoltzfus
Leola, PA

xxx

Easy Ham and Bean Soup

1 large can northern white beans
1 - 1 lb. package smoked ham cubes
3 large carrots, diced fine
1 large onion, diced fine
1 tablespoon brown sugar
salt and pepper to taste

Cut ham cubes into small pieces and brown slightly in large frying pan. In a large pot or crock pot combine beans except one cup, brown sugar, salt and pepper. Begin to simmer on low heat. In a pan of boiling water combine diced carrots and onions. Cook until tender then add to soup. Add ham and cook slowly. Crush the one cup of beans that were reserved and add to the soup. Also stir in 2 tablespoons of ketchup. Cook slowly for five hours or all day in crock-pot. Serve with hot rolls and a salad for a hearty warm meal.

L. F. file

xxx

Marshmallow Cream

Have water boiling in a double boiler. Put these ingredients in a double boiler pan: ¾ cups sugar; ⅛ teaspoon cream of tartar; ¼ cup light corn syrup; 2 tablespoons water; ⅛ teaspoon salt and 2 egg whites.

Put pan with ingredients on top of boiling water and beat till it holds stiff peaks. Remove from hot water and add 1 teaspoon vanilla and beat thoroughly. If used for frosting, spread while still warm. Refrigerate for further use.

Esther Stoltzfus
Leola, PA

xxx

Mexican Fried Eggs

This variation of the familiar breakfast treat add a zip to ordinary meals! Green pepper and cream cheese provide a special taste that is sure to be noticed.

6 eggs
3 medium sized tomatoes, chopped
1 onion, chopped
1 teaspoon parsley, chopped
½ teaspoon olive oil
1 teaspoon cider vinegar
1 red or green pepper sliced thin
4 ounces of cream cheese

Fry eggs in butter and place on a hot platter. Salt to taste. Fry onion, parsley in butter for 3 minutes. Pour over eggs. Sprinkle with oil and vinegar. Garnish with pepper slices and small lumps of cream cheese. Serves 3-4.

4-H Supper Special

1 cup rice, uncooked
2 quarts boiling water
2 small onions, cut fine
2 teaspoons salt
2 cups ground beef
1½ cups tomatoes
2 cups canned corn
2 tablespoons fat

Cook rice in boiling water for 20 minutes until tender. Run hot water over rice and drain again. Cook onion and meat in two tablespoons fat until well done. Combine all ingredients. Put in greased casserole and bake in moderate oven at 350 degrees for 20 minutes.

xxx

Quick Macaroni Supper

1 package prepared macaroni and cheese dinner
1 can smoked luncheon meat
½ stick margarine
salt and pepper to taste
1 small can peas

Prepare macaroni and cheese dinner according to directions. Butter a 2-quart casserole and preheat oven to 350 degrees. Cut luncheon meat into 1 inch cubes leaving several long strips to garnish top. Pour half of macaroni into casserole and add ½ can of peas and ½ of the meat. Stir well. Add the remainder of macaroni, peas and meat stirring slightly to mix. Dot top of casserole with margarine and salt and pepper. Arrange long meat strips over the top in a wheel-like fashion. Bake for 40 minutes or until macaroni bubbles. Do not overbake.

Farm Women Societies

Society 14

Farm Women Society 14 met recently at the Mennonite Historical Society & Archives. Refreshments were served first by the hostesses, Mrs. Christian Landis, Mrs. Martha Herr and Mrs. Edith Metzler. Roll call was in the form of a Patriotic Quiz led by Mrs. Melvin Stoltzfus.

During the business meeting two members reported they helped sew at the Child Development Center. The group was reminded of the upcoming Spring Rally to be held at the Sheraton Motor Lodge, Gettysburg on May 12.

Members were given a tour of the Tabernacle with an interesting lecture, while other members enjoyed looking unto their genealogy.

The next meeting will be held on Saturday, March 20 at 1:00 at the Farm & Home Center. Our group will entertain Society No. 1. Faye Stoner will speak and Mrs. Charles Rohrer will be soloist.

Society 19

The Society of Farm Women 19 met on Feb. 14 in the home of Mrs. Harold Saylor.

Mrs. Charles Long led the devotions, using the theme "Love."

Responding to roll call, each member named her favorite winter pasttime.

For Community Fair Days, Society 19 made plans to have a food and craft stand in Park City Mall on Friday, Feb. 20 from 10 a.m. to 9:30 p.m.

On Tues. Feb. 17 this Society will entertain guests at Conestoga View with Bingo and prizes. On Feb. 28, members will leave by bus from the parking lot of the Landisville Branch of the Commonwealth National Bank at 6:30 for a trip to Hershey for the hockey game.

Mar. 3 from 9 a.m. to 2 p.m. members will be sewing at the Lancaster General Hospital.

The guest speaker, Ruth Long of East Petersburg, who recently spent two years teaching in a private school in Japan, gave an interesting talk on "Sights and Sounds of Japan".

The meeting concluded with a lively auction of delicious homebaked goodies, candy, preserves, produce, and plants, with Mrs. Harold Saylor serving as auctioneer.

The next meeting of Society of Farm Women 19 will be held in the home of Mrs. John Ruhl, 3225 Harrisburg Pike, Lancaster on Mar. 13.

Ida's Notebook

Ida Risser

'Tis said that on a stormy, windy night a good farmer will sleep well. The idea being that he need not fear a dead tree blowing over, shingles flying off the roof or shed doors banging. Of course, this is fine in theory but sometimes the farmer simply doesn't have time to do everything he knows he should do.

So on a recent night with a cold wind howling, Allen got up at 3 a.m. to put a cement block in front of the storm-door at the milkhouse as the latch was broken. Everything was fine until 10 a.m. that same morning when the wind managed to catch the door and break the glass again.

I hope I've finally become wiser and tired of my many trips to the hardware store. I've ordered plexiglass in the hope that this will answer our problems.

On that same cold and windy night, I should have been up and moving houseplants off the windowsills. But, I didn't think clearly at 3 a.m. and even though I put them on the floor the next morning most of the impatiense, ornamental vines and my caladuim froze.

Those on the west and north windows were hardest hit and my consoling thought is that I'd sooner lose them in February than in November — nothing lasts forever.

xxx

For 24 years we managed without a toaster in our kitchen. When all the children were home, they would lay half a dozen pieçes of bread under the broiler in the oven and brown them.

Now that we have an automatic toaster, it is the most used small appliance. I have an ample supply of homemade jams and jellies for after school snacks.

Get the most feed value out of your hay with Beacon Hay Pre-Serv*

You get more milk per ton of hay when you treat your hay with Beacon Hay Pre-Serv. Hay Pre-Serv lets you cut hay as much as 26 hours earlier, at moisture levels up to 25%.

This means a larger hay crop, with less leaf loss and shattering, and less risk of weather damage. Hay Pre-Serv is easily applied to baled, chopped or stacked hay and prevents mold, spoilage, oxidation and excessive heating.

You get better color, improved palatability and more digestible nutrients in every ton of hay you cut.

If you grow succulent forage crops, make the most of them with Beacon Silage Pre-Serv.* With Silage Pre-Serv you can harvest at moisture levels from 40 to 70%, and get as much as 30% more feeding value per ton of roughage.

Grapefruit complexions rosey

Grapefruit is coming to tables these days in colors ranging from white to rosy red. Grapefruit can add magic to your meals, color to your table, and lot of zing to faltering winter appetites.

Whatever the color, the U.S. Department of Agriculture says grapefruit is on the market in great numbers. It peaks at just the right time, when winter appetites need a fresh wink of spring coming. Marketing specialists with USDA's Agricultural Marketing Service report grapefruit is expected to total 69.8 million boxes this season, up 14 percent from last season's crop.

With the exception of the California desert crop of grapefruit, all growing areas report increases. Florida's early crop is forecast at 50 million boxes, up 12 percent; Texas' crop, at 11 million boxes, is a surprising 51 percent over last year's crop; and the Arizona forecast at 3.1 million boxes represents a 12 percent increase.

This should enlarge the supply of frozen concentrated grapefruit juice and grapefruit sections, as well as the fresh supply.

According to USDA, the newest grapefruit among the reds is the Star Ruby, a grapefruit which was developed at the Texas A&I University Citrus Center. The intense color of the Star Ruby makes it the brightest of red varieties. Brought to market for the first time in 1970, it thrives in the lower Rio Grande Valley.

Other good things and unusual features of the Star Ruby are that it has a firmer flesh than most other pinks and reds, and that its juice holds the red color better than others. R. A. Hensz of the Texas A&I University says of it . . . "even the tree of the Star Ruby is different from other citrus trees. If you cut and peel back the bark of the trunk or a large limb, the exposed cambium on the wood and bark is red, sometimes almost as red as the fruit. It is as if the Star Ruby's red color actually flowed throughout the tree."

To help you give the white, the pinks, and the reds an equal chance to vie for favortisim at your table, you may want to start with something like this:

Baked Grapefruit

2 cups crushed corn flakes
½ cup firmly packed brown sugar
2 grapefruits
½ tsp. cinnamon
¼ cup melted butter

Combine corn flakes, sugar, cinnamon and butter. Halve the grapefruit. Core and loosen sections. Top with corn flake mixture. Bake in hot oven (400 degrees) 10 to 15 minutes. Serve immediately.

Broiled Fish With Grapefruit

2 lb. fish, prepared for broiling
3 slices of grapefruit (unpeeled)
2 tbsp. chopped parsley
½ lb. butter
1 cup grapefruit juice
salt and pepper
2 tsp. Worcestershire sauce

Put fish in buttered, shallow baking pan. Place grapefruit slices on it. Salt and pepper well. Sprinkle with parsley. Dot with butter and place in oven (350 degrees) for about 25 minutes. As fish bakes, add a third cup of grapefruit juice. When fish is well cooked, place under the broiler flame and brown. Remove to platter. Pour remaining grapefruit juice in fish pan. Add Worcestershire sauce and bring to a boil on top of the stove. Strain over the fish and sprinkle with paprika. Garnish platter with grapefruit moons.

Consumers seek better services

There's a move away from costly frills as inflation's bite on buying power forces Americans to re-examine their expenditures.

Mrs. Marilyn Furry, Extension family resources specialist at The Pennsylvania State University, says many consumers are passing up convenience foods and spending more time in the kitchen in exchange for dollar savings. They are searching second hand stores for inexpensive clothing values. And they are buying more dual purpose new and used clothing.

For various reasons, Mrs. Furry points out that an increasing amount of leisure time is being spent at home. Home improvement materials and garden seeds continue to sell fast as families put their time to productive use. Rising sales of model and hobby kits confirm that more people are involved in stay-at-home activities.

To cut costs, the Extension specialist notes that several auto and appliance manufacturers are stripping their goods of unneeded chrome, dials and other extras which increase the price of their products.

Olde Homey Hints

Colonial homemakers continually did battle with rodents. Powdered potash mixed with meal was thrown into rat holes. For mice, a rag saturated with a cayenne pepper solution was stuffed into the hole.

Berks Co. Society 4

Berks County Society of Farm Women of Pa. 4 held its February meeting in the Community Room of Boyertown Borough Hall with 12 members answering roll call by giving a Historical event that happened in February. A film, "The Spirit of Freedom," about Benjamin Franklin and the printing industry was enjoyed by all.

During the business meeting a donation was made to the Nyman family victims of a house fire.

Get well wishes were sent to Mrs. Less Richards past state president and Jacob Rithenberger. Congratulations were extended to Nina Farrel and hew new daughter, Lisa.

President Linda Taylor announced the following dates to be remembered. The groups in the county are sponsoring a Square Dance at the Shartelsville Fire Co. Hall on March 27. Tickets are available from group members. The Spring Rally on May 12 will be at the Sheraton Motor Inn in Gettysburg. Reservations must be made by April 21. On April 6 we will be joining Group 6 in celebrating their anniversary at the Fleetwood Grange Hall.

Mrs. Ruth McCullen of Boyertown was taken in as a new member.

Everyone must wear green or pay a fine at the next meeting on March 2 at 7:30 p.m. at the home of Mrs. McMullen.

Dauphin Co. Society 1

The monthly meeting of the Dauphin County Society of Farm Women 1 was held recently at the home of Ruth Espenshade. Co-hostess for the evening was Della Parmer who was also in charge of devotions.

Roll call was taken with 16 members answering. There were also three guests present.

Plans were made for the Group's upcoming May meeting when they will entertain Group 11 from Millersburg, Pa.

Plans were also made for the stand the Group will be having on June 11, 1976 at Hoffer Park. They will be selling home made pie and coffee.

Names were taken for those members planning to attend the Spring Rally in Gettysburg, Pa. on May 12, 1976.

The By-laws were read by Kathy Moffatt following the business meeting.

Delicious refreshments were served following the meeting.

The next meeting of the Dauphin County Society of Farm Women 1 will be held on Mar. 9, 1976 at 7:30 p.m. at the home of Ruby Kingsboro.

Doctor in the kitchen

by Laurence M Hursh, M.D.
Consultant, National Dairy Council

A newborn child's mouth contains the beginnings of 52 teeth. Since the unborn child depends upon its mother for nourishment, the pregnant woman's intake of calcium, phosphorus, and particularly vitamin D, is of special importance. This is why vitamin D milk is recommended for mother-to-be.

Do you remember when many fresh foods were available only at certain times? In season, men trucked fruit and vegetables to neighborhoods and sold them door-to-door. Even in stores, fresh or frozen fruit and vegetables all year round were unheard of. Now we can enjoy better nutrition with fruit and vegetables available every day.

It's the total food eaten daily that's important. A meal, however, can mean more than just food. It can mean relaxation, refreshment of body and spirit, and a time of communication between family members, friends and business associates. Don't create tension at meals. Enjoy your food and the people eating with you.

Milk is a convenience food. Just take the bottle or carton from your refrigerator and pour ... You have a beverage ready for drinking or an ingredient for cooking. For parties, young people often enjoy flavoring cold milk with fruit juices. This given them vitamin C along with milk's superb variety of nutrients.

The need for calcium in your diet every day is important indeed. Whatever your age, you need calcium to help your blood clot, to help your muscles and nerves to work, and to regulate the way in which you use other minerals in your body. And calcium helps us build and maintain bones and teeth.

The three "R's" of cooking to conserve the fullest nourishment a food has to offer are: reduce the amount of water used in cooking; reduce the length of the cooking period; and reduce the amount of food surface area exposed. Vegetables, especially, if cooked too long or in too much water will lost nutrients unnecessarily.

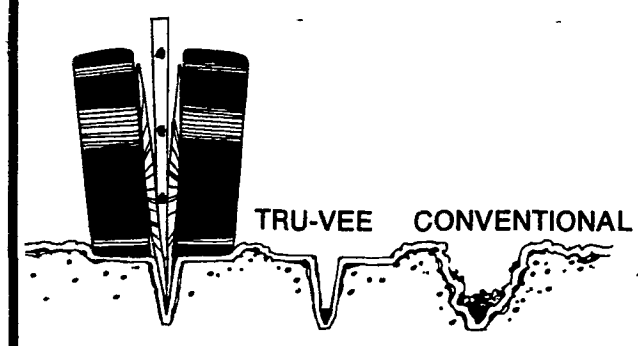
New Max-Emerge™ Planters feature Tru-Vee™ openers for best seed/soil contact

JOHN DEERE
Just one of our down-to-earth ideas to help you get a better crop stand



New Tru-Vee opener earns its name from the seed trench it carves. Sharply-angled disks cut a very narrow V in the soil. The V traps falling seed in optimum contact with firm soil. The opener was designed to eliminate germination-robbing air pockets in the seed trench and place seed in the best possible environment for fast germination and emergence. Stop by soon for more details on Max-Emerge Planters.

Southeastern Pennsylvania tractor pullers honored

The Southeast Pa. Tractor Pullers Association's top super-stock drivers for the 1975 season were, front row, left to right: Dale Smoker, Harry Griest, and Carl Spickler; back row: Mark Stauffer, Mike Wright, Amos Stauffer, Marlin Brubaker.

The top modified tractor drivers in the Southeast Pa. Tractor Pullers Association are, left to right, front row: Galen Spickler, Richard Zimmerman, Les Houck, and Elwood Flowers. They were honored at an awards banquet last week at the Bird-in-Hand Restaurant.

Stock tractor drivers who were honored last week at the annual Southeast Pa. Tractor Pullers Inc. banquet were, front, left to right: Amos Stauffer, Vernon Yoder, Jim Brubaker; back row: Tim Stauffer, Wesley Stauffer, and Ray Brubaker.

Darvin Boyd announces candidacy

LANCASTER - Darvin E. Boyer, 39 Knollwood Dr., Akron, has announced his candidacy for the 16th Congressional District seat now held by Rep. Edwin D. Eshleman. He will seek the Republican Party nomination for that seat in the April 27 primary.

In his announcement speech, the 34-year-old Lancaster County native said that one of the biggest challenges facing the country today is a moral and spiritual crisis. "We cannot legislate morality, but we must have leaders who, through, their convictions and daily living, can inspire the very people they represent."

There's a need for fiscal restraint at all levels of government, Boyd pointed out. He stressed the need for encouraging local governments to solve local problems. And he called for the preservation of the free enterprise system.

Listeners in three counties heard Boyd deliver his speech. He announced early in the morning at Lancaster's Farm and Home Center, then went to Lebanon County's Mount Zion Fire Hall to address a group there. Late in the afternoon he announced his intentions to a Chester County gathering

Because most of the candidates for the Republican nomination share the same basic political philosophy, Boyd noted, issues will not be a decisive factor in this campaign. "Rather," he said, "the candidates themselves will be the issue.

"My promises that I would bring to the office are only those I can deliver; to uphold the high private and moral standards people have a right to expect from their elected officials; to serve with enthusiasm and vigor; to work to the limit of my mental and physical capacities."

Boyd closed his announcement with the statement that he had resigned his job as of February 12 in order to devote all his time and energies to bringing his message to the people. For the past three years, Boyd has been on the staff of the Pennsylvania House of Representatives. In that capacity, he has been instrumental in drafting welfare reform legislation which could be signed into law in the very near future.

NATIONAL PORK

Producers Council®

Over the last few years, the image of pork and the producer has changed. Today, producers are proud of their product. And, through the NPPC, producers have proven to consumers that pork not only tastes good, but it's good for them, too.

The NPPC was formed and is funded and directed by producers. NPPC promotes pork to consumers in a vigorous year-round advertising campaign. The NPPC also funds research on key production problems indentified by producer-members.

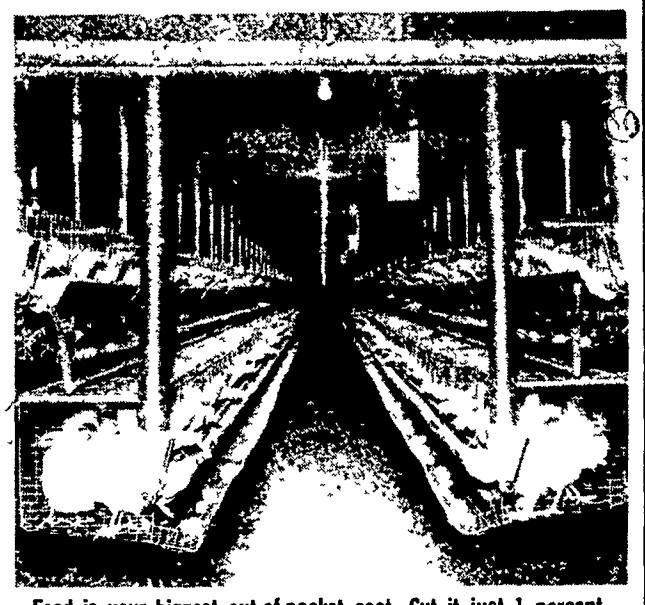
Our work promoting your product has just begun. We want to do more. We need your help. If you would like to join your fellow pork producers in supporting these worthwhile programs, contact:

NATIONAL PORK PRODUCERS
4715 Grand Avenue
Des Moines, Iowa 50312

We will direct you to the proper state leaders. Remember, our job has just begun.

CHORE-TIME

ONE OF THE MOST EFFICIENT CAGE FEEDING SYSTEMS



Feed is your biggest out-of-pocket cost. Cut it just 1 percent - without production - and that's money in your pocket.

Our new cage feeder helps you do just that. Because it uses a new feeding principal poultrymen have proved will work.

It's our experience birds prefer feed that hasn't been picked over. They eat more, convert feed better and are more productive. So we designed our new cage feeding system to deliver fresh, fine-ground feed+ or crumbles to every bird in a closed tube.

CHORE-TIME
Made to work. Built to last.

Winter vegetable supplies increase

WASHINGTON — Fresh vegetable supplies this winter probably will turn out to be slightly larger than a year earlier. Current domestic acreage is 6 percent above a year ago. If yields follow historical patterns, production would be at least slightly larger this year. Domestic stocks of onions are small, but tomato, cucumbers, and pepper imports from Mexico are expected to be larger. Therefore, for the winter quarter, fresh market vegetable prices to growers probably will average the same to moderately higher than a year earlier. Although the expected larger fresh supplies may moderate any price increase, sharply higher prices for remaining onion supplies may be offsetting.

The combined pack of canned and frozen vegetables in 1975-76 again was moderately larger than the previous season. With sharply larger carryovers of both canned and frozen vegetables, the total available supply is the largest since 1971-72. The total supply is ample, and for some products, the supply is burdensome. Quantities of canned peas, beets, snap beans, spinach, canned tomatoes, and concentrated tomato products are especially heavy at this time. Disappearance of processed vegetables was disappointing through most of 1975, but recently movement has picked up once more. Recent price reductions, plus some recovery in economic activity and possibly the gradual disappearance of home preserved vegetables all point to heavier use of commercially canned and frozen items in the next few months.

The 1975 fall potato crop of 272 million cwt., 8 percent smaller than 1974's record, was marked by increased production in Northwest States and sharply lower crops in Maine and Minnesota-North Dakota. On January 1, remaining potato stocks of 153 million cwt. were 6 percent less than January 1, 1975, and were judged by the trade not to be excessive. Prices received by U.S. growers' averaged about $4.00-cwt. (SRS crop price for all sales uses) in the fourth quarter of 1975 and by early spring could reach a $5.50-$6.00 range. Attractive prices at planting time could encourage substantially more planted acreage, which would mean overproduction in 1976-77.

Winter potato production as of January 1, is reported at 3 million cwt. is 3 percent higher than 1975. Spring planted acreage shows an upswing, with 96,200 acres, 13 percent higher than 1975. This acreage figure is still well below the average of most other recent seasons.

By January 1, potato freezers and dehydrators in seven key States had taken 19 percent less from the 1975 fall crop than the previous year. Fortunes of dehydrators were boosted, however, in December when 6.5 million lbs. of flakes and granules were exported. This rate appears sufficient to correct any 1975-76 imbalance in dehydrated potato inventories that may have persisted from early 1975, but without a sharp runup in price.

Dry bean production in 1975 was 17.2 million cwt., 15 percent less than the record high a year earlier. With pea bean output cut sharply, the total production of white classes was the smallest of recent record. On the other hand, as a result of a large pinto crop, the colored bean harvest was 22 percent larger this year. Pinto growers planted heavily last year, assuming incorrectly that sharply expanded exports to Mexico would continue this season. Export demand has been very weak and domestic users have made only nominal purchases, causing prices to trend downward. White bean prices have held firm at relatively high levels.

Summary of the Vegetable Situation approved by the Outlook and Situation Board. Printed copies of the complete report, TVS-199, will be available on February 19, 1976. For additional information beyond what is contained in this summary, contact Charles Porter, 447-8669.

Conservation Corps being organized

HARRISBURG — The Pennsylvania Department of Environmental Resources, the Pennsylvania Department of Education, the U. S. Department of Agriculture and the U. S. Department of Interior announce that applications are being accepted for the jointly sponsored 1976 Youth Conservation Corps Program in Pennsylvania.

The Youth Conservation Corps (YCC) is a program of summer employment for young men and women, ages 15 through 18, who work, earn and learn together by completing projects which further the development and conservation of the natural resources of the United States. Typical YCC projects include clearing stream banks, building trails, tending fish hatcheries, constructing park facilities, planting trees, improving wildlife habitat, developing campgrounds and picking up litter.

There are two ways to participate in the program — residential camps, where campers live at the work site, and day camps, to which students from nearby areas commute daily. Residential campers are paid $52 per week plus room and board while nonresidential campers receive $66 per week.

The application deadline for those interested is April 1, 1976. All Pennsylvania high school guidance counselors and Pennsylvania Bureau of Employment Security Offices have been mailed a supply of application forms and information sheets. Only the official application forms may be accepted.

The demand for the YCC positions far exceeds the number available. Last year 6,000 students applied for the 400 openings, meaning that only 1 out of 15 could participate. The participants are chosen by random selection and successful applicants will be notified in April.

Questions and requests for applications should be addressed to Eleanor H. Bennett, Division of Interdisciplinary Programs, Pennsylvania Department of Education, Box 911, Harrisburg, Pennsylvania 17126.

Is man fair to the cow?

This red, white and blue bicentennial year might be a good time to evaluate man's treatment of the cow since she was brought to the U.S. some 365 years ago. Women's groups, ethnic organizations and various government bureaus protect and defend the rights of certain human animals. But other than the Humane Society, who speaks up for the four-footed animals, especially the cow?

This "Foster Mother of the Human Race" turns herself inside out to please man. The greatest portion of a dairy cow's diet, from 60-90 percent, consists of forages and by-product feeds that humans cannot use. Through her unique digestive system, the cow converts these inedible plant materials into milk, popularly known as "nature's most nearly perfect food." And if her milk production falls below assigned quotas, man ships her to hamburger heaven. Today, the dairy industry supplies more than 25 percent of all meat eaten in America. How have things changed?

In the beginning, cows over produced to help man feed his progeny. Then, when milk production started to decline, man kept a cow contented with calf.

Latter, when dairy farming became systematized, the warm, familiar hand of the dairy farmer was replaced by the automatic milker. This was followed by artificial insemination with the local vet making barn calls to save bulls' traveling time.

There isn't any record of cows mooing their displeasure with evolutionary changes. But from this corner, it appears that mechanization has replaced tender loving care. And we're not finished yet!

We've prodded and pushed and analyzed and psycholanalyzed cows. We've improved breeding and feeding techniques, investigated the effects of temperature changes and played music to milk by. With all of these changes in her life, the dairy cow is the most efficient producer of animal foods when you compare the percent of food eaten to produce that food.

Cows have been fed everything from corn cobs to newspaper pulp to orange peels. They can utilize energy and protein sources that humans cannot (legumes, factory by-products, brewery wastes and bran) and convert them into nutritious milk and meat. The cow can also take non-protein sources like urea and turn them into protein through associated microorganisms. How does man reward his ever-faithful cow?

He's investigating ova transfers, making methane gas from manure to ease the energy crisis, drying cow pies for fertilizer or fuel and using chlorophyl to make a sweet smelling feed for the cow that started the cycle.

Did the words "cow pie" ever make the dictionary? No, but "cowpat" did. From this corner, man has been unfair to the cow in developing language, too. "Cowbane" is a poisonous plant, a "cowbird" lays its eggs in the nest of other birds, to "cow" is to intimidate and to be a "coward" is to show disgraceful fear.

In the spirit of '76, let's do our part to make things better for our favorite animal, the cow. If you can't take a cow to lunch, do the next best thing: drink milk and make her happy.

Frey promoted at Weaver's

NEW HOLLAND - David E. Frey, 17 Colonial Park, S. Kinzer Avenue, New Holland, has been promoted to the position of employment supervisor in the personnel division of Victor F. Weaver, Inc., New Holland.

A graduate of Penn State University with a Bachelor's degree in Liberal Arts, Frey joined Weaver in 1974 as an assistant employment supervisor. In his new position as employment supervisor, he will be responsible for personnel recruitment and associated personnel activities.

THE FRIENDLY FIRST

FRIENDSHIP
Our idea of banking

The things that people used to believe in are often considered old-fashioned today. Things like honesty, integrity and friendship in business.

But you'll find all these things when you bank at the Friendly First – the bank where you *know* you have friends.

You can walk into any office of the First National Bank of Strasburg and get friendly help from everyone on the staff – including our officers and managers.

They always have time to sit down and discuss your personal problems over a cup of our famous, free coffee.

Maybe we're old-fashioned about our hometown style of banking. But you won't find a sharper group of banking experts anywhere!

And you'll find every type of banking service you need . . . the right solution to your particular problem. If you like the idea of a full-service bank that still believes in old-fashioned standards, you'll like the Friendly First. Try us.

Soybean demand strengthening, but exports off 60 per cent; 1976 outlook uncertain

WASHINGTON - With lower soybean prices and some pickup in economic activity, the demand for U.S. soybeans is strengthening both here and abroad. U.S. use during September-December 1975 was up a fifth from the previous year's depressed levels, as both crush and exports gained. Nevertheless, soybean supplies are record large, and a sharp buildup in carryout stocks is anticipated, according to USDA.

Prices received by farmers for soybeans dropped about $1 per bushel during September-December to $4.28 in December. Prices over the balance of the year probably will fluctuate within a relatively narrow range, averaging below the $5.37 received during February-August 1975. The outlook for 1976 U.S. soybean production, developments affecting demand, and the size of the 1976 Brazilian soybean crop to be harvested during April - may all lend uncertainty about the course of U.S. soybeans the rest of the year.

Early January planting intentions indicate about 51 million acres (20.6 million hectares) of soybeans will be planted this spring, 3.6 million or 7 percent less than in 1975. Plantings are expected to be down in the Corn Belt where soybean-corn price relationships favor corn. However, cuts are also being made in the Delta and Southeast where prospective cotton acreage is up sharply. Even with the anticipated cutback in acreage, soybean supplies in 1976-77 will be adequate, assuming normal 1976 yields, because of the large carryover in sight next fall.

Soybean supplies for the current marketing year total 1.7 billion bushels, a fourth more than in 1974-75. This consists of the 1975 soybean crop of 1,521 million bushels and carryin stocks last September 1 of 185 million. Acreage harvested was up slightly, but yields per acre were record high - 28.4 bushels, or 5.2 above the drought-reduced 1974 harvest.

With record supplies and somewhat lower prices, soybean use this marketing year is expected to total around 1.4 billion bushels compared with 1.2 billion in 1974-75. The rates of economic recovery and expansion in the livestock and poultry industries are contributing to expanded soybean utilization. Also, U.S. soybeans are facing tough foreign competition.

The soybean crush in 1975-76 is forecast at around 800 million bushels, up some 100 million from last season. Through December the crush totaled 277 million bushels, 17 percent ahead of September-December 1974. There has been a sharp recovery in the domestic use of soybean oil and meal, but exports are lagging year-ago rates. Soybean exports this season are estimated at around 500 million bushels, compared with 421 million shipped in 1974-75. Inspections for export through late January were running a fourth ahead of last year's rate. Most of the increase is to West European countries where livestock and poultry feeding has picked up in response to relatively low meal prices compared with those of feed grains.

Soybean oil supplies are now estimated at around 9.2 billion pounds, up a billion from 1974-75. Domestic disappearance so far is up 12 percent and for the entire marketing year may reach 7.2 billion pounds compared with 6.6 billion last year. Exports during October-December were down 60 percent and for the year likely will drop well below the 1974-75 level of 1.0 billion pounds. Increased foreign supplies of competitive oil seeds and fats and oils - mainly palm and coconut oils - along with reduced P.L. 480 shipments, are bearish factors. Based on these prospects, soybean oil stocks by next October 1 would rise to over a billion pounds compared with 0.6 billion on October 1, 1975. Soybean oil prices (crude, Decatur) have declined from 21 cents per pound in October to 15 cents in late January. A year ago they were at the 33-cent level. Prices probably will stay relatively low the balance of this marketing year as stocks remain large.

Soybean meal output for 1975-76 may reach 19 million short tons, more than 2 million above last year. Domestic use is expected to exceed 14 million tons, up nearly 2 million, as livestock feeding picks up in response to more favorable feeding ratios. Exports may increase some from the 4.3 million ton level of 1974-75. Soybean meal prices (44 percent protein, Decatur) remained relatively stable during October-January, averaging about $125 per ton compared with $145 last year.

Cottonseed oil supplies, at 1.2 billion pounds, are 15 percent below 1974-75. Domestic use may total 0.5 billion pounds and exports 0.6 billion pounds, leaving only small carryover stocks. Because of the smaller supplies and relatively strong demand, cottonseed oil prices have commanded a higher than usual premium above soybean oil. During October-January 1975-76, crude oil prices in the Mississippi Valley averaged 23 cents, 5 cents above soybean oil but sharply under year-earlier levels.

Commercial lard production is running a fourth below year-earlier levels and for all of 1975-76 probably will drop below a billion pounds, some 15 percent under 1974-75 and the lowest on record. Hog slaughter during October-December was off a fifth and yields per hog are down 2 pounds. Domestic use and exports are both trailing year-earlier rates. Despite the relatively tight supply situation, lard prices (loose, Chicago) declined from around 35 cents per pound in October to 17 cents in January. This is associated with the general drop in all edible fat and oil prices.

NFU seeking better policies

DENVER, Colo. — Development of guidelines for a national food policy, superior to the current "boom-and-bust, glut or famine" U.S. policy, is the principal goal of the 74th annual convention of the National Farmers Union to be held March 14-18 at New Orleans, according to Tony T. Dechant, president of the family farm organization.

Recommendations on national and international food policy will be contained in a 1976-1977 policy statement to be argued and adopted by delegates from around the nation.

Some 2,500 delegates and visiting members are expected for the sessions, which will take place at the Braniff Place hotel, beginning Sunday evening and concluding with a banquet session on Thursday evening, March 18.

Other official business will include election of national officers. President Dechant, who has headed the organization since 1966, is expected to be nominated for re-election. E. W. Smith, Vice President, has announced that he will not be a candidate for re-election.

Major convention speakers will include:

U.S. Senator Hubert H. Humphrey, chairman of the Congressional Joint Economic Committee.

Jack Anderson, author of the nationally-syndicated "Washington Merry-Go-Round."

Robert Strauss, chairman of the Democratic National Committee, and Mary Louise Smith, chairperson of Republican National Committee.

Don Parrlberg, director of agricultural economics for the U.S. Department of Agriculture.

Jerry G. Tvedt, president of Farmers Union Central Exchange.

Jewell Haaland, chairman of the board of Farmers Union Grain Terminal Association.

Dr. J. Robert Busche, assistant executive director, Lutheran World Relief.

Dr. M. P. Cracknell, secretary-general, International Federation of Agricultural Producers.

In a special ceremony at 11:00 a.m. March 15, the U.S. Postal Service will observe the first day of issue for another in its bi-centennial era series, an embossed stamped envelope saluting the American farmer.

Taking part in the ceremony will be Assistant Postmaster General Alfred C. Maevis of Washington, D.C.; Paul V. Burke, postal district manager at New Orleans; and George W. Stone, of Oklahoma, chairman of the National Farmers Union executive Committee.

Broiler placements increase

Placements of broiler chicks in the Commonwealth during the week ending February 7, 1976 were 1,335,000. The placements were 12 percent above the corresponding week a year earlier, and 3 percent above the previous week. Average placements during the past 10 weeks were 9 percent above a year earlier. Settings for broiler chicks were 2,167,000 - approximately the same as the previous week but 9 percent above the comparable period a year earlier. The current 3-week total of eggs set is 10 percent above the same period a year ago. Inshipments of broiler-type chicks during the past 10 weeks averaged 100 compared with zero a year ago. Outshipments averaged 211,000 during the past 10 weeks, 15 percent below a year earlier.

21 STATES: Placements in the 21 States were 61,092,000 - approximately the same as the previous week and 11 percent above the same week a year earlier. Average placements during the past 10 weeks were 9 percent above a year ago. Settings were 75,865,000 - 3 percent above the previous week, and 9 percent above a year earlier. The current 3-week total of eggs set is 8 percent above the comparable period a year ago.

Beef cattle conference slated for March 2-4

A special three-day intensive Beef Cattle Conference will be held at Penn State on March 2, 3 and 4, 1976. The event will be at University Park, and is sponsored by The Pennsylvania State University. Sessions will begin at 10 a.m., Tuesday, March 2.

The program will include discussion of practically every aspect of beef cattle feeding, breeding, management, and marketing. Some of the topics to be discussed include pasture management for optimum production, poisonous plants, marketing outlook, equipment and facilities, managing for healthy herds, performance records, evaluating progeny test data, breed comparisons and crossbreeding, and alternatives for the cow-calf producer.

A special guest speaker will be Mr. Charles Boyles, Director, Southern Ohio Agricultural Resource and Development Center, who will trace the development of the beef cattle program in Southern Ohio over the past 15 years. He will also share some of his experiences in practical cow herd management.

Two other guest speakers will be Dr. Paul Miller, American Breeders Service, DeForest, Wisconsin who will outline methods used to evaluate bulls in progeny test programs. Dr. Richard H. Long, Merck and Company, Rahway, New Jersey, will point out some of the management needed to maintain a healthy herd and to bring about maximum performance.

According to L. L. Wilson, Professor of Animal Science, "this promises to be one of the best Beef cattle Conferences held so far. We are particularly pleased to have three guest speakers who are highly knowledgeable about their assigned topics on the program. These conferences in the past have been enthusiastically attended."

Another special attraction will be a presentation by Mr. George Spencer, American National Cattlemen's Association, Denver, Colorado, who will discuss some of the problems and solutions of the industry. Mr. Spencer will speak after a banquet to be held the evening of Wednesday, March 3. Complete programs and schedules for the conference may be obtained by writing to the Agricultural Conferences, 410B Keller Building University Park, PA 16802.

Cattle on feed increase

Cattle and calves on feed in the seven major States totaled 8,353,000 on Feb. 1. That's up 39 per cent from last year's unusually low number, but still 13 per cent below the 1974 total. Sharpest increases were in Arizona, up 62 per cent; California, up 54 per cent; Texas, up 53 per cent; and Kansas, up 50 per cent.

A GOOD WORD from the Bible

Now they were bringing even infants to him that he might touch them: and when the disciples saw it, they rebuked him. But Jesus called them unto him saying, "Let the children come to me, and do not hinder them; for to such belongs the kingdom of God. Truly, I say to you, whoever does not receive the kingdom of God like a child shall not enter it."

Proverbs 30: 24-28

AGRICULTURE — 1975 summary

Milk production levels off

Two things stand out in the milk production report issued by USDA last week. The first is that U.S. production has leveled off during the past three years. The second is that the top five producing states, far from losing ground, are dominating production now more than ever.

Revised production figures for both 1974 and 1975 show that national output has leveled off at the 115.5 billion pounds range.

This leveling off has come despite the continued decline in cow numbers, which have dropped from 11,409,000 in 1973 to 11,219,000 in 1974 and 11,151,000 last year. Increased output per cow has taken up the slack. Production per cow, which averaged 10,200 pounds in 1972 (when U.S. production hit 119.9 billion pounds), dropped off sharply — to 10,114 pounds in 1973. But, it increased to 10,300 in 1974 and to 10,354 pounds last year.

Meanwhile, production among the big five states — Wisconsin, California, New York, Minnesota and Pennsylvania — is ever dominant. Last year, they accounted for a combined total of 55.7 billion pounds — 48 percent of the U.S. total. In 1970, they accounted for 54.9 billion pounds — 47 percent of the total. In 1965, when U.S. production hit 124.2 billion pounds, they accounted for 56.3 billion pounds — 45 percent of the total.

Wisconsin remains the leader. Its 18.9 billion pound total last year was up from 18.4 billion pounds in 1970 and 18.8 billion pounds in 1965. California has moved up to second, from its 4th position in both 1965 and 1970. Its 10.85 billion pound total last year was 14 percent above 1970, 28 percent above 1965.

New York has dropped from second to third. Its 9.9 billion pound total last year was off from 10.3 billion pounds in 1970 and 11.0 billion pounds in 1965. On the other hand, production in Minnesota has declined sharply. It was third in 1965 and 1970, fourth last year. Its output, at 8.95 billion pounds for 1975 was off 17 percent from 1965, 7 percent below 1970. Pennsylvania's production has remained virtually unchanged during the period. It was 7.14 billion pounds last year, 7.2 billion pounds in 1965, 7.1 billion pounds in 1970.

Fed cattle increased

Cattle and calves on feed February 1 for slaughter market in the 7 States preparing monthly estimates totaled 8,353,000 head, up 38 percent from last year's unusually low number, but down 13 percent from 1974, according to the Crop Reporting Board.

January placements of cattle and calves on feed in the 7 States totaled 1,372,000, up 19 percent from January last year but down 30 percent from 1974. Only Iowa had fewer placed than a year ago.

Fed cattle marketed during January totaled 1,462,000, up 7 percent from last year but down 6 percent from January of 1974. Marketings were above January 1975 in 5 of the 7 monthly States.

Other disappearance during January totaled 90,000, compared with 96,000 in the same month last year.

Estimates in this Cattle on Feed Report are based on data provided voluntarily by cattle feeders. The Statistical Reporting Service maintains an up-to-date list of cattle feeders stratified by feedlot capacity. Data are collected by mail and by personal and telephone interviews on or about the 1st day of each survey period. Survey procedures are designed to obtain reports from all feeders in the larger size strata, and feeders in the small size strata are sampled. Of the total inventory of cattle on feed for this report 72 percent was actually reported in the survey.

COMPUTER AIDS OIL EXPLORATION

A computer in Texas is helping an oil company in its search for oil in many parts of the world

Located at the Houston Technical Services Center, this computer is part of the expanding service capabilities of the Gulf Science & Technology Co in Harmarville, Pa.

The computer sifts through the vast volumes of data which are collected by research vessels like the *Hollis Hedberg* This ship roams the world's oceans collecting seismic data that help Gulf in its continuing search for offshore oil fields.

The computer analyzes sound waves which have been sent through various layers of the earth's crust, detected by hydrophones on the surface of the sea and recorded on magnetic tape These measurements help scientists look for spots which may contain oil

What's New

NEW ROLAREEL HEADER FEATURED ON HAYBINE MOWER-CONDITIONER

A unique Rolareel Header is an exclusive feature on two new 12-foot Haybine mower-conditioners announced by Sperry New Holland.

This new header, with thorough yet gentler crop-handling benefits, is found on the new pull-type Model 495 Haybine mower-conditioner and the self-propelled Model 1495.

The Rolareel header contains unique converging reels to pick up the crop and deliver it directly to the conditioning rolls. This exclusive design eliminates the need for augers. The positive sweeping action of the header provides a clean cut in down and tangled crops.

In addition to the new header, both the "495 and 1495" have big 9-foot, 2-inch intermeshing Chevron rubber conditioning rolls, which are 30 inches longer than all other 12-foot units. Besides providing a larger area for more thorough conditioning, these larger rolls give the operator the choice of windrowing or swathing. No other 12-foot unit offers this choice.

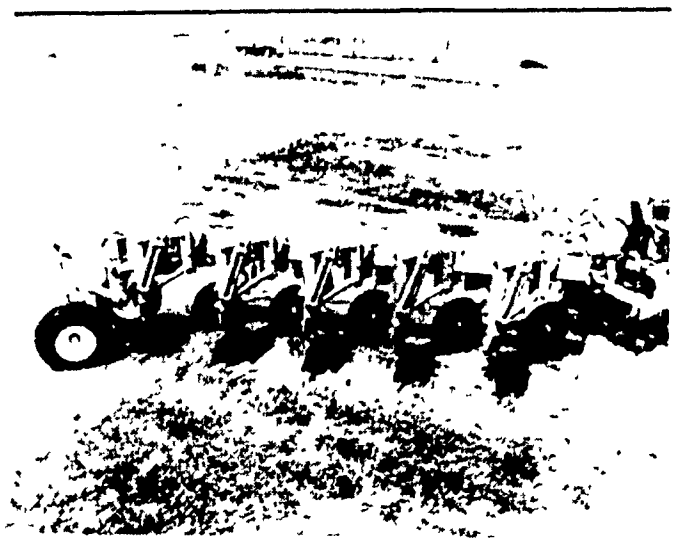
Although the pull-type Model 495 has a full 12-foot cutting capability, it can be quickly converted to a lateral position behind the tractor for transport through gates and along narrow roads. It takes only minutes to change from field position to lateral transport of less than 10-foot width and back again.

Wagon Gear Literature

New literature describing Parker's complete line og wagon gear is now available free by writing Parker Industries, Inc., Silver Lake, Indiana.

This new full-color catalog sheet describes and gives complete specifications for each of Parker's seven new wagon gear models. The complete line ranges in size from six ton up to 12-½ ton.

Standard features and optional equipment are fully described and illustrated with color photos. An easy-to-read specification table provides technical details for each model; such as, spindle diameter, wheel size, brake size, bolster stake setting, and ground clearance. The complete line includes wagon gear in sizes 6, 7, 8, 10, 11 and 12-½ ton capacity units.



HYDRA-WIDE PLOW WITH AUTOMATIC RESETS

DMI, Inc., Goodfield, Ill., recently announced the addition of the new model 40 Hydra-Wide Plow with automatic resets. The model 40 has all the basic features of other models which include: hydraulically adjusting cutting width on-the-go to match soil condition from tractor seat without stopping; 40 inch high clearance for non-clogging; plus add-on feature for extra bottoms. In addition to the automatic resets, the model 40 has as standard equipment, spring loaded coulters, extra heavy-duty DMI frogs and shares, and a large 12.5 x 15 tail wheel for better ride-over of rocks and other obstructions.

Operation of the automatic resets is as follows: When a plow bottom comes in contact with an obstruction, it is forced out of "home position." Once this happens, less pressure is required to trip the shank assembly which allows the bottoms to clear the obstruction with less impact stress on the share, frog and shank. However, hard ground will not cause bottoms to "float," because more force is required to move bottoms out of "home position." The shank assemblies reset immediately after clearing an obstruction since they do not have to cycle to reset. The bottoms have minimum tilt when tripping, which allows bottoms to continue plowing as long as they are below the surface of the soil. Also, bottoms will raise 14 inches to clear an obstruction, while the share points move back 16 inches. Safety shear bolts will allow bottoms to swing clear without damaging reset mechanisms when hooking under a shelf rock or tree root.

The DMI resets are free of any flat surfaces that are difficult to lubricate. All reset pivots utilize pins with grease zerks.

The new DMI model 40 Hydra-Wide Plow is available in 4, 5, 6, and 7 bottoms. These units have been thoroughly field tested in rocky soil by farmers in 9 states and Canada in addition to torture testing at the DMI plant. For further information, contact: DMI, Inc., P.O. Box 65, Goodfield, Illinois 61742.

What is an Individual Retirement Account?

An Individual Retirement Account (IRA) is a personal tax-sheltered retirement plan. It was developed by Congress to bring to every American worker the opportunity to build a more secure future for himself and for his family.

Who can establish an IRA?

IRA's are available to any wage-earner. The only requirement is that you not currently be a participant in any other retirement plan.

At Hershey Convention Center

Peach meeting begins

The program theme for the 1976 National Peach Council Convention, aptly sets the mood for the sweetest, most useful program ever offered peach growers," contends incoming president Paul McPherson, New Park, Pa. Slated to take place February 22-25, at the Hershey Lodge and Convention Center, Hershey, Pa., the annual meeting features a full and highly educational business-oriented schedule plus a diversified social program.

"Never before has any Horticulture meeting delved into family business concepts, market information, integrated pest control, media relations, farm office equipment and record keeping procedures along with new information on how to raise apricots and plums, mechanical harvesting and packing house efficiency," stated the NPC convention chairman.

"NPC '76 will be a memorable family event," McPherson continued. "There's enough educational information to whet the appetites of growers large and small. There's enough business in the ladies' program alone to bring wives as tax deductible business expenses. And there's enough activity in Hershey even in February to keep children on the go if they don't choose to take part in the planned program."

If they're like McPherson's daughter Gretchen, they'll want to come just for the Hershey bars. But they should enjoy the Chocolate World Tour and the bus trip to Lancaster County as well as their parents, according to McPherson. "We hope the nation's peach producers will come to Hershey to get a piece of the action."

Sheep and dairy programs slated for New Jersey

The next meetings in the Extension Service-sponsored series of winter programs on livestock and crops will be on Sheep and Dairy. The date is Wednesday, February 25, 8 p.m. These sessions will take place simultaneously in the two auditoriums in the Hunterdon Extension Center, Route 31, north of Flemington, according to C. G. Wettstein, County Agricultural Agent.

Dr. Arthur Hackett, a veterinarian on the staff of the Canadian Dept. of Animal Health, will be the principal speaker on the sheep program. He will discuss subjects relating to the health, care and management of a sheep flock. Dr. Hackett had formerly been on the staff of the Department of Animal Science at Rutgers University.

The dairy meeting will include the following subjects, all to be presented by Extension Service specialists from Cook College: "Waste Management Options on Dairy Farms," William J. Roberts; "Feeding and Reproduction," Frank Wright; "The High Cost of Money," Robert Latimer; and "Dairy Herd Management Practices," Edward Oleskie.

Meetings are open to all interested persons. The Cooperative Extension Service provides information and educational services through a variety of means to all people without regard to race, color or national origin.

What's New

Trough Liners

An economical thermoplastic U-Trough liner has recently been introduced by P & D Mfg. Co., Inc., for new and worn U-Troughs.

The liner is exceptionally easy to install by inserting the liner under the augers. Saves wear from metal rubbing against metal, less friction, noise, horsepower and comes in 10' lengths. Comes complete with installation hardware and instructions. For additional information write P & D Mfg. Co., Inc., Dept. L, Plainfield, Illinois 60544.

Agway official sees adequate farm needs

Northeastern farmers can take heart in the expected supply situation for agricultural needs this planting season, William A. Hiller, group vice president, Distribution Services, told area farmers February 11.

Speaking at a regional meeting of Agway committeemen at the Sheraton Berkshire Inn, Reading, Pa., Hiller said, unlike the past two years when shortages were common, crop needs and equipment this spring should be adequate to meet farmers' needs.

Agway Director, Ralph Heffner, a Pine Grove, Pa. dairyman and cropsman, discussed Agway's growing service to members and the importance of a well-informed membership. Heffner also reviewed the Agway organization including the key role played in Agway by the 365 Agway committees.

Hiller attributed the favorable market conditions mainly to lower prices for feed and fertilizer. He said more farmers are also expected to take advantage of direct, plant-to-farm delivery of bulk items to cut transportation costs this year.

Also speaking were Arthur Cochran, area manager, and Robert Sowerbrower, Agway Petroleum district manager, who reported on local store and plant operations.

The Reading, Pa. meeting was one of 26 regional sessions to be held this month and next throughout Agway's 12-state territory.

Wine meeting slated

The Southeast Grape Industry Association will hold a meeting on March 7th at 1:30 p.m. at the Farm and Home Center, Lancaster.

The featured speaker will be Robert Evie, president of the California Wine Institute. Evie heads the Guild Wine Company of California, the largest wine-grower cooperative in the world. The cooperative has many affiliates around the world, and it owns Cresta Blanca, the famous California wine company.

Almec Plastics of Maryland will be represented by Walter Haller, who plans to address the association on the use of bird netting in the vineyard.

Displays of vineyard equipment and supplies, literature for the novice grape grower, door prizes, and a wine tasting featuring Pennsylvania and Guild Wine Company wines will complete the meeting's agenda.

Editor's Note: Appearing in four Pennsylvania newspapers, LIFE on the farm enters approximately 75,000 homes each week. The purpose of the column is two-fold: 1. Entertainment for farmers who themselves can identify with these recollections of the author, and 2. Portraying the joys and frustrations, trials and triumphs of farm life to those in town who aren't familiar with it. More than half of the readers who follow this column are residents in towns and cities.

By DIETER KRIEG

Who ever heard of having a farm and children, but no pets? Pets "grow" on farms the same as corn, grass, and weeds.

It was 15 years ago last month since a heifer named "Happy" was born on a southern Lancaster County dairy farm my father was renting at that time. "Happy was a special and most welcome individual. She was mine — the daughter of my very first cow which I had bought just a few weeks earlier with money I had saved up while working as a paperboy for the Times-Union in Rochester, N.Y.

"Happy" became a pet the day she was born — she never had much choice. That's the way it is with youngsters on the farm. While a child or teenager may balk at some of the chores he has to do, feeding and caring for his own animals is looked forward to every time. A bucket of milk is offered lovingly and patiently to a calf, accompanied by lots of petting, and followed by a bit of romping around in the fresh, clean straw.

"Happy's" dam, "Benbrook Admiral Pride," also received special attention, as did a number of other cows, heifers, calves, and cats which my sisters, brother, and I took a special liking to. It was all a part of growing up on the farm. Animals received special treats from those who had befriended them.

Pets, particularly calves, were so special during those early years on the farm that they were — and oftentimes still are — reference marks in time. Memorable summers, for example, were often remembered by the pet calves which were born during that period.

As the herd grows, a person's responsibilities increase, and he himself gets older. The time for special attention for certain calves and cows diminishes. But this is not necessarily true of the degree of interest a person might have for his herd. This, in my opinion, actually increases over the years.

A breeding program, the establishment of cow families, and the challenges involved in that are a very rewarding and satisfying part of working with cattle. It is a more refined, mature, and profit-orientated episode of having pets.

Top speeches chosen

UNIVERSITY PARK — Public speaking winners were named recently in the College of Agriculture at Penn State University. Receiving first honors was Susan M. Daly, a junior in animal science from Cheswick. Miss Daly's speech, entitled "A New Idea in Animal Agriculture," dealt with the use of locusts as a food source. She earned $150 in the 23rd annual Paul R. Guldin Public Speaking Contest at University Park. A total of 18 students participated in the contest which is sponsored by Coaly Society, an honorary agricultural club on campus.

Second place went to Harold Berkheiser, sophomore in agricultural education from Schuylkill Haven. Berkheiser received $125 for his speech entitled "Rising Prices — Feast or Famine."

Mark P. Bridgen of Arnold, a junior in horticulture, received $100 for his third place speech asking, "Will Agricultural Limits Force Triage?"

Honorable mentions went to Susan G. Emeigh, freshmen in animal science from Pittsburgh; Claire Kirkland, freshman in agricultural education from Springfield, Virginia; and Robin A. Walters, senior in agricultural economics and rural sociology from New Castle. Each earned $75.

Funds for the Guldin Public Speaking Contest were established by Paul R. Guldin, a former faculty member, now deceased, in poultry science at Penn State. He established funds because of the importance he placed on the benefits of public speaking.

Judges for the contest were Dr. Joan S. Thomson, assistant professor of rural sociology; Dr. A. L. Bortree, head of the Department of Veterinary Science; and Mrs. Jeanne M. Lutz, speech instructor.

ADA announces advertising plans

American Dairy Association's successful "Milk Is A Natural" advertising theme, will be continued in milk promotions during 1976.

The "Milk Is A Natural" approach points out that today's active families need milk in their diets because of the shift away from the traditional three meals a day; ADA says milk helps to round out those "mini-meals" many families eat nowadays.

ADA plans three promotions in 1976: a March promotion for fluid milk, a summer promotion for milk and ice cream during June Dairy Month and a fall promotion for cheese and milk.

The March promotion will repeat last year's free milk offer, in cooperation with Nestle and Nabisco. Consumers receive a coupon for a free half-gallon of milk after they submit proof of purchase from two packages of Oreo Chocolate Sandwich Cookies and the two pound size of Nestle's Chocolate Flavor Quick with a store coupon.

The summer promotion, which encompasses June Dairy Month, has a selling theme of "Summertime Naturals" to spotlight dairy products that are naturals for summertime eating. It also features a free milk offer in association with the Kitchens of Sara Lee: shoppers get a free half-gallon of milk with proof of purchase from any three Sara Lee frozen baked-good products and a store coupon.

The fall promotion for cheese and milk is slated for October and November.

The "Milk Is A Natural" theme will be used in all media advertising including television, radio and billboards. Television is the primary advertising medium with a $1 million first quarter purchase of prime time network TV kicking off ADA's 1976 milk promotion.

Thirty-second commercials are scheduled on ABS's "Six Million Dollar Man," "Marcus Welby, M.D." and "Happy Days;" and NBC's "World of Disney," "Sanford and Son" and "Police Woman."

The new pool of four spot announcements urges mothers to serve milk to their families with informal meals and quick snacks. They remind homemakers that, with today's families eating on the run so much, it's important to drink milk to help balance those hurry-up meals.

Commercials for cottage cheese, Cheddar cheese and butter round out the ADA television effort.

Eight radio commercials tie in closely with the new series of TV spots, and also emphasize the importance of milk in today's lifestyle. The tag line on all media, is "for the active life we're leadin' . . . Milk Is A Natural."

Thirty-second radio spots for cheese, cottage cheese and butter complete the radio schedule.

Two milk billboards, now in production, feature the "hurry up meal" idea and show milk paired with "meals on the go."

Kickoff dinner slated for sale

The kick-off dinner for the Tri-County Relief Sale will take place on Sat., Feb. 28, at the Twin Valley High School auditorium, Morgantown. Dinners will be served cafeteria style, with seatings at 4:30, 5:15 and 6 p.m., and tickets will be sold beforehand at $3.75.

An evening of relaxation is planned, with a program at 7 p.m. by the Big Valley Men's Chorus from Belleville, Pa.

The purpose of the banquet is to raise money to help defray expenses for this year's one-day sale, which has moved its location from Morgantown's Twin Slope Market to the Farm Show building in Harrisburg, and will take place on March 27.

Concern for the world's needy is the spark behind the sale, which is held annually, sponsored by the Mennonite Central Committee of the Mennonite Church. Expenses are kept low because of generous donations and the proceeds from the pre-sale banquet.

Last year $100,000 was raised at the sale, and used to bring relief to many areas of the world. This was in part made possible by the proceeds from the pre-sale dinner, which amounted to $5,322.37.

This year's quilt auction will, as usual, be the greatest attraction of the sale, drawing buyers from New York and other areas in a number of states.

Tickets for the dinner may be ordered from either: Mr. and Mrs. Dave Pierantoni, 894 N. Maple St., Ephrata, Pa. 17522 (Telephone, 733-1585), or: Mr. and Mrs. Ben O. Stoltzfus, R1, Honey Brook, Pa. 19344 (Telephone, 273-3546).

In England, if you are called "longheaded" it means that you have a sharp wit!

GO BIG RED

ANOTHER WINNING COMBINATION FROM . . .

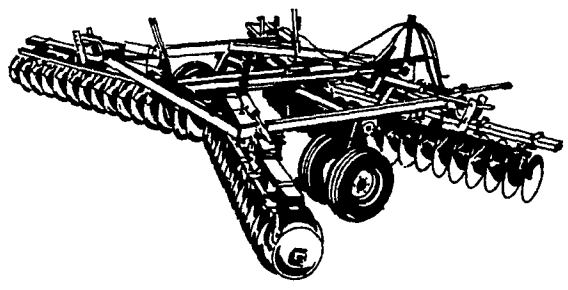
Rocks or heavy trash won't often stop this one!

International 720 Semi-Mounted Moldboard Plows

You can't beat 'em for non-stop plowing in your toughest fields. Designed with exceptional vertical clearance and automatic reset trip beams, 720 plows take heavy trash and hidden obstructions in stride. Also ideal for minimum tillage and soil conservation practices because of great trash clearance and wide-slab furrows—including a big 20-in. size—often eliminate extra operation for disking crop residues before plowing. Also easy to leave surfaces that resist run-off and erosion.

- Available in 4 to 8-furrow sizes with 16 or 18-in. spacing, plus extra big 5/6-furrow 20-inch model
- Beams individually trip or ride over obstructions, then automatically return to plowing position. No stopping.
- High 33-in. vertical clearance handles heavy trash without plugging.

Now even more harrow for your dollar!



International 475 Disk Harrow

The 475 comes in weights up to 4,837 pounds! That's a lot of harrow—offered in folding and non-folding styles. Yet its field-wise features are just as remarkable. Only IH offers high-strength, unit-built disk gangs with 1⅛ in. square spring steel arbor bolts and crimp-center blades—standard on all models. Only IH offers folding models with an automatic, self-locking wing-latch mechanism. Latches absorb all disking forces, unlock automatically as hydraulics raise wings.

- Non-folding models: 11½' to 16' 3", folding (wing-type) models 17' 5" to 21'
- Rugged torsion-type main frame with beefy 3 x 5 in. tubular gang bars
- Self-aligning, regreasable, triple-sealed bearings mounted on arbor-bolt encasing steel sleeves.
- Hydraulic power angling and depth gauging, laterally adjustable standards

Fertilizer forecasts doubted

CHICAGO - "One of the biggest problems facing the fertilizer industry today is a lack of reliable forecasts," Donald W. Parke told the annual meeting of the Fertilizer Institute (TFI) here on Feb. 3. "In the past few years, too many farmers and fertilizer retailers have made costly and unnecessary financial commitments to protect their fertilizer supplies. They were reacting to scare stories by a few industry leaders, and predictions of shortages that never happened."

"We've got to eliminate the credibility gap in fertilizer forecasting," Parke said.

Parke is executive vice-president of PennAg Industries Association, Ephrata, a trade organization of Pennsylvania agribusiness firms. TFI is the national trade association of the fertilizer industry. Parke was at the annual meeting to sit on a four-member panel that examined the current state of the industry.

Parke went on to emphasize that he felt accurate forecasts of supplies and prices could be very valuable. He said, however, that the industry should find alternative ways of developing those forecasts.

"I'd like to see forecasts coming from a panel of economists with varied backgrounds in industry, government and education. If we could get these people together - under the sponsorship of a national organization like TFI - I think we could see more dependable predictions that would have a less disruptive effect on the agricultural economy.

"The credibility factor may be the reason many customers this year have held off on placing their fertilizer orders. There's been a freeze on purchases throughout the East, and it's just beginning to thaw," Parke continued.

Because orders have been delayed so long, customers who depend on railroads for their fertilizer deliveries may have problems getting the supplies they need when they need them, Parke pointed out. "Eastern railroads are in an extremely shaky situation. The logistics of moving enough produce may well be the biggest problem Eastern farmers and fertilizer dealers will have this year."

Another problem faced by the industry, Parke said, is the growing practice of having state agencies administer federal regulations. "And we can't forget that state governments are quite capable of thinking up their own programs of taxation, vehicle codes, employment standards, enviromental regulations or what have you.

"National associations can't possibly cope with all the challenges on the state level. The most practical solution to this problem is an effective network of state organizations."

Parke said states which cannot support a separate fertilizer organization might want to consider following Pennsylvania's example. "At PennAg Industries Association, we've united a variety of agribusiness interests under one effective umbrella organization.

"It's working very well for us, and I think it can work well in other states, too."

Tickets available for LCCD dinner

Tickets are now available to attend the 25th Anniversary Dinner meeting of the Lancaster County Conservation District. The annual meeting is scheduled to be held at 6:30 P.M. Thursday, March 18 at Good 'n Plenty Restaurant, Smoketown. Cost of the tickets is $4.75 each.

Guest speaker for the meeting this year will be Walter N. Peechatka, director of the State Soil Conservation Commission, Harrisburg.

Reservations for the annual dinner meeting can be made by calling the District office at 299-5361 Monday through Friday between 8 a.m. and 4:30 p.m.

Fleetwood Grange holds awards night

"Awards Night" was held February 12 at the Fleetwood Grange Hall, Fleetwood, R3.

Gale Moore, State grange secretary, presented 55-year membership awards to 11 (eleven) members: George Adam, J. Walter Baer, Hettie Bechtel, Ellen Heffner, Laura Heffner, Elda Kline, Leroy Kline, Philip Schaeffer, Merle Schollenberger, Cora Schuler, and Lottie Stetzler.

The above mentioned grange members plus seven other members received lifetime membership cards. The others who were members for more than fifty years were Helen Braucher, Walter Braucher, Grace Cronrath, Maimie Dietrich, Edna Noll, Jonas Schollenberger, and Jeremiah Schwoyer.

Sharon Schlegel, membership chairman, presented Class A attendance awards to Luther David, Martha Herbert, Howard Hess, Paul Hilbert, Lester Hoch, Ernest Kniss, Kenneth Schlegel, Minnie Schlegel, Sharon Schlegel, Kendall Schwoyer, Carolyn Weida, Ellis Weidner and Meada Weidner.

Class B attendance awards were presented to Ella Bachman, Esther Cronrath, Verna Hess, William Hess, Esther Hilbert, Lillian Hoch, Cleon Levan, Florence Leven, Earl Rohrbach, June Schuler, Mary Schuler, Harold Schuler, and Olive Schuler.

Those members bringing three or more members into the grange were also honored. They included Harold Althouse, Sharon Schlegel, May Turner, and Keith Weidner.

The program under the direction of Sharon Schlegel included a skit entitled "The Penalty," with Susan and Wilmer Brown, Linda Fritzinger, Dale Adams, and Morris Snyder as the cast. Luann Herbert played two piano selections. Winners of the "Know Your Presidents" quiz game were Paul Myers and Martha Herbert.

Five new members joined the grange: Gary Heffner, Theresa Heffner, Dorene Ohlinger, Brian Younker and Kathy Younker.

June Schuler, chairman of the committee of Women's Activities, committee, reported that the Grange is selling Pa. State Grange cookbooks at $4.00 and National Grange Bicentennial cookbooks at $5.00. The committee will purchase materials for a quilt to be made by the ladies of the grange. The National Grange sewing contest began February 1. Members are encouraged to enter so we can double last year's goal of 100 entries. Nonmembers may be sponsored by members.

The committee has also begun a book lending service under the direction of Esther Schaeffer and Mrs. Schuler.

Mary Schuler, youth chairman, reported that the youth will hold an indoor swimming party. She needs names for the Patron list for the county youth play entitled "Hillbilly Wedding" to be held on March 26-27.

Albert Bieber, legislative chairman, received a reply from Senator Michael O'Pake concerning our support of a bill to exempt farmland from assessment of sewer lines until use is made of the lines.

Members may order garden seeds through purchasing agent, Luther Davis.

A public card party will be held February 21 beginning at 8 p.m. Open House will be held March 11.

The next meeting will be Ladies Night with Dorothy Scheidt, Dorothy Keller, Anna Miller and Minnie Schlegel in charge.

The refreshment committee for February includes Albert Bieber, Mrs. Theresa Bieber, Mr. and Mrs. Solon Hess, Mr. and Mrs. J. Edward Snyder, Mrs. Emma Snyder, and Mr. and Mrs. George Schuler.

Newton Bair accepts research position from PSU

Newton J. Bair, County Agricultural Extension Agent in Lebanon County, has been selected to participate for two years in a research project in the Bahama Islands.

The project is a cooperative effort of the Pa. State University and the United States Agency for International Development.

Bair will be manager of farm operations for the Bahama Agricultural Research Training and Development project (BARTAD) on North Andros Island, the largest of the Bahamian Islands.

As a farewell gesture, an open house is being planned at St. Mark's Lutheran Church, 200 E. Main St., Annville on Feb. 29th from 1-4 p.m. The open house is being sponsored jointly by the executive committee of the Lebanon County Ag and Home Economics Association and the congregation of St. Marks.

Everyone is welcome to attend.

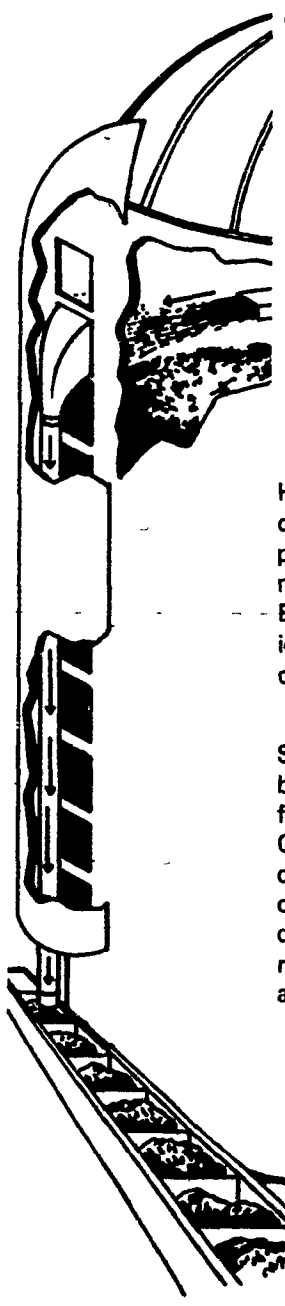
BADGER

Badger

FARMING IS BETTER WITH BADGER

KLEEN CHUTE



Tired of climbing a dusty, dirty silo chute? Then install a Badger Kleen Chute. The silo chute stays clean . . . and so do you! It's economical and easy to install, in any kind of silo.

Tough plastic hood directs silage to flexible plastic tube. Hood snaps easily into door opening. Easy to change. (Special adapter for poured concrete silos.)

Handles silage from highest capacity unloaders without plugging. Silage stream never contacts silo chute. Eliminates silo chute wear, ideal for silos with worn chutes.

Silage falls through tube to bottom of chute. Chute stays free of dust and chaff. Kleen Chute concentrates delivery of silage directly into conveyor or feeding system. Minimizes dust and spillage. Weight ring keeps tube open and straight.

SPECIAL SPRING OFFER

CLIP AND SAVE

Mr. Farmer:

If you are now using a silage fermentation control product you know that they will improve the quality of the ferment, increase nutrient levels, extend the feeding capacity of the silo, plus many other fine extras. And if you have never tried these products now is the time. You'll want to clip and save this ad so when you are ready to order you will be guaranteed this special spring price.

Envesto is the only supplier of fermentation control products that can offer you the products from each of three distinct formulations that are "TOPS" in their classes. One of our products will fit into your management program.

Breakfast potatoes to be standardized

The U. S. Department of Agriculture (USDA) proposed the establishment of grade standards for frozen hash brown potatoes to provide a uniform means of measuring quality levels of the product. Currently there are no USDA standards for hash browns. USDA will accept comments on the proposal until March 31.

Annual production of frozen hash brown potatoes stands at approximately 200 million pounds — almost double the amount produced in 1968. Officials of USDA's Agricultural Marketing Service (AMS), point to this rapid increase in production as evidence of a need for grade standards to facilitate the orderly marketing of the product.

The proposed standards would define frozen hash brown potatoes as mature, sound, white or Irish potatoes that are peeled, blanched and then shredded, diced or chopped before freezing. The standards would provide for two quality levels — U.S. Grade A and U.S. Grade B — based on flavor, odor, color, texture, and freedom from defects.

Both grades of frozen hash brown potatoes would require the flavor and odor characteristic of properly prepared potatoes. The flavor would be required to be free from bitterness, scorched or caramelized flavors, and from off-flavors of any kind.

The standards would require that the color of the potatoes be checked before and after heating. U.S. Grade A potatoes would have a bright, uniform white to cream color before heating and a fairly uniform brown color after heating based on USDA's Color Standards for Frozen French Fried Potatoes.

The color requirements for U.S. Grade B would permit darker potatoes and allow the heated product to brown only slightly or unevenly.

Limits for defects such as crushed units, and discoloration which affect appearance or edibility would be set for each grade.

The texture of the frozen hash brown potatoes would be evaluated within three minutes after heating. To meet the requirements for U.S. Grade A, the potatoes would have to be firm and tender and have no more than a few hard, mushy, pasty, soggy, dry or oil soaked pieces. The requirements for U.S. Grade B would be similar but would permit the potatoes to be less firm and tender.

To qualify as Grade A, a sample unit would be required to score at least 90 out of the 100 point value assigned to grading factors To qualify as U.S. Grade B, the product would have to score at least 80 points. However, the product would not be classified as U.S. Grade A, regardless of the total score for quality factors, if it were Grade B for any factor — color, defects, or texture.

The revised standards are scheduled to be published in the Jan. 22 Federal Register. Written comments should be sent in duplicate to the Hearing Clerk, Room 112-A, U.S. Department of Agriculture, Washington, D.C. 20250. Comments will be available for public inspection in the office of the Hearing Clerk.

AMS establishes grade standards and provides official grading for many food products. Use of the standards and grading service is voluntary.

Financial planning workshops slated for near future

UNIVERSITY PARK, Pa. — Agribusiness firms - the companies that supply farmers - are operating in an arena that becomes more and more competitive every year, according to Kenneth G. Beachley, chairman of PennAg Industries Association's education committee. "The firms that survive will be managed by people with a strong background in financial management," Beachley said.

PennAg is a trade association of Pennsylvania agribusiness firms. Beachley is president of the Beachley-Hardy Seed Co., Camp Hill, Pa. Beachley's comments came at the end of a recent PennAg education committee meeting at Penn State.

The committee has begun work on a workshop program to help agribusiness dealers become more proficient in financial management.

At the workshops, such areas as inventory controls and credit will be studied carefully. Ratios - such as that between sales volume and receivables - would be examined in depth. Dealers and their management employees would be trained to make better decisions in all areas of financial management.

The financial management workshops would most likely span a two to three day period, with enrollment for each session limited. Workshops would be conducted primarily by Penn State extension staff members, with some backup from outside experts.

Another educational program the committee plans to get going will provide pesticide applicators with the knowledge and skills they'll need to meet Pennsylvania's new licensing requirements.

Under this new law, which is effective October 21, 1976, all persons working with certain restricted pesticides must pass written examinations in order to obtain a license.

Penn State and the Pennsylvania Bureau of Plant Industry have already developed a series of correspondence courses for people who use restricted materials. PennAg's efforts would compliment those materials with one-day workshops combining expertise from Penn State, industry and regulatory agencies.

PennAg members attending the meeting in addition to Beachley were Paul Wenning, Knittle & Fry, Williamsport; John Cole, Centre Hall Farm Store, Centre Hall; James P. Webb, Jr., Webb's Super-Gro Products, Mill Hall; Dr. Richard Peacock, Pennfield Corp., Rohrerstown.

Representing the Penn State extension staff were: Dr. Winand K. Hauck, Dr. Wesley R. Kriebel, Dr. Anthony Stemberger, Dr. Tom Brewer, and Joseph A. McCurdy.

Alfalfa Day set for Mid-Atlantic farmers

Booming interest in alfalfa as a cash crop for the Mid-Atlantic area — in addition to its traditional role as a home-grown livestock feed protein supplement and soil improver — has prompted scheduling of what may well become an annual educational event for crop farmers.

The event is the first Maryland Alfalfa Day, set for next Tuesday (March 2) in Windsor Hall at the Brethren Service Center in New Windsor (Carroll County).

Sponsoring organizations are the Cooperative Extension Service of the University of Maryland at College Park and the Maryland Forage Advisory Council.

The council is an eight-man group of farmers, Extension specialists and industry representatives set up last fall to assist the university's Extension forage specialist in developing forage programs for Maryland.

Registration for next Tuesday's activities will begin at 9 a.m., with the program running from 9:30 a.m. to 3:30 p.m.

Lunch will be served at noon for $3, according to Dr. Neri A. Clark, program coordinator and Extension forage crops specialist at the University of Maryland in College Park. All interested persons are invited to attend.

Morning program topics and speakers are as follows:

"Alfalfa Diseases"

Dr. David F. Beard of Adelphi (Prince Georges County); research director for the Waterman-Loomis Co., an alfalfa seed production operation headquartered at Bakersfield, Calif.

"Alfalfa Insect Problems"

Dr. Roger H. Ratcliffe and Dr. John W. Neal, Jr., both of Laurel (Howard County). They are research entomologists with the northeast field crops laboratory, Plant Genetics Institute, at the U.S. Department of Agriculture's agricultural research center in Beltsville (Prince Georges County).

"Alfalfa Management"

Dr. A. Morris Decker of College Park (Prince Georges County), forage crops research specialist at the University of Maryland.

"New Machinery for Forage Handling"

David L. Hess of New Holland, Pa., research engineer for the Sperry-New Holland division of the Sperry Rand Corp.

Afternoon sessions will include the following topics:

"Fertilizing and Liming for Yield & Persistence"

Dr. V. Allan Bandel of Highland (Howard County), Extension lime and fertilizer specialist at the University of Maryland in College Park.

"The Economics of Alfalfa Growing"

Dr. William K. Griffith of Herndon, Va., eastern regional director for the Potash Institute of North America.

Final topic of the day will be "Alfalfa As a Cash Crop," presented by a panel of farmers and hay dealers, with Dr. Griffith as moderator. Panel members will include William S. Bradley of Hebron (Wicomico County); Wesley Taylor of Preston (Caroline County); William B. ("Pete") Dorsey of Sykesville (Howard County); Eugene Myers of Thurmont (Frederick County); Daniel H. Downey of Williamsport (Washington County), and John M. Myers of Upper Marlboro (Princes Georges County).

Pork producers to meet

The Pennsylvania Pork Producers Council has scheduled their Annual Meeting Workshop and Awards Banquet for Saturday, February 28, at the Sheraton Inn, Gettysburg, PA. All local swine producers are urged to support this worthwhile event. Advance reservations are desired and tickets may be secured from Mark Nestleroth, Manheim R4; John H. Henkel, Strasburg, R1; and Barry Haldeman, Manheim R4. Please make your reservation NOW.

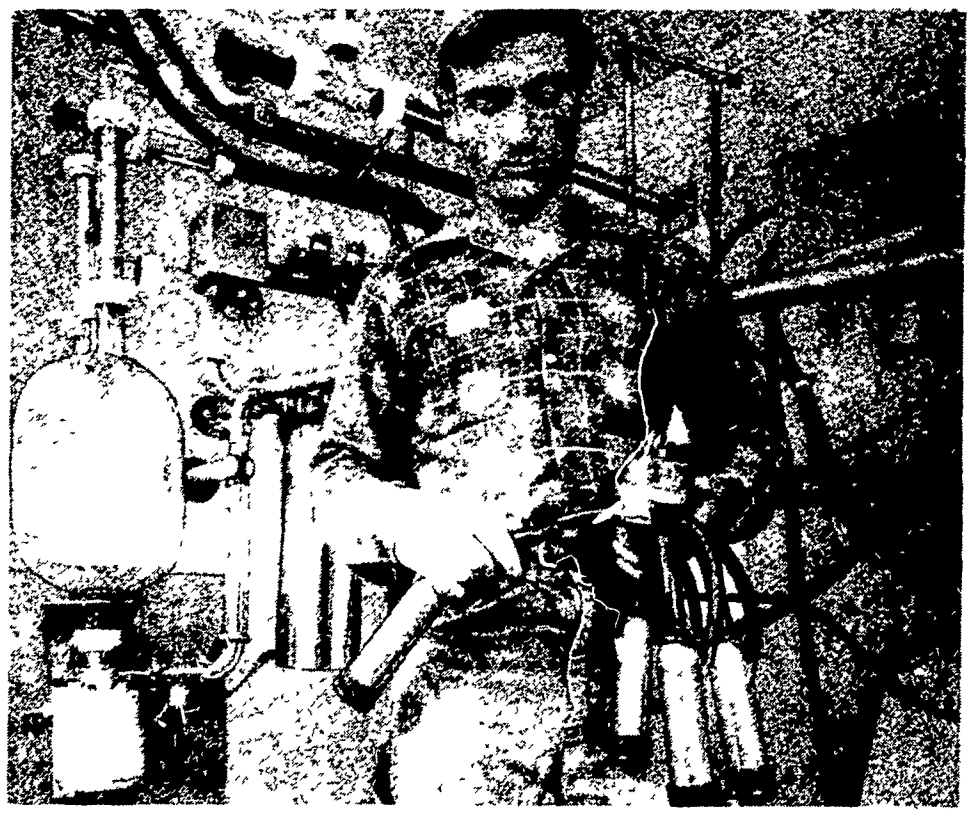
Ephrata Young Farmers receive honors

Mahlon Eberly and Vernon Leininger, seated, were recognized last week at the EAYF seventh annual banquet for being the organization's outstanding broiler grower and poultryman, respectively. The five gentlemen in the rear, (l. to r.) Galen Crouse, Paul Horning, Warren Bollinger, Earl Stauffer, and Lamar Bollinger, were honored for their achievements in the dairy business. Lamar Bollinger was standing in for his grandfather, Alvin Bollinger.

Tom Zartman, second from left, receives a congratulatory handshake from Henry Givler, southeast area vocational consultant, after having been installed as the new president of the Ephrata Area Young Farmers at a recognition banquet last week. Looking on are outgoing president, Earl Stauffer; and Paul King, state president of the Pennsylvania Young Farmers.

DE LAVAL **The DeLaval Compact Combine can keep you in dairying.**

The DeLaval Compact Combine gives you all the labor-saving, time-saving, better-milking of a full pipeline at half the cost. Or about the same cost as a bucket and transfer system. With a Compact Combine, there are no more buckets to lug and no more buckets to scrub.



The DeLaval Compact Combine was designed and built by DeLaval to meet the needs and the pocketbooks of dairymen milking up to 50 cows See your DeLaval Dealer about our "Compact" today It costs about half what you'd expect to pay for a pipeline

Corn growers clinic scheduled

JEFFERSONVILLE — The Southeastern Pennsylvania Corn Growers Clinic and Trade Show is slated to take place here at the Westover Inn and Golf Club next Wednesday and Thursday with no less than 12 speakers taking the podium to update growers on the latest in the fields and laboratories.

The two-day affair kicks off at 8:30 a.m. on Feb. 25 when commercial exhibits will be opened to visitors. The meetings and presentations take place in two rooms with two different programs going on simultaneously. The programs are repeated on the second day to give everyone an opportunity to hear all discussions. Following is the program schedule with names of prominent speakers included:

Feb. 25 and 26
Room A
Speaking Program
Same Program Both Days
Weeds
Richard Bailey, Chairman
9:30 a.m. - Weed Identification - Donald Lohr.
10:00 a.m. - Weed Control - Panel - Dr. Willis McClellan, Moderator; Donald Lohr, Dr. Richard Ilnicki, Dr. Nathan Hartwick.
11:00 a.m. - Sprayer Calibration - Donald Daum.

Production Practices
James Haldeman, Chairman
1:30 p.m. - Corn Crystal Balling - Samuel Fullerton.
2:15 p.m. - Fertility and pH - Dr. Joseph McGahen.
2:45 p.m. - No-Till Pointers - John Henszey.
3:15 p.m. - Questions and Answers.
3:30 p.m. - Adjourn.

Room B
Speaking Program
Same Program Both Days
Corn Storage & Handling
Robert A. Powers, Chairman
9:30 a.m. - Harvesting, Drying and Storage - Joe McCurdy.
10:15 a.m. - Economics of Corn Handling - Fred Hughes.
10:45 a.m. - Farmer Panel - How We Do It - Joe McCurdy, Moderator; Alfred Stierly, Berks County; Wayne Lesher, Berks County; Nicholas Chiylik, Lehigh Co.; Curtis F. Nice, Montg. Co.

LUNCH

Corn Marketing
Samuel Lewis, Chairman
1:30 p.m. - World Grain Markets - Dr. Louis Moore
2:00 p.m. - The Marketing Game - Wilford Sutton.
2:30 p.m. - Corn Production Costs Calculations - Fred Hughes.
3:15 p.m. - Questions and Answers.
3:30 p.m. - Adjourn.

Sponsored by the Southeastern Pennsylvania Cooperative Extension Service and Penn State University, the clinic requires a pre-registration of $5.50 per day. Checks should be mailed by Monday and made out to the Bucks County Extension Service, Neshaminy Manor Center, Doylestown, Pa. 18901. Registration at the door costs $6.00 per day. Lunch is included with either fee.

Jeffersonville is located just west of Norristown. Signs will be up to direct motorists.

Hearing slated on consumer topics

A public hearing on the U. S. Department of Agriculture's consumer representation plan will be held in Washington, DC, Feb. 27, according to Nancy Harvey Steorts, Special Assistant for Consumer Affairs to the Secretary of Agriculture.

The hearing will be held in three sessions — from 10 a.m. to 12 noon; 2-4 p.m. and 6-8 p.m. — in Jefferson Auditorium, South Agriculture building, 14th and Independence Ave. S.W.

Persons wanting to testify should write Eugene Myers, Hearing Clerk, Room 112-A, U. S. Department of Agriculture, Washington, D.C. 20250, or telephone him at (202) 447-4443 before 4:30 p.m. Feb. 18.

Parties scheduled to testify are asked to provide the Hearing Clerk with two copies of their testimony the day of the hearing. Parties not scheduled to testify, but who wish to do so, are also asked to provide copies of their testimony. They will be permitted to speak at the conclusion of the formal session on a time available basis. Additionally, people who may not have time to express their views at the hearing, may submit written comments to the Hearing Clerk before 5 p.m., March 1.

The public and press are invited to attend the hearing sessions.

Potatoes were unknown in Europe until the Spanish conquistadors found the Incas eating them in South America.

McKinely re-elected dairy president

Dairy Council Inc., now in its 56th year of operation, announced the reelection of Robert C. McKinley as President. Others elected to office at a recent Board of Directors meeting include: Lester C. Jones, Vice President; Alpheus L. Ruth, Vice President; Raymond N. Weber, Secretary and Executive Assistant; Susan M. Snyder, Assistant Secretary; Dr. James E. Honan, Treasurer; and Dr. Paul E. Hand, Assistant Treasurer.

Upon reelection, Robert C. McKinley announced his intentions to retire at the end of the current term of office. McKinley, whose service to the dairy industry spans four decades, had been President since 1960.

Raymond N. Weber, reelected as Secretary, was also designated Executive Assistant in order to facilitate a gradual conversion of managerial responsibilities currently assumed by the President.

The Southampton, Pa. based corporation, a non-profit nutrition education organization, is active throughout Southeastern Pennsylvania, Southern New Jersey and Delaware. Its staff regularly presents audio-visual workshops and programs to teachers, medical and other professional leaders.

What's New

Stauffer Brochure Describes Herbigation Weed Control Service

A new brochure available free from Stauffer Chemical Company describes Herbigation weed control service; the fast and easy way to control weeds in many crops by applying herbicides through irrigation systems.

The brochure describes weed control with Stauffer's herbicides applied through center pivot as well as surface and flood irrigation systems. Presently five herbicides are registered for use with this service:

Eptam selective herbicide in irrigated alfalfa, dry and snap beans, potatoes, sugar beets, almonds, walnuts, and citrus.

Sutan selective herbicide tank mixed with atrazine for broad spectrum weed control in corn.

Eradicane selective herbicide for tough problem weeds in corn.

Ordram selective herbicide for rice in the Southwest.

Vapam soil fumigant for control of nematodes, soilborne diseases and weeds in plant beds, fields and replanting sites.

The brochure details geographic limitations, formulations and application rates for all the registered compounds and includes a chart for regional use.

Copies of Stauffer brochure No. A 10617 can be obtained by writing: Stauffer Chemical Company, Agricultural Chemical Division, Dept. KP, Westport, Connecticut 06880.

Bull tests suggested

Charolais and Simmental beef cattle breeders should select their herd bulls from 550-day weights instead of the 365-day weights used commonly to evaluate most beef cattle breeding herds, based on findings at The Pennsylvania State University and in Germany.

The research shows that Charolais and Simmental beef bulls do not reveal their true potential for efficient weight gains and feed efficiency (pounds of feed needed per pound of gain) during the traditional ages of 225 to 365 days used to measure Angus and Hereford growth qualities.

Instead, Charolais and Simmental bulls show their best weight gains and feed efficiencies during the 285 days from ages 265 to 550 days. These conclusions were drawn recently by Kent A. Barber and Dr. John O. Almquist of the Agricultural Experiment Station at Penn State.

The findings were illustrated by comparing two 3-year old Charolais bulls born on the same date. At 365 days of age Bull A weighed 1152 pounds while Bull B weighed 1205 pounds. At 550 days of age, however, Bull A weighed 1850 pounds and Bull B weighed only 1552 pounds. Thus Bull A showed a total post-yearling gain of 351 pounds over Bull B.

Their conclusions do not mean that the use of yearling weights in bull selection programs should be completely abandoned, the Penn State animal scientists quickly pointed out. If 550 day weights are impractical to obtain, then yearling weights are the next best basis for making sire selections within breeding herds.

Barber and Almquist recommended that 365-day weights be recorded and used to eliminate the bottom half of the bulls tested. Bulls which are average or above for 365-day weight should be continued on test through 550 days of age, they affirmed. These results should be used for further culling and selection.

PURINA DAIRY REPLACEMENT PROGRAM IS THE KEY TO SUCCESS AND PROFIT

FEED COST

DAIRY CALF PROGRAM — BIRTH TO 6 MONTHS..... $80.00*

+ Colostrum for first 3 days
+ Nurse-Gro or Nursing Chow 3 days to 4-5 weeks
+ Calf Startena and water free choice to 2 months
+ No Hay until 3rd month
+ Calf Growena 2 months — 6 months

DAIRY HEIFER PROGRAM — 7 THRU 22 MONTHS..... $140.00*

+ D&H Chow, D&H Block or D&H Special + Grain before Freshening
+ Hay or Pasture Free Choice

60 DAYS BEFORE FRESHENING..... $45.00*

+ 60 Days before Freshening — D&H Chow, D&H Block or D&H Special + Grain
+ 10-14 Days before Freshening — Begin increasing milking ration up to 14-16 Lbs. Per Head Per Day

TOTAL FEED COST AT 24 MONTHS..... $265.00*

* Feed costs based on current selling prices and are subject to change.

RECORDS PROVE THE VALUE OF EARLY FRESHENING

Test heifers at the Purina Dairy Research Center demonstrate that attention to good nutrition does permit an earlier first calf. The results further show that younger heifers are capable of producing an excellent milk flow in their first lactation.

A group of 35 test heifers averaged 23.6 months of age when they calved. In 305-day lactations they averaged 12,884 pounds of milk. The mature equivalent for these heifers averaged 17,025 pounds of milk.

Dairymen following the Purina Replacement Heifer Program report heifers producing over 16,000 pounds of milk and 600 pounds of fat in their first lactation. This excellent production enables heifers to repay their growing costs and start earning a good return over feed cost in their first lactation. Important, too, heifers which produce well in their first lactation usually continue to be high producers over a long milking life.
